AC100+ Gold Cartridges

The AC100+ Gold is a two-component adhesive anchoring system. The system includes injection adhesive in plastic cartridges, mixing nozzles, dispensing tools and hole cleaning equipment. The AC100+ Gold is designed for bonding threaded rod and reinforcing bar hardware into drilled holes in concrete base materials.

Part #	Description
R8478SD	AC100+ Gold 10 fl. Oz. Quik-Shot

Cartridge System Mixing Nozzles

Part #	Description
R08294	Extra mixing nozzle (with a 8" extension)

Dispensing Tools for Injection Adhesive

Part #	Description
R8298	13 fl. Oz. Manual tool
R8409	21 fl oz Standard metal manual tool

PE1000+ Cartridges

The PE1000+ is a two-component, high strength adhesive anchoring system. The system includes injection adhesive in plastic cartridges, mixing nozzles, dispensing tools and hole cleaning equipment. The PE1000+ is designed for bonding threaded rod and reinforcing bar hardware into drilled holes in concrete base materials.

Part #	Description
R0500SD	PE1000+ 13 fl. oz. dual Cartridge
R0502SD	PE1000+ 10 fl oz. dual cartridge

Pure 110+ Cartridges

Product Description
The Pure110+ is a two-component, high strength adhesive anchoring system. The system includes injection adhesive in plastic cartridges, mixing nozzles, dispensing tools and hole cleaning equipment. The Pure110+ is designed for bonding threaded rod and reinforcing bar hardware into drilled holes in concrete and masonry base materials.
Pure110+ has the same bond strength at room temperature and at 110ºF.
General Applications And Uses
• Bonding threaded rod and reinforcing bar into hardened concrete
• Evaluated for installation and use in dry and wet holes, including water filled and underwater
• Can be installed in a wide range of base material temperatures
Features And Benefits
++ Designed for use with threaded rod and reinforcing bar hardware elements
++ Evaluated and recognized for freeze/thaw performance
++ Cartridge design allows for multiple uses using extra mixing nozzles
++ Mixing nozzles proportion adhesive and provide simple delivery method into drilled holes
++ Evaluated and recognized for long term and short term loading (see performance tables)
++ Same bond strength at room temperature and at 110ºF.

Part #	Description
R8310SD	Pure110+ 9 fl. oz. Quik-Shot cartridge (1:1 mix ratio)
R8321SD	Pure110+ 21 fl. oz. dual cartridge (1:1 mix ratio)

PRODUCT DESCRIPTION

The Pure50+ is a two-component adhesive anchoring system. The system includes injection adhesive in plastic cartridges, mixing nozzles, dispensing tools and hole cleaning equipment. The Pure50+ is designed for bonding threaded rod and reinforcing bar hardware into drilled holes in solid concrete base materials. **GENERAL APPLICATIONS AND USES**

- Bonding threaded rod and reinforcing bar into hardened concrete
- Evaluated for installation and use in dry and wet holes
- Can be installed in a wide range of base material temperatures **FEATURES AND BENEFITS**
- Designed for use with threaded rod and reinforcing bar hardware elements
- Evaluated and recognized for freeze/thaw performance
- Cartridge design allows for multiple uses using extra mixing nozzles
- Mixing nozzles proportion adhesive and provide simple delivery method into drilled holes
- Evaluated and recognized for long term and short term loading (see performance tables for applicable temperature ranges)

PowerPatch Kit

PRODUCT DESCRIPTION

PowerPatch™ is a rapid setting, 100% solids, high strength, all-weather spall repair and patching material for concrete. PowerPatch™ uses a unique hybridized epoxy urethane system and an engineered aggregate for superior performance in all conditions.
GENERAL APPLICATIONS AND USES

• Spall repairs and patching on bridge decks
• Traffic area spall, crack repairs and patching
• Freezer floor repairs
• Airport runways, taxiways and aprons
• Patching prior to coating application

FEATURES AND BENEFITS

• Meets FDA requirements
• Open to traffic in 15 to 30 minutes (see cure schedule)
• Fast initial set; rapid gain to ultimate strengths
• Easy 1:1 mix ratio

PowerStick Cartridges

PRODUCT DESCRIPTION

PowerStick is a one-component universal adhesive/sealant based on proprietary MS Polymer chemistry. PowerStick is the first professional grade product on the market that delivers high bond strength and superior flexibility.

PowerStick does not shrink, can be applied on wet surfaces, is virtually odorless and has excellent UV resistance. PowerStick also features high aggressive initial tack, and is nonreactive with the substrate and can be painted after curing.

In short, PowerStick can be used on a variety of substrates, indoors of outdoors and removes the guesswork by having one universal product solution for almost all applications.

PowerStick is non-hazardous, safe for the environment and does not require special shipping procedures. It does not contain solvents, isocyanates and is VOC compliant. Cleaning up is easy with just soap and warm water or mineral spirits.

.300" Head Drive Pins

Drive pins with a .300" head are designed for permanently fastening a fixture to concrete, some types of concrete block, and A36 or A572 structural steel. The pins are formed with a 0.145" diameter shank in various lengths, and a specially designed point to allow proper penetration into typical base materials. Knurled shank designs are available to increase performance in steel base materials. A plastic flute is mounted over the point to retain the drive pin in the fastener guide of the tool providing guidance during the driving operation.

Blue Magic™ pins offer a hard plastic flute for improved centering in the tool and tip protection.

Carbon Steel Snake+ Screw Anchor

Internally Threaded Screw Anchor For Use With Strength Design

The Snake+ anchor is an internally threaded, self-tapping screw anchor designed for performance in cracked and uncracked concrete. Suitable base materials include normal-weight concrete, structural sand-lightweight concrete and concrete over metal deck. The Snake+ screw anchor is installed with a power tool and a Snake+ setting tool. A hammer is not used for installation.

Hollow-Set Dropin with Carbon Steel Cone

The Hollow-Set™ Dropin anchor is designed for anchoring in hollow base materials such as hollow concrete block, brick with weep holes and hollow core pre-cast concrete plank. It can also be used in solid base materials. Hollow masonry materials often have a minimum outer wall thickness of 1-1/2". During the drilling process, spalling on the back side of the wall often decreases the wall thickness available for anchoring to 1" or less. The design of the Hollow-Set™ Dropin overcomes this problem.

Lag Shield Anchors

The Lag Shield™ is a screw style anchor designed for use with lag bolts. It is suitable for use in concrete and the mortar joints of block or brick walls. Lag Shield™ anchors are formed from Zamac alloy. In harder masonry materials, short style Lag Shields are used to reduce drilling time. The long style version is used in soft or weak masonry to better develop strength.

Flat Head Carbon Steel Spike (Tamerproof)

The SPIKE® anchor is a patented, one-piece, tamper-proof vibration resistant anchor for use in concrete, block, brick or stone. Several head styles and anchor materials are available. The SPIKE® anchor is formed with an "s" shaped configuration at the working end of the anchor to create an expansion mechanism. Since the anchor is pre-expanded, there is no secondary tightening operation required which greatly reduces the overall cost of an anchor installation.

R7556	5/8" Wood-Knocker	Red	150
R7558	3/4" Wood-Knocker	Purple	150

Mechanical Screw Anchors
Powers

Blue Perma-Seal Tappers Hex Washer Head

The TAPPER™ Anchoring System is a family of screw anchors, specially designed drill bits and installation tools designed to meet the needs of most light to medium duty applications in concrete, block and brick. The TAPPER™ concrete screw anchor is produced in either hex washer head or Phillips flat head styles from Perma-Seal™ coated or zinc plated carbon steel and Type 304 stainless steel. For heavy duty applications, the 3/8" size is made in zinc plated carbon steel.

Roofing Spikes

For roofing applications, the SPIKE® is a one-piece, vibration resistant anchor available in 3/16" and 1/4" diameters for use in fastening insulation, single-ply membrane, wood, and metal to structural concrete roof decks. This version of the SPIKE® has a Perma-Seal™ coating a proprietary fluoropolymer which meets the corrosion resistance requirements of FMRC Standard 4470. It is designed for use in conjunction with Powers insulation or membrane stress plates.

TEKS Wood-To-Metal Self-Drilling Fasteners

- Teks Drill Point
  - Non walking, cutting edges, pigtail reduction
  - Engages material faster, drills with less effort, safer installation

- Choice of Phillips Wafer head, Flat head, Square Driv flat head
  - Allows installer a choice of drivers
  - No need to switch drives, saves time

- Gray Spex™ Coating
  - Provides excellent corrosion resistance
  - Lasts longer

Fluted Plastic
Powers
Fluted Plastic Anchor (Not packaged with screws)

The Fluted Plastic Anchor is designed for light duty fastening applications with sheet metal or wood screws. Longitudinal ribs on the anchor body prevent it from turning during tightening of the screw. This inexpensive plastic screw anchor comes color-coded by diameter for easy application. The anchor is recommended for light duty static applications where holding power is not a critical factor. It should not be used overhead.

Poly-Toggle
Powers
Poly-Toggle

The Poly-Toggle™ is a screw actuated hollow wall anchor for use in paneling, wallboard and solid masonry available in 6 sizes to match the most common wall thicknesses. In solid base materials, the anchor can be used by removing the outer wings. The performance of this product depends on the integrity of the base material in which it is installed. The anchor is recommended for light duty static application where holding power is not a critical factor.

Wall Anchors
Scru-Lead
Powers

Scru-Lead

The Scru-Lead™ anchor is designed for use with sheet metal or wood screws in concrete, block or brick. The anchor is made entirely of lead alloy which is soft enough for easy installation, yet hard enough to give sure, secure holding power. The performance of this product depends on the integrity of the base material. The anchor is recommended for light duty applications where holding power is not a critical factor. It should not be used overhead.

Wall-Dog
Powers
Wall-Dog Light Duty Anchor

The Wall-Dog™ is an all steel, one piece, threaded fastener, which is used to fasten various fixtures directly to drywall. Wall-Dog™ fasteners are fast. Unlike conventional screw anchors, which require the secondary step of threading a sheet metal screw into an anchor, the Wall-Dog™ is installed directly through the fixture into the drywall.
