

Application of the Course:

This Competency Standard Unit covers the performance of rescue procedures from live Low Voltage (LV) apparatus, not including overhead lines and underground cables in the work place. It specifies the mandatory requirements of rescue from a live LV panel and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for, health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

Industry standards for refresher training vary from state to state. Most states recommend refresher training for this unit every 12 months.

Prerequisites:

HLTAID001 Provide Cardiopulmonary Resuscitation

Course Contents:

The skills and knowledge required to rescue a person in contact with low voltage live electrical conductors and equipment

Respond to an emergency situation

Apply identified first aid procedures

Communicate details of the incident

Evaluate own performance

Course Duration:

4 hours classroom training

Assessment Methods:

Multiple choice theory questions

On-course workbook

Practical demonstrations

Award Issued:

Students who successfully complete this nationally recognized training will be awarded the statement of attainment: UETTDRRF06B Perform Rescue from a Live LV Panel

Cost of Course (negotiable if booking groups):

\$85.00 for Perform Rescue from a Live LV Panel

Validity:

Legislative approval valid for 1 year from completion date
