CODEMASTER DIGITAL DOOR LOCK

The **ERA Codemaster** has been enhanced with a new anti picking system, reinforced backplate, a metal latchbolt and improved fixing posts.

ERA Codemaster is a fully mechanical push button lock, suitable for regulating access in a variety of commercial, industrial and domestic applications. No keys or wiring required.

The lock is unlocked from the outside only through correct input of the user code and from the inside using an easy turn handle. Codemaster locks automatically on the spring latch bolt when the door is closed.

The security code can be reset in seconds using just a screwdriver, whilst the lock is fixed to the door. For added security, Codemaster has a 'primary key' feature - the first button pressed must be the primary key.

Codemaster is available in a range of colours and finishes.

Rebate sets and door repair plates are available.

• Suitable for door thickness 35-50mm.

ERA electronic multi-point lock

ERA's electronic multi-point lock linked to varying types of access control units, offers straight forward, affordable and convenient options that will enhance security for an extensive range of domestic, community and commercial properties.

Many electronic keeps commonly used with access control units do not provide a high level of security. However, the electronic multi-point lock offered by ERA complies to the relevant security standards PAS23/24 and is Secured by Design for use in composite doors, so high security is guaranteed.

The door can be opened by simple use of the lever handle on the inside of the door or by the innovative ERA Locca system for security at the touch of a button. Additionally, a conventional key can be used to dead lock the door for added security and total peace of mind.

The ERA lock is available for front doors or main entry/exit doors. When the door is closed, dead bolts automatically fire into the door frame keeps, leaving the door in a locked position. No lever is required on the outside of the door, thus removing the need to lift handles and turn keys.

For more complex requirements the ERA security lock can also be incorporated into any conventional Access Control system.

LOCCA CONNECTA

ELECTRIC STRIKE

ERA LOCCA

The ERA Locca provides security at the touch of a button. It comprises of a small unit that is fitted to the inside of the property and plugged into a standard wall socket. The unit is wired to a locking device of your choice which is operated by remote key fob or by the Connecta intercom. One click of the button unlocks the door – it's as simple as that.

The ERA Locca Access is ideal for domestic and small commercial applications. Up to 19 keys can be stored and the unit can be operated by remote key fob from up to 50 metres away.

The ERA Locca Multi is ideal for apartments and other large communal buildings. It offers the same cutting edge technology as the ERA Locca Access but with the added benefits of storing up to 999 keys and with an adjustable range of 1.5 metres to 50 metres.

• No training required
• No computer software to learn
• No electrical expertise required
  (transformer plug included)

There are also two different types of remote key fob, each designed to suit the needs of the user. The SureTouch key fob is a large, yellow on black button which can be worn around the wrist or neck, making it ideal for the elderly and disabled, whilst the Lifestyle key fob is a small, stylish key fob designed to be used on a key ring.

The ERA Locca can be used with ERA's electronic multi-point lock, electric strikes, maglocks and audio / visual phone systems. It is ideally complemented by the ERA Locca Connecta, a stylish wireless intercom which allows you to speak to visitors and unlock the door to let them in, from anywhere in your home or office.
