Photo Identification Badges

Allow Protection Plus Security Services to produce a professional looking ID Badge that will enhance your image and allow for positive employee and visitor identification.

In the initial design we will work with you to create and refine the identification badge that best represents your company image. We will take the digital photos and design a badge you can be proud of.

All badges come equipped with a badge clip. We can produce both adhesive and standard PVC badges. The adhesive PVC badges are ideal for attaching to your proximity access control card. You get all the benefits of an ID Badging System without the expense and maintenance of the system.

Card Design (up to two hours)	\$100.00
On-Site Photography (1 hour min.)	\$90.00/hr
