The formulations of the NUTRIEL family are foliar fertilizers consisting of high purity and solubility matters with rapid absorption. The combinations of the contained elements have been studied to provide balanced nutrition to crops in different phenological phases. In addition to nitrogen, phosphorus and potassium, NUTRIEL is enriched with essential micro-elements to prevent any microdeficiencies and contribute to the harmonious development of all crops.

DOSAGE AND METHODS OF USE	CULTURE	APPLICATION	DOSE
FOLIAR	Fruit Horticultural Floricultural Industrial crops	2-4 Throughout the cycle	200 - 250 g/100L

Warnings: For any mixtures with other products, make preliminary tests. Observe the dosages shown. Store the product in properly ventilated areas.

FORMULATION

Soluble microcrystals
