Herd Established 1925

HEREFORDS

Stud Established 1933

43rd Annual Sale

IRONBARK HEREFORDS 1933 to 2016 - 83 YEARS

The Ironbark Stud is in its 83rd year and this will be our 43rd Annual Bull Sale, a milestone in the beef cattle industry in Australia. What a difference a year makes; the cattle market is at an all time high, the future looks bright for the beef industry and agriculture in general. Large parts of Australia are seeing the best seasonal prospects for years, as I write this letter another big rain depression has come down through Queensland and New South Wales. There is no better time than now to join the cows up with upgraded genetics and young fresh bulls. Get involved in this very exciting future for the beef industry. High quality breeder cattle is where the profitability lies.

This year I would encourage you to trade your old bulls in, they are worth between \$2500 and \$3500 in the fat market, and invest in a younger bull with fresh genetics.

The program with the Ironbark bulls is: they are all reared on their own mothers in a commercial situation; we do not grain feed young bulls in the early part of their life. These bulls are basically grass-reared with a silage and grain supplement in the two months leading up to the Sale. This is the way bulls must be presented for sale if you are looking for soundness, fertility and longevity. There are not many in the stud industry that do it this way but the Ironbark bulls will live in ANY climate. Their fertility, longevity and calf-getting ability is as good as anyone's in the industry. When bulls are grain-fed heavily in the early part of their life you can expect problems in longevity, fertility and soundness.

ALL BULLS PRESENTED IN THIS SALE ARE SEMEN-TESTED BUT HAVE NEVER BEEN USED.

Ironbark uses the bloodlines of Montana (US) based Holden Herefords, a worldwide industry leader in Hereford cattle. We bring the semen across and we use it in our commercially-based program and it gives us the result that we are looking for out of our Ironbark cows. We then get the product that can live and perform in the Australian environment. Ironbark and Holden cross is the real deal. I see the performance in my travels. The heifer calving results are massive, with a noticeable drop in birth weight, in commercially based programs. Females have superior udders and milking ability. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal!

IRONBARK/HOLDEN CROSS NO. 1 FOR UNIFORMITY IN HEREFORD CATTLE.

I am hearing extremely encouraging results from the sale of Ironbark blood cattle throughout the country. Many of our clients have never seen prices like they are at the present. The general comment is: the grass finishers and feedlotters want more of this uniform, consistent product. This has been gained through the depth of the Ironbark cow herd. The best females have always been retained since 1933 and the best genetics in the Hereford world have always been used. There is no other bloodline that can deliver the consistency and uniformity than this famous old bloodline.

Significant numbers of Ironbark bred feeder steers end up at the Whyalla feedlot at Texas in QLD. Ironbark has a very good relationship with this particular feedlot. I strongly encourage producers, if they're not already EU accredited, to look into it as the premiums are mostly 20c above the normal feeder rate (see Whyalla ad in this catalogue).

HH Advance 2037Z, HH Advance 0002X, HH Advance 1098Y and HH Advance 0132X have a run of outstanding bulls in the sale. They're uniform and consistent and backed up by one of the top Hereford cow herds in the world. They are real world cattle with great EBVs and Phenotype. 0002X sons sold up to \$80,000 at Holden's record breaking 2014 sale. They deliver calving ease, growth, carcass and eye appeal. HH Advance 9169W and HH Advance 7101T are having a major impact on our female herd. You'll see a number of outstanding bulls in the sale out of cows by these bulls.

Australian sires this year are Mawarra Yesteryear, purchased at Hereford National for \$30,000 and Wallan Creek Victory Blend who was purchased for \$11,000. Both bulls have done an outstanding job. Sons of INB Twister G693(sold to Noel & Liz Cook for \$48,000 in the 2013 Sale) and INB Advance G692(sold to Mike & Belinda Norton, Tirranna Hereford Stud, Glen Innes for \$14,000 in the 2013 Sale) will be on offer and they are everything we expect and more.

31 sires are represented in the catalogue so a very large gene pool of genetics is on offer. Be very careful not to outcross for the sake of outcross; that is the quickest way you can lose uniformity and consistency in your program. Look at the consistency Holden and Cooper have bred into their world renowned herds by continually stacking the pedigrees with genetics that they are familiar with.

We feed a significant number of our own steers and Ironbark-blood steers for the domestic and export trade and we have a lot of information on carcass assessment of these bloodlines. The results are outstanding, giving us full confidence to push ahead with the program.

Consistency is key to our breeding decisions. Throughout the draft there are many quality low birth weight heifer bulls. We urge producers to use good bulls on their heifers as they represent the best genetics. It will enable far greater selection for genetic strength when yearly selecting your heifer replacements.

The Sale bulls are a tremendous draft of high quality genetics, the best we have presented. They have been running on oats since June. They are well grown and in ideal working condition. The bulls are semen tested and ready for the cows. I believe we have as much depth in the 2016 offering as any that I have been involved with.

Come along and have a look – They are a magnificent line of bulls.

Adrian Spencer

Performance Uniformity Consistency
IRONBARK BLOOD IS WHAT THE INDUSTRY WANTS.

Geoff and Nellie Hayes have the Ray White **Know How** to sell your rural property and livestock for more.

Geoff and Nellie Hayes own and operate Ray White Rural Glen Innes as a family business backed by the largest real estate network in Australasia and the fastest growing livestock network in Australia.

They are fully licensed agents, accredited Level 1 Auctions Plus assessors and licensed auctioneers. With local, national and international connections, Geoff and Nellie provide real solutions for all of your commercial, seed stock and genetics marketing and procurement across the country or around the globe with recent sales and procurement of genetics with NZ and USA seed stock operations.

To maximise the value of your rural property and livestock, call Geoff or Nellie today.

MOBILE PHONES ARE NOW USABLE AT THE SALE BARN

1% Rebate to outside agents introducing buyers in writing 24 hours prior to the sale. Fax details to Elders Gunnedah - 02 6748 3055.

FERTILITY: Bulls have been semen tested, but have NEVER been used!

All bulls offered for sale were tested for Pestivirus (BVDV) antigen using DNA hair testing to detect presence of the virus in the animals. All bulls were test negative for pestivirus and therefore we declare that none of the bulls is a Persistently Infected (PI) Pestivirus (BVDV) carrier. At the request of some clients, all lots will be vaccinated with 7 in 1. Ironbark has never had any infection from these diseases.

Bovine Johne's Disease: There is no restriction on the movement of cattle from the LLS - North West and they require no testing to go anywhere within Australia with the exception of Western Australia where appropriate paperwork is still required.

Accommodation can be arranged by contacting:

Commercial Hotel - 02 6782 1023 **Barraba Caravan Park** - 02 6782 1818

LOT 1 - INBK085 is sired by HH Advance 0132X and Jack Holden had the following to say "0132X has proven to be a great all around breeding bull that sires tremendous depth of side, shape, pigment and eye appeal. He is a calving ease, high maternal and carcass bull out of a great cow. He is a trait leader for Calving Ease, Scrotal, Milk, M&G and MARB EPDs along with \$CEZ, \$BMI and \$BII. His first daughters are calving now and are great brood type females with tremendous quality. His dam is one of our top donor females and sold for \$60,000 in our 2013 Female Sale She has produced 7 sons that have sold for an average of almost \$30,000. We are also using a maternal brother to 0132X that sold to Jamison Herefords in 2013. They are soft made, easy on the eye and real industry type bulls. 0132X is currently in the Genex lineup of sires and his progeny are being well received around the country and the world." INBH333, a 0132X son topped the 2014 Ironbark sale at \$32,000 to Noel and Liz Cook, Kindon Station, Goondiwindi, Qld. We have some excellent weaner bulls sired by INBH333. Another son, INBH157 sold for \$14,000 to the Boland family from Bernie in Tasmania. Both organisations are long standing Ironbark clients. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK085 has got the lot: breed character, low birth weight and the type that we all want to breed. One of the good ones to come out of the Ironbark program.

LOT 2 - INBK082 is sired by INB 603 Home Builder A481 who was sold in the 2007 sale for \$11,000. We have since purchased this outstanding sire and he stands at Ironbark today. A481 is a half brother to INB B220 who sold in the 2008 sale for \$30,000 to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2011 sale INB Rambo E009 sold for \$16,000 to Hylands Hereford Stud, Cootamundra NSW. In 2012 Sale INB F509 sold to Noel and Liz Cook for \$12,000. In the 2013 sale INB G692 sold for \$14,000 to Mike and Belinda Norton, Glen Innes NSW. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. Some of the good bulls in the Ironbark program in this Lot's pedigree: Home Builder 603, Kurrajong T300 and High Energy S117.

LOT 4 - INBK172 is sired by GH Adams Twister 416T who is a half brother to GH Neon 17N. This gives you an idea of the power of these Neon cattle. Twister has an EMA of +5.8, a 600 day weight of +104. Twister sired the top price in the 2013 bull sale at \$48,000. Twister 416T is a breed leading sire for growth and carcass. INBK172 is in the top 6% for 200, 400, 600-day weight and EMA. His dam has a milk figure of +17.

Leader Flexible Tags

For fast, positive livestock identification.

Leader Flexible Tags are ear tags that can be used for all livestock – beef cattle, dairy cattle, deer, goats, pigs and stud sheep.

Leader Flexible Tags are designed for high-retention rates and made from a durable, flexible plastic. Only Leader provides “Reinforced Strength Bars” in the necks of its tags for added reliability and longevity.

LEADER ARE PROUD TO SUPPLY ALL IRONBARK HEREFORDS WITH BLACK FLEXIBLE TAGS

NLIS Enviro Tags

The only Australian made and owned tags!

- Lifetime Guarantee for Retention!
 - Fully Recyclable
 - No Lump or Damaged chip on application
 - Any lost tags replaced at no charge with next order
- Special for New Enviro Tag customers (first purchase only):
Buy 300 and receive a FREE Jumbo Ring Expander and Jumbo Rings
Buy 1000 and receive a Blue Heeler Stock Prod

LEADER ARE PLEASED TO ASSIST ALL IRONBARK HEREFORD CUSTOMERS WITH THEIR LIVESTOCK ID REQUIREMENTS

Leaders in the field since 1948.

LOT 8 - INBK375 is sired by HH Advance 1098Y and the following is what Jack Holden has to say "1098Y topped our 2012 sale at \$102,000 to Harrison Cattle Co. and Flying S Herefords. He is a heavily pigmented, powerhouse performance bull out of one of our very best cows. He is a trait leader for Calving Ease, Milk, M&G, and REA EPDs. His progeny are very well marked, long bodied, thick and stylish. He is backed by one of our very best cow families and his maternal granddam produced over \$250,000 in progeny sales. He is a great prospect to help carry on the tradition of the 8050U line of cattle in our herd." 1098Y is certainly performing in the Ironbark program on the above description. I am a great believer in these genetics; they are time measured cattle with worldwide acceptance. Uniformity is a trademark of these cattle. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK375 is in the top 15% for milk; top 7% of the breed for 200 and 400-day weight and top 3% of the breed for 600-day weight.

LOT 9 - INBK489 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK489 is in the top 10% of the breed for 200-day weight, top 12% of the breed for 400-day weight and the top 9% of the breed for 600-day weight.

He is a great prospect to help carry on the tradition of the 8050U line of cattle in our herd." 1098Y is certainly performing in the Ironbark program on the above description. I am a great believer in these genetics; they are time measured cattle with worldwide acceptance. Uniformity is a trademark of these cattle. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK399 is in the top 1% of the breed for milk, 200-day weight, 400-day and 600-day weight and RBY. And in the top 6% for EMA.

LOT 12 - INBK486 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK486 is one of the good bulls in the sale with a balanced set of figures.

LOT 15 - INBK447 Is sired by INB 9169W Advance G692, a son of HH Advance 9169W. He was purchased by Michael and Belinda Norton, Tirranna Hereford Stud, Glen Innes, NSW for \$14,000 at the 2013 sale. 9169W is one of the top breeding sires in the Illustrious Holden Hereford program, his sire HH Advance 4140P is one of those dominant sires that I like to breed a program around. INB G692 is a half brother to INB Home Builder A481, leading sire at Ironbark, also a half brother to INBB220 (\$30,000) and INBF509 (\$12,000) both sold to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK447 is in the top 3% of the breed for milk; top 10% of the breed for 200-day weight and top 7% of the breed for 600-day weight. His dam has a milk figure of +20.

LOT 16 - INBK046 is sired by Mawarra Yesteryear, purchased at the Hereford National for \$30,000 and is sired by Cootharaba Magnum, a breed leading Australian bred sire. Yesteryear has an outstanding line of high performance sons on offer and is bred out of a strong cow base which is our strategy on sire selection. Yesteryear stamps his progeny, they are all one type. INBK046 is a quality bull with a 603 dam.

Would you like to save \$100,000 of labour over the working life of your crush?

Processing cattle has just got a whole lot easier!

ARE YOU TIRED OF STRUGGLING EVERY TIME YOU PROCESS CATTLE?

Does your old crush

- Rattle and crash making far too much noise
- Require far too much labour to operate.
- Knock your cattle about causing stress & bruising.

Would you like to...

- Reduce your labour costs by 50%
- Improve processing time efficiency by 50%
- Avoid bruising and stress on your cattle
- Process cattle smoothly and efficiently and without all the noise!

"The Silencer is the SAFEST and QUICKEST crush I have ever worked with! In our air operated crush it would take two days to process our bulls, with our new Silencer Hydraulic Crush we are doing the same amount of bulls in only one day."

Nick Forbes - Manager Lawson Angus

"At Smithfield Feedlot we have moved to using all Silencer crushes because they are the softest crush I have used on the animals. Every aspect of this unit is designed for animal comfort and control, which is our number one priority!"

Ryan Brown - Livestock Operations Manager
Smithfield Feedlot

"Our air crush wouldn't hold bulls in the head bail! I have asked people for years, 'Where can I find a crush that will hold bulls?' The answer was always the same, 'there isn't one.' But now I can tell everyone the Silencer will hold any bull no matter how big and angry!!"

Michelle Muller - Bull Unit Lawson Angus

LOT 21 - INBK317 is sired by INB Neon F011, a son of INB Neon B220 who was sold to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld for \$30,000. The dam side of B220 has three outstanding cows - INB W521, INB L200 and INB H582. Those three cows have had a major impact on our program over many years. INB F011 was sold to Peter and David Wilson, The Downs, Warialda, NSW for \$9,000 in the 2012 sale. The Wilson family have been long standing clients at Ironbark and David Wilson's grandfather bought lot 1 in the first Ironbark sale in 1974. INBK317 is in the top 4% of the breed for 200-day weight, 400-day weight and 600-day weight. His dam has milk figure of +14.

LOT 22 - INBK076 is sired by Wallan Creek Victory Blend F099 who was purchased for \$11,000, a big powerful outcross sire who is having a major impact in the Ironbark program. There is a group of powerful sons on offer and the bull goes along with our strategy of selecting out of programs with a strong cow base that has stood the test of time over many years. If this strategy is followed uniformity is achieved. INBK076 is in the top 4% of the breed for 200-day weight, top 11% of the breed for 600-day weight. His dam has a milk figure of +20.

LOT 23 - INBK338 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK338 is in the top 5% of the breed for milk. Holden breeding both sides of this bull's pedigree and one of the good bull in the sale. His dam has a milk figure of +22.

LOT 27 - INBK413 is sired by INB 9169W Advance G692, a son of HH Advance 9169W. He was purchased by Michael and Belinda Norton, Tirranna Hereford Stud, Glen Innes, NSW for \$14,000 at the 2013 sale. 9169W is one of the top breeding sires in the Illustrious Holden Hereford program, his sire HH Advance 4140P is one of those dominant sires that I like to breed a program around. INB G692 is a half brother to INB Home Builder A481, leading sire at Ironbark, also a half brother to INBB220 (\$30,000) and INBF509 (\$12,000) both sold to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK413 is in the top 20% of the breed for milk.

LOT 34 - INBK501 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK501 is another highly rated son of 2037Z and what a group of bulls they are.

LOT 38 - INBK124 is sired by INB 603 Home Builder A481 who was sold in the 2007 sale for \$11,000. We have since purchased this outstanding sire and he stands at Ironbark today. A481 is a half brother to INB B220 who sold in the 2008 sale for \$30,000 to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2011 sale INB Rambo E009 sold for \$16,000 to Hylands Hereford Stud, Cootamundra NSW. In 2012 Sale INB F509 sold to Noel and Liz Cook for \$12,000. In the 2013 sale INB G692 sold for \$14,000 to Mike and Belinda Norton, Glen Innes NSW. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. A double cross of Home Builder on offer here. Dam has a milk figure of +16.

LOT 39 - INBK441 is sired by HH Advance 1098Y and the following is what Jack Holden has to say "1098Y topped our 2012 sale at \$102,000 to Harrison Cattle Co. and Flying S Herefords. He is a heavily pigmented, powerhouse performance bull out of one of our very best cows. He is a trait leader for Calving Ease, Milk, M&G, and REA EPDs. His progeny are very well marked, long bodied, thick and stylish. He is backed by one of our very best cow families and his maternal granddam produced over \$250,000 in progeny sales. He is a great prospect to help carry on the tradition of the 8050U line of cattle in our herd." 1098Y is certainly performing in the Ironbark program on the above description. I am a great believer in these genetics; they are time measured cattle with worldwide acceptance. Uniformity is a trademark of these cattle. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK441 is in the top 5% of the breed for milk. A great set of balanced figures.

LOT 44 - INBK498 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK498 – pedigree and performance, another top line son of 2037Z.

LOT 46 - INBK431 is sired by INB 9169W Advance G692, a son of HH Advance 9169W. He was purchased by Michael and Belinda Norton, Tirranna Hereford Stud, Glen Innes, NSW for \$14,000 at the 2013 sale. 9169W is one of the top breeding sires in the Illustrious Holden Hereford program, his sire HH Advance 4140P is one of those dominant sires that I like to breed a program around. INB G692 is a half brother to INB Home Builder A481, leading sire at Ironbark, also a half brother to INBB220 (\$30,000) and INBF509 (\$12,000) both sold to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK431 – low birth weight.

LOT 48 - INBK463 is sired by HH Advance 0002X who was brought to Australia by Vern Younger. The following is what Jack Holden has to say about this outstanding sire "0002X topped our 2011 sale at \$55,000 for ½ interest to Le Force Herefords. He has truly exceeded all of our expectations in his great combination of calving ease, growth, maternal and carcass strength. He is a proven heifer bull whose progeny also have power, rib, eye appeal and extra length. He is a trait leader for Calving Ease, BW, Milk, M&G and Scrotal EPDs along with \$CEZ, \$BMI and \$BII He has average progeny ratios of BWR 95.3; NR 100.3; YR 100.4. He has been used AI on many Angus heifers with great success. We have sold 13 sons for an average of \$28,000 and his first daughters are now in production and they are awesome. Look for lots more from this great young sire that combines what we all need in the beef industry." The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK463 is in the top 1% of the breed for milk, top 10% for 200-day, top 6% of the breed for 400-day and the top 4% of the breed for 600-day weights. His dam has a milk figure of +17. One of the good bulls in the sale with outstanding figures.

LOT 59 - INBK152 is sired by INB 603 Home Builder A481 who was sold in the 2007 sale for \$11,000. We have since purchased this outstanding sire and he stands at Ironbark today. A481 is a half brother to INB B220 who sold in the 2008 sale for \$30,000 to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2011 sale INB Rambo E009 sold for \$16,000 to Hylands Hereford Stud, Cootamundra NSW. In 2012 Sale INB F509 sold to Noel and Liz Cook for \$12,000. In the 2013 sale INB G692 sold for \$14,000 to Mike and Belinda Norton, Glen Innes NSW. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. INBK152 is in the top 10% of the breed for milk, 200-day weight and top 14% of the breed for 600-day weight. Dam has a milk figure of +22.

LOT 62 - INBK318 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK318 is in the top 15% of the breed for milk and the top 11% of the breed for 200-day weights. Dam has a milk figure of +18.

LOT 66 - INBK397 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK397, a 2037Z son, and what a line of bulls they are. Dam has a milk figure of +14.

LOT 84 - INBK494 is sired by INB 9169W Advance G692, a son of HH Advance 9169W. He was purchased by Michael and Belinda Norton, Tirranna Hereford Stud, Glen Innes, NSW for \$14,000 at the 2013 sale. 9169W is one of the top breeding sires in the Illustrious Holden Hereford program, his sire HH Advance 4140P is one of those dominant sires that I like to breed a program around. INB G692 is a half brother to INB Home Builder A481, leading sire at Ironbark, also a half brother to INBB220 (\$30,000) and INBF509 (\$12,000) both sold to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK494 – a very smart bull with the Holden pedigree.

LOT 88 - INBK086 is sired by Wallan Creek Victory Blend F099 who was purchased for \$11,000, a big powerful outcross sire who is having a major impact in the Ironbark program. There is a group of powerful sons on offer and the bull goes along with our strategy of selecting out of programs with a strong cow base that has stood the test of time over many years. If this strategy is followed uniformity is achieved. INBK086 is in the top 10% of the breed for 200-day, top 4% of the breed for 400 and 600-day weights.

LOT 96 - INBK419 is sired by HH Advance 1098Y and the following is what Jack Holden has to say "1098Y topped our 2012 sale at \$102,000 to Harrison Cattle Co. and Flying S Herefords. He is a heavily pigmented, powerhouse performance bull out of one of our very best cows. He is a trait leader for Calving Ease, Milk, M&G, and REA EPDs. His progeny are very well marked, long bodied, thick and stylish. He is backed by one of our very best cow families and his maternal granddam produced over \$250,000 in progeny sales. He is a great prospect to help carry on the tradition of the 8050U line of cattle in our herd." 1098Y is certainly performing in the Ironbark program on the above description. I am a great believer in these genetics; they are time measured cattle with worldwide acceptance. Uniformity is a trademark of these cattle. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK419 is in the top 4% of the breed for milk, top 10% of the breed for 200-day, 400-day and top 6% of the breed for 600-day weights. Dam is a Twister with a milk figure of +14.

LOT 97 - INBK461 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK461 – balanced set of figures and a top of the line 2037Z.

LOT 107 - INBK284 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK284 is in the top 15% of the breed for milk. A very smart 2037Z and dam has a milk figure of +17.

LOT 114 - INBK357 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK357 is in the top 4% of the breed for 200-day, top 5% of the breed for 400-day and top 3% of the breed for 600-day weights. His dam is an outstanding Neon cow.

LOT 115 - INBK469 is sired by INB 9169W Advance G692, a son of HH Advance 9169W. He was purchased by Michael and Belinda Norton, Tirranna Hereford Stud, Glen Innes, NSW for \$14,000 at the 2013 sale. 9169W is one of the top breeding sires in the Illustrious Holden Hereford program, his sire HH Advance 4140P is one of those dominant sires that I like to breed a program around. INB G692 is a half brother to INB Home Builder A481, leading sire at Ironbark, also a half brother to INBB220 (\$30,000) and INBF509 (\$12,000) both sold to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK469 is in the top 5% of the breed for milk and is a double cross Holden and an ideal heifer bull.

LOT 122 - INBK353 is sired by INB 9169W Advance G692, a son of HH Advance 9169W. He was purchased by Michael and Belinda Norton, Tirranna Hereford Stud, Glen Innes, NSW for \$14,000 at the 2013 sale. 9169W is one of the top breeding sires in the Illustrious Holden Hereford program, his sire HH Advance 4140P is one of those dominant sires that I like to breed a program around. INB G692 is a half brother to INB Home Builder A481, leading sire at Ironbark, also a half brother to INBB220 (\$30,000) and INBF509 (\$12,000) both sold to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK353 is in the top 15% for milk and is a quality Holden bred bull.

LOT 123 - INBK334 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK334 – another quality 2037Z.

LOT 131 - INBK410 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK410 – great set of figures and a top heifer bull.

LOT 132 - INBK203 is sired by INB 603 Home Builder A481 who was sold in the 2007 sale for \$11,000. We have since purchased this outstanding sire and he stands at Ironbark today. A481 is a half brother to INB B220 who sold in the 2008 sale for \$30,000 to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2011 sale INB Rambo E009 sold for \$16,000 to Hylands Hereford Stud, Cootamundra NSW. In 2012 Sale INB F509 sold to Noel and Liz Cook for \$12,000. In the 2013 sale INB G692 sold for \$14,000 to Mike and Belinda Norton, Glen Innes NSW. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. INBK203 – Home Builder/Neon. Performance and quality.

LOT 144 - INBK464 is sired by INB 5212R Advance G403 who is sired by HH Advance 5212R, a leading sire in the Holden Herefords program. INBK403 was retained for use in the Ironbark program to continue the 5212R influence. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK464 is in the top 15% of the breed for milk, 200-day, 400-day and 600-day weights. Dam has a milk figure of +16.

LOT 152 - INBK205 is sired by INB 603 Home Builder A481 who was sold in the 2007 sale for \$11,000. We have since purchased this outstanding sire and he stands at Ironbark today. A481 is a half brother to INB B220 who sold in the 2008 sale for \$30,000 to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2011 sale INB Rambo E009 sold for \$16,000 to Hylands Hereford Stud, Cootamundra NSW. In 2012 Sale INB F509 sold to Noel and Liz Cook for \$12,000. In the 2013 sale INB G692 sold for \$14,000 to Mike and Belinda Norton, Glen Innes NSW. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. INBK205 is in the top 15% of the breed for milk and is a quality Home Builder bull whose dam has a milk figure of +19.

LOT 158 - INBK487 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK487 – high quality heifer bull and what an outstanding run of bulls these 2037Zs are.

LOT 167 - INBK040 is sired by HH Advance 1098Y and the following is what Jack Holden has to say "1098Y topped our 2012 sale at \$102,000 to Harrison Cattle Co. and Flying S Herefords. He is a heavily pigmented, powerhouse performance bull out of one of our very best cows. He is a trait leader for Calving Ease, Milk, M&G, and REA EPDs. His progeny are very well marked, long bodied, thick and stylish. He is backed by one of our very best cow families and his maternal granddam produced over \$250,000 in progeny sales. He is a great prospect to help carry on the tradition of the 8050U line of cattle in our herd." 1098Y is certainly performing in the Ironbark program on the above description. I am a great believer in these genetics; they are time measured cattle with worldwide acceptance. Uniformity is a trademark of these cattle. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK040 - top quality low birth weight Holden bull.

LOT 175 - INBK144 is sired by INB 603 Home Builder A481 who was sold in the 2007 sale for \$11,000. We have since purchased this outstanding sire and he stands at Ironbark today. A481 is a half brother to INB B220 who sold in the 2008 sale for \$30,000 to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2011 sale INB Rambo E009 sold for \$16,000 to Hylands Hereford Stud, Cootamundra NSW. In 2012 Sale INB F509 sold to Noel and Liz Cook for \$12,000. In the 2013 sale INB G692 sold for \$14,000 to Mike and Belinda Norton, Glen Innes NSW. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. INBK144 – balanced figures and a quality Lot whose dam has a milk figure of +17.

LOT 176 - INBK090 is sired by Wallan Creek Victory Blend F099 who was purchased for \$11,000, a big powerful outcross sire who is having a major impact in the Ironbark program. There is a group of powerful sons on offer and the bull goes along with our strategy of selecting out of programs with a strong cow base that has stood the test of time over many years. If this strategy is followed uniformity is achieved. INBK090 is in the top 7% of the breed for 400-day and top 10% for 600-day weights. High quality bull whose dam has a milk figure of +16.

LOT 187 - INBK488 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK488 is in the top 2% of the breed for 200-day, top 5% of the breed for 400-day and the top 3% of the breed for 600-day weight. Great performance!

LOT 193 - INBK452 is sired by INB 9169W Advance G692, a son of HH Advance 9169W. He was purchased by Michael and Belinda Norton, Tirranna Hereford Stud, Glen Innes, NSW for \$14,000 at the 2013 sale. 9169W is one of the top breeding sires in the Illustrious Holden Hereford program, his sire HH Advance 4140P is one of those dominant sires that I like to breed a program around. INB G692 is a half brother to INB Home Builder A481, leading sire at Ironbark, also a half brother to INBB220 (\$30,000) and INBF509 (\$12,000) both sold to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBK452 is in the top 5% of the breed for milk and is a top grade heifer bull. Dam has a milk figure of +17.

LOT 201 - INBL027 is sired by INB 603 Home Builder A481 who was sold in the 2007 sale for \$11,000. We have since purchased this outstanding sire and he stands at Ironbark today. A481 is a half brother to INB B220 who sold in the 2008 sale for \$30,000 to Noel & Liz Cook, Kindon Station, Goondiwindi, Qld. In the 2011 sale INB Rambo E009 sold for \$16,000 to Hylands Hereford Stud, Cootamundra NSW. In 2012 Sale INB F509 sold to Noel and Liz Cook for \$12,000. In the 2013 sale INB G692 sold for \$14,000 to Mike and Belinda Norton, Glen Innes NSW. In the 2014 sale INB H301 sold to Michael Hickey at Guyra, NSW for \$10,000. The dam of these bulls, INB W521 is without a doubt the leading producer in the Ironbark program. There are a run of great cows back through her pedigree. INBL027 is in the top 5% of the breed for 200-day, top 15% of the breed for 400-day and 600-day weights. Dam has a milk figure of +22.

LOT 203 - INBL078 is sired by HH Advance 0002X who was brought to Australia by Vern Younger. The following is what Jack Holden has to say about this outstanding sire "0002X topped our 2011 sale at \$55,000 for ½ interest to Le Force Herefords. He has truly exceeded all of our expectations in his great combination of calving ease, growth, maternal and carcass strength. He is a proven heifer bull whose progeny also have power, rib, eye appeal and extra length. He is a trait leader for Calving Ease, BW, Milk, M&G and Scrotal EPDs along with \$CEZ, \$BMI and \$BII He has average progeny ratios of BWR 95.3; NR 100.3; YR 100.4. He has been used AI on many Angus heifers with great success. We have sold 13 sons for an average of \$28,000 and his first daughters are now in production and they are awesome. Look for lots more from this great young sire that combines what we all need in the beef industry." The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBL078 is in the top 2% of the breed for milk and top 15% of the breed for 200-day. He is a high grade heifer bull and dam has a milk figure of +15.

LOT 204 - INBL031 is sired by Wallan Creek Victory Blend F099 who was purchased for \$11,000, a big powerful outcross sire who is having a major impact in the Ironbark program. There is a group of powerful sons on offer and the bull goes along with our strategy of selecting out of programs with a strong cow base that has stood the test of time over many years. If this strategy is followed uniformity is achieved. INBL031 is in the top 4% of the breed for 200-day, top 6% of the breed for 400-day and 600-day weights.

LOT 205 - INBL140 is sired by HH Advance 0002X who was brought to Australia by Vern Younger. The following is what Jack Holden has to say about this outstanding sire "0002X topped our 2011 sale at \$55,000 for ½ interest to Le Force Herefords. He has truly exceeded all of our expectations in his great combination of calving ease, growth, maternal and carcass strength. He is a proven heifer bull whose progeny also have power, rib, eye appeal and extra length. He is a trait leader for Calving Ease, BW, Milk, M&G and Scrotal EPDs along with \$CEZ, \$BMI and \$BII He has average progeny ratios of BWR 95.3; NR 100.3; YR 100.4. He has been used AI on many Angus heifers with great success. We have sold 13 sons for an average of \$28,000 and his first daughters are now in production and they are awesome. Look for lots more from this great young sire that combines what we all need in the beef industry." The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBL140 is in the top 1% of the breed for milk and is a high grade heifer bull whose dam has a milk figure of +20.

LOT 210 - INBL151 is sired by HH Advance 1098Y and the following is what Jack Holden has to say "1098Y topped our 2012 sale at \$102,000 to Harrison Cattle Co. and Flying S Herefords. He is a heavily pigmented, powerhouse performance bull out of one of our very best cows. He is a trait leader for Calving Ease, Milk, M&G, and REA EPDs. His progeny are very well marked, long bodied, thick and stylish. He is backed by one of our very best cow families and his maternal granddam produced over \$250,000 in progeny sales. He is a great prospect to help carry on the tradition of the 8050U line of cattle in our herd." 1098Y is certainly performing in the Ironbark program on the above description. I am a great believer in these genetics; they are time measured cattle with worldwide acceptance. Uniformity is a trademark of these cattle. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics; they are the real deal! INBL151 is in the top 5% of the breed for milk, top 15% of the breed for 200-day and the top 7% of the breed for 600-day weights. A high grade heifer bull with a milk figure of +14.

LOT 215 - INBL128 is sired by HH Advance 2037Z, another Holden Hereford bull, sold for US\$80,000 in their 2013 bull sale. Jack Holden said "we debated long and hard about retaining 2037Z to use ourselves. He is an up headed, super sound, thick quartered and deep sided bull with loads of class. He backs it up with great cow power and a super set of EPDs and individual performance. His dam is a full sister to the 6155S donor cow and a full sister to the 8050U herd sire. 2037Z has a pedigree stacked with great females." A truly outstanding sire that breeds uniformity and breed type. The uniformity in breed-type constitution, milk, udder quality, and birth weight that will be gained out of these unique time-measured cattle is what the breeding of profitable beef cattle is all about. Don't hold back on these Holden genetics: they are the real deal! INBL128 is in the top 3% of the breed for 200-day, top 6% of the breed for 400-day and the top 3% of the breed for 600-day weights. A top line 2037Z whose dam has a milk figure of +16.

HOW TO DEHORN - A SIMPLE PROCESS

The top horn holding position.

The bottom horn holding position.

For bigger calves use pipe dehorners or large metal square scoop dehorner - stainless steel, opening 6.5cm, length 45cm.

For smaller calves use knife with double sided blade enabling operator to cut away from ears. Quality steel allows user to do up to 400 calves in one sharpening.

Very important - Note a ring of skin around the horn.

BLOODLESS DEHORNING

Dehorning Irons are made from Stainless Steel. Their sizes range from $\frac{3}{4}$ inch, 1 inch, 1 $\frac{1}{8}$ inch, 1 $\frac{1}{4}$ inch, and 1 $\frac{1}{2}$ inch.

The key is to have the iron extremely hot. The iron is applied for 8 seconds followed by a twisting motion.

Clarke Pro Branding Fire Box. Larger opening than most forges to allow placement of branding iron.
