

PROUD MEMBER OF PALLETWAYS

MCGREGOR LOGISTICS INVESTS £70,000
IN ITS WAREHOUSING FACILITY

McGregor Logistics was established in 2006 by Keith Law, Managing Director. Keith boasts over three decades of experience in the transport industry. The business first began by investing in one truck, providing a first class transport service carrying fruit and vegetables for the local markets. Since its inception McGregor Logistics has grown exponentially via diversification and rapid expansion further into the transport industry.

In 2013 the company invested in a new site with over 110,000 square foot of warehousing in Doncaster, and a site in West Thurrock with over 120,000 square foot of warehousing. The company has invested around £30,000 in recruitment for industry experienced transport operators, to improve the strength of the team. It has invested a further £70,000 in warehouse racking to facilitate the growth in our existing customers.

In 2014 McGregor Logistics decided to join the UK's Largest Pallet Network, Palletways. Operations Director Katy Williams stated, "It has truly been an honour working alongside Palletways, not only have they helped us to provide an outstanding service to our new and existing customers but they have supported the business's growth immensely."

Katy continued, "As a business and as a family, we have a very clear goal of what we expect from the business, and we want it to achieve moving forward. We endeavour to provide flexible transport solutions, and to get it right first time."

The company now operates a diverse fleet of over 50 Vehicles and 100 Trailers. The fleet consists of 7.5 tonne tail-lift rigids, refrigerated trailers, 18 tonne tail-lift rigids, 44 tonne tractor units and a wide variety of trailers, ranging from curtain sided trailers, refrigerated trailers, moffett mounted curtain sided trailers, walking floor trailers, skelly trailers and double deck trailers.

McGregor Logistics has installed modern technology systems in its fleet of vehicles, currently the fleet utilises Trakman telematics and vehicle tracking, TOM TOM trackers and also Intelligent Telematics for forward facing cameras.

The Doncaster based business operates nationwide throughout the UK and is a specialist in London and Yorkshire. McGregor Logistics carries all general haulage cargo as well as more specialised commodities, which include recycling waste carried in the walking floor trailers and frozen produce.

McGregor Logistics has always prioritised providing clean, safe and environmentally friendly environments for all of its employees, customers, suppliers and its community. The company is currently in the process to become FORS registered.

Next year McGregor Logistics is celebrating its tenth year anniversary. The business is organising a dinner dance, whereupon it will welcome both its customers and suppliers to celebrate all its achievements over the last ten years.

Katy Williams commented on McGregor Logistics current position in the transport industry, "The business has achieved so much in such a short space of time, when people ask me what the end goals are for the business, my only answer can be, "The Sky's the Limit". We have always strived for a London Depot, and to have achieved a second depot within the first 10 years of trading is something I am immensely proud of. We have overcome some pretty big challenges in the last 24 months and at this point, I can only hope to continue growing with strength and stability and to continue to provide a valued service to our customers."
