

# CALMIX

EC FERTILIZER

Calcium chloride with boron

## COMPOSITION (%w/w)

Water-soluble calcium oxide (CaO)	12%
Water-soluble boron (B)	0.2%

CALMIX is a liquid fertilizer to be used specifically for the prevention and care of nutritional physiopathies caused by calcium deficiency in plant tissues. This formulation contains quick-absorbing calcium since the synergic action of boron allows calcium to be quickly transferred within the tissues. CALMIX activates several enzymatic processes and increases the mechanical strength of plant tissues. In particular, the product is able to prevent rotten apples, vine desiccation, rotten tomato, carrot hollow heart, lettuce desiccation, celery heart dissection, strawberry leaf desiccation, cucurbitaceae leaf desiccation, ulceration of aubergine and physiological melon and watermelon seccume.

Allowed in  
**BIOLOGICAL  
AGRICULTURE**

DOSAGE AND METHODS OF USE	CROPS	APPLICATION	DOSE
<b>FOLIAR</b>	Pomacee (Pear and apple tree) Fruit Horticultural Floricultural Industrial	2-4 Throughout the cycle	400 - 500 ml/100 L of water
<b>FERTIGATION</b>	Pomacee (Pear and apple tree) Fruit Horticultural Floricultural Industrial	2-4 Throughout the cycle	6 - 9 L/ha

Warnings: Shake the product well before use. For any mixtures with other products, make preliminary tests. Observe the dosages shown. The product is not combustible and is stable at ordinary temperatures and pressures. Store the product in adequately ventilated rooms at temperatures between + 5 ° C and + 35 ° C.
