SYNTHETIC GRASS FOR PUBLIC OPEN SPACES

www.greenplanetgrass.com.au

Established in 2008, Green Planet Grass services both regional & metropolitan areas & has a wide range of experience in the installation of public landscaping, sporting & recreational synthetic grass projects.

Advantages of Synthetic Grass include no watering, weed spraying, fertilizing or mowing. At Green Planet Grass we provide low maintenance, hardwearing & attractive options for various surfaces. Synthetic Grass can be installed over concrete, bitumen, brick-paving as well as over natural ground & is suitable for both interior and exterior use.

Public Landscaping & Street Scapes

An ideal solution for median strips, roundabouts, hard to access areas & shady & high pedestrian areas where natural lawn is difficult to grow. When installed professionally, artificial grass provides a level, secure & stable footing, reducing the risk of tripping & falling – particularly beneficial for the elderly and people with disabilities. In addition, our specialised installation techniques ensure the grass will be safe & secure in public open spaces.

Sporting

We can provide & install surfaces for the following sports:

- Tennis
- Bowling Greens
- Hockey
- Futsal & 5 a side football
- Cricket
- Soccer
- Golf

Recreational & Playgrounds

We have a variety of options available including Soft Fall for installation under play & climbing equipment, customised lines & colours and multi-functional surfaces for both dry & wet areas including aquatic centre landscaping.

Synthetic grass under play areas has an added advantage over the traditional sand pit surround as there is nowhere for hazards such as syringes and broken glass to hide. Play areas can be quickly & efficiently checked for potential safety concerns.

All of our synthetic lawns are Australian made to Australian & New Zealand safety standards & are manufactured to Quality Assured Standards (ISO 9001:2008). They are heavy metal free & contain no dangerous toxins. All GPG grasses are fire retardant and won't shrink or fade.

Baldivis Cricket Wickets

Green Planet Grass – saves water, maintenance costs and helps beautify public spaces.
