

IDRO Ca/Fe

**REINFORCING AND GREENING
EC FERTILIZER**
Calcium nitrate solution with iron

COMPOSITION (%w/w)

Total nitrogen (N)	8%
Nitric nitrogen (N)	8%
Water-soluble calcium oxide (CaO)	14%
Water-soluble iron (Fe)	0.02%
Iron (Fe) chelated with EDTA	0.02%

IDRO Ca / Fe is a solution of calcium nitrate enriched with EDTA chelated iron which benefits the vegetative growth. The product contributes to healthy plant growth, improves tissue texture strengthening the cell walls of the trunk and leaves. IDRO Ca / Fe improves the quality standards of productions acting on the color and preservability of fruits. The complexed iron with an innovative chelating agent is quickly assimilated and more stable in the soil effectively contributing to prevent leaves yellowing.

DOSAGE AND METHODS OF USE	CROPS	APPLICATION	DOSE
FERTIGATION	Fruit Horticultural Floricultural Industrial	2-4 Throughout the cycle for fertigation	40 - 80 l/ha

Warnings: Shake the product well before use. For any mixtures with other products, make preliminary tests. Observe the dosages shown. The product is not combustible and is stable at ordinary temperatures and pressures. Store the product in adequately ventilated rooms at temperatures between + 5 ° C and + 35 ° C.
