

indoors

As a nation with increasing flair and passion for interior design in our homes, choices of wall finishes, flooring and furniture usually take priority, with internal doors often an afterthought.

As doors are the beginning and end of a journey through a room and should be considered more as a piece of furniture that forms an integral part of the interior design scheme, our current offering has been created to make a stylish first – and last – impression, no matter which range or model you choose.

With a huge choice of sizes and a stunning array of classical, traditional, contemporary and totally cutting edge designs available, the options are almost limitless.

So without further ado, we invite you to get a handle on our doors.

We're confident you'll find the experience a real eye opener!!

The Supermodels collection comprising three Latin-inspired designs - Barcelona, Madrid and Valencia - capitalises on the increasing consumer trend towards more contemporary interior design and more modern living environments, offering a designer look at an 'off-the-shelf' price.

Each model is currently available in three stunning veneered finishes - white oak, walnut and beech - across five popular sizes.

Over the coming months there'll be more Supermodels emerging from the wings into the spotlight - so make sure you've got your finger on the pulse as to what's "in vogue" in the world of designer doors by regularly visiting www.lpddoors.co.uk/supermodels

Supermodels doors are typically available in the following sizes:

78" x 24"
78" x 27"
78" x 30"
78" x 33"
80" x 32"

For model specific details, please refer to your Authorised Distributor.

Contemporary

As the upsurge in apartment/loft style living continues unabated, we've added to our already hugely popular Contemporary range, with a quite stunning collection of Red Oak, White Oak, Figuera and Jatoba doors that more than live up to the expectations of those favouring a more "contemporary" lifestyle.

Sleek, simple, elegant lines are the signature of the range, allowing the enchanting natural qualities of the carefully selected timbers to really shine. Equally careful consideration has been given to the use of frosted, figured and clear bevelled glass, which beautifully enhances the aesthetics of the glazed models.

Contemporary doors are typically available in the following sizes:

78" x 24"
78" x 27"
78" x 30"
78" x 33"
80" x 32"
2040 x 626mm
2040 x 726mm
2040 x 826mm

Contemporary Walnut

If, as those in the know decree, black is the new grey, then Walnut could definitely be the new Sapele.

Increasingly popular and undoubtedly visually striking, Walnut will bring a refined elegance, sense of sophistication and sheer decadence to any environment which it adorns.

This delectable trio can't fail to stir the soul.

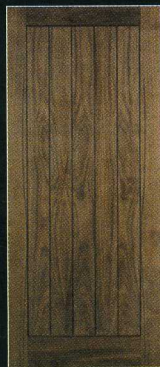

Expect more Walnut doors to emerge over the coming months.

As the old adage states
 "if it isn't broken don't fix it",
 which is precisely why we continue
 to market the Lisbon range without
 the need for change or any level
 of modification.

Our relationship with the
 manufacturers, a long established,
 family run, craftsman based business,
 remains absolutely steadfast, as does
 their innate ability to produce high
 quality pre-finished and unfinished
 White Oak doors, which, in the cases
 of both the Riviera and Kent Six Light
 models, feature clear bevelled glass.

Elegance

Building on the unprecedented popularity and undiminishing demand for this premium range of more classical White Oak door designs, we've continued to work closely with our suppliers to further extend the offering.

In addition to established, tried and tested sellers, notably designs featuring raised and fielded panels and solid Oak bolection beads/mouldings and panels, we've introduced several new glazed options which undoubtedly enhance the aesthetics and quality of the range.

Nostalgia Pitch Pine

A simply styled range with a distinctly nostalgic flavour, absolutely ideal for anyone striving to give their home an authentic period look.

In order to recreate the attractive and highly desirable aesthetics of a by gone era, the range incorporates some traditional craftsmen type construction methods, including mortice & tenon joints in the Pitch Pine versions and extra wide mid and bottom rails.

These integral qualities are beautifully accentuated by the use of fashionable White Oak and Pitch Pine, a distinctive timber boasting a characteristic warmth, that's both enduring and eminently pleasing to the senses.

Glass packs similar to those illustrated are also available.

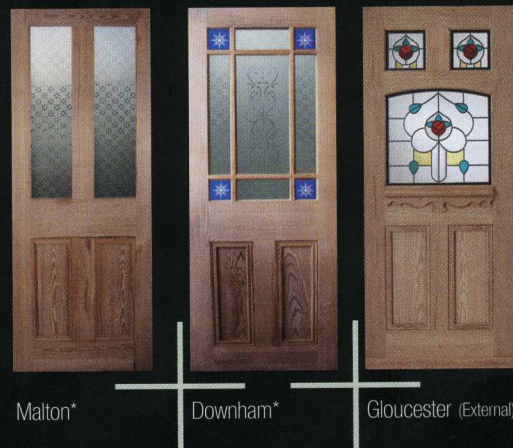

Internal Pitch Pine doors are typically available in the following sizes:

78" x 24"
78" x 27"
78" x 30"
78" x 33"
80" x 32"

External Gloucester is available in the following sizes:

78" x 33"
80" x 32"
82" x 34"
84" x 36"

For model specific details, please refer to your Authorised Distributor.

78" x 30"
78" x 33"

For model specific details, please refer to your Authorised Distributor.

With seemingly timeless appeal, pine just never appears to go out of fashion.

Accordingly we'd like to present our even more extensive range of knotty, semi-clear and clear Elliott's Pine doors, purpose designed to meet more modest budgets but without any obvious compromise on aesthetics or quality.

Alongside many of the "old faithfuls" you also find a few new kids on the block in the form of the two Vertical Grain doors, the solid Croft and Glastonbury and the silkscreen glazed Avon and Weston, which cleverly offer a subtle, more contemporary twist on a principally traditional design theme.

Elliott's Pine doors are typically available in the following sizes:

78" x 24"
78" x 27"
78" x 30"
78" x 33"
80" x 32"
2040 x 626mm
2040 x 726mm
2040 x 826mm

For model specific details, please refer to your Authorised Distributor.

Please note Knotty Pine doors are excluded from the LPD Guarantee

White Moulded

Practical and functional, our white moulded doors are identified by their clean, simple lines making them suited to complementing most interior décor schemes.

The 4 textured moulded models are all supplied factory pre-primed.

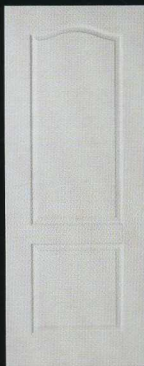

The 2P and 6P Shapeline doors are manufactured with a larger framing device as well as thicker and denser face skins, enhancing overall durability and offering more effective insulation and the superior priming facilitates a higher quality of final finishing.

Even allowing for the fact that these are undeniably budget priced doors, we guarantee you'll be wholly impressed by their quality in comparison to many competitor products on the market.

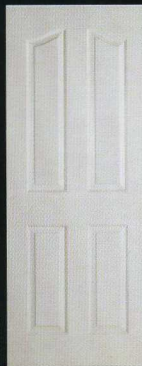

White Moulded doors are typically available in the following sizes:

78" x 18"
78" x 21"
78" x 24"
78" x 27"
78" x 28"

outdoors

There's no getting away from it, fashion even dictates the trends in external doors.

Fully mindful of this, you'll discover that many of our "OUT" doors are indisputably "in doors".

We've endeavoured to bring to the market a range of more contemporary external doors utilising Oak, a timber that remains very much in fashion, to sit alongside our extensive range of Hardwood doors, catering for a variety of tastes and budgets, from the premium quality Oak and Hardwood double glazed models, to the more functional, pocket friendly Sterling range.

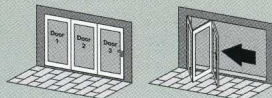

OPENING OPTIONS

Due to its sophisticated design and superior engineering, VUFOLD is fully reversible[†] meaning YOU decide whether left or right opening best suits your needs. No other "off the shelf" system currently on the market affords this complete freedom of choice. All you need to ensure is that you choose which direction you want the doors to open before assembling and installing the frame and then follow the Assembly Instructions for either Left or Right opening – it really is that easy.

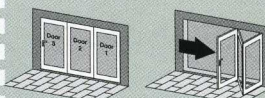

LEFT OPENING

View from outside looking inside

RIGHT OPENING

View from outside looking inside

[†]The VUFOLD doors must always open outwards

Looking for a new perspective on life, then look no further than VUFOLD...

a truly inspired lifestyle concept that ingeniously and cost effectively facilitates bringing the outside into the home and extending the interior to the exterior, instantly creating increased "living" space along with a more salubrious environment in which to both live on a day-to-day basis and entertain.

Representing the ultimate in "modular" premium quality, timber framed folding/sliding doors, VUFOLD is superbly constructed out of highly fashionable White Oak and compares more than favourably to expensive bespoke equivalents in virtually every way.

To cater for the vast majority of requirements VUFOLD is offered in four configurations notably: 6', 8', 10' and 12' wide versions.

These equate to the following outer frame sizes:

- 6' = 1790mm (wide) x 2090mm (high)
- 8' = 2390mm (wide) x 2090mm (high)
- 10' = 2990mm (wide) x 2090mm (high)
- 12' = 3590mm (wide) x 2090mm (high)

OPTIMUM VERSATILITY

Mindful of the need to satisfy typical "daily use" the third door hinges open and closed for easy access, meaning routine everyday chores like letting pets out or hanging out the washing can be done with ease.

PART L COMPLIANCE

On 1st April 2002, new Legislation came into effect, dictating that all replacement windows and doors installed in commercial buildings and private residences have to meet the energy saving requirements of the Building Regulations (Part L).

This move was part of a package of measures introduced to improve energy efficiency.

By incorporating low E glass into the double glazed units, which delivers optimum thermal performance, VUFOLD achieves full Part L compliance and thereby helps to reduce heating bills.

BS6375-1:2004

VUFOLD also meets the criteria laid down in order to satisfy BS6375-1:2004, a universally recognised standard, denoting the performance of windows and doors in terms of weathertightness.

To achieve the prestigious standard, the units were exposed to air permeability, water tightness tests, leak tests and wind resistance and test pressure to almost hurricane levels.

Boasting striking yet understated aesthetics, having been designed to satisfy current legislation in respect of energy saving requirements, these superb, premium quality, Cerejeira external French Doors are, thanks in part to the 24mm low E glass double glazing, fully Part L Compliant.

Outward opening and constructed using traditional craftsmanship, not only are they FSC Certified, but they also provide high levels of security and ultimately peace of mind, courtesy of the integral Association of British Insurers approved 5 point locking system, with keeps, shoot bolts and hinges/hinge bolts.

Available ex-stock with a choice of 2 different styles, both available as right hand opening first, across 3 sizes; 4', 5' and 6', these beautifully crafted doors will bring elegance and individuality to any exterior.

Outer frame sizes

- 4' = 2100mm (high) x 1200mm (wide)
- 5' = 2100mm (high) x 1500mm (wide)
- 6' = 2100mm (high) x 1800mm (wide).

- + Set comprises
 - pair of 54mm Cerejeira doors
 - matching hardwood frame with draught excluder
 - hardware/lock kit
- + Association of British Insurers approved 5 point locking system with keeps, shoot bolts and hinges/hinge bolts
- + Preglazed - 24mm low E glass
- + Fully weather sealed external frame
- + Fully Part L compliant
- + FSC Certified

Adoorable Oak

Historically constructed predominantly from Hardwood by one of the world's leading manufacturers of premium quality doors, in response to changing consumer tastes and growing demand, under the acclaimed Adoorable banner, we've brought to market a superb offering of solid panel and double glazed Oak doors that beautifully complement the extended range of more traditionally styled doubled glazed Hardwood doors.

Fire Resistant Solid Core Door Blanks/Doors

Half Hour Certification

Tested above 30 minutes in accordance with BS476 Part 22: 1987

Global Assessment No. FEA/F01243
Revision B (comprising Tests RF0117, RF02021 & RF03105) refers

Construction

- A superior door blank composed of solid Elliotis Pine or similar lamels, continuous glued for core
- Calibrated for thickness
- Horizontal & vertical rails
- Inner Facings • 3mm cross band ply Elliotis Pine or similar
- Outer Facings • 0.7mm Hardwood veneer
- Lipping – 4 edges
 - 2 vertical combed into the core for extra gluespread and integrity, in matching hardwood as faces
- MDF faced door blanks also available

Other Conforming Leaf Facings

The following facing materials may be used in lieu of that tested provided the thickness remains as tested.

- Chipboard – to BS EN 312-2 or better
- MDF (for extra fine finishes)
– minimum density 650kg/m³

Timber veneers, Formica and plastic laminates up to 2mm thick are also acceptable.

Leaf Configurations

Can be used in single leaves, pairs (equal & unequal) and glazed leaves.

Leaf Size Adjustment

Door leaves to this design can be reduced in height or width without restriction.

Reduction in height must be from the bottom edge only preserving the top rail dimensions.

Lippings must be replaced in accordance with the Fire Certificate.

Glazing

The permitted glazing area for all configurations on this doorset design is 0.84m².

Weight (based on 2057mm x 838mm Doorblanks)

- 44mm – 37.272kg ~ equivalent to 21.62kg/m²
- 54mm – 53.980kg ~ equivalent to 31.37kg/m²

Stock Sizes (mm)

1981 x 762	1981 x 838
2032 x 813	2057 x 838
2135 x 915	2440 x 1220
2040 x 626	2040 x 726
2040 x 826	2040 x 862
2040 x 926	2040 x 1026
2745 x 915	

U Value Test

The Thermal Performance of the 30 Minute Fire Door in accordance with EN ISO 1077-1:2000 is 1.9W/m²K.

Environment

We're committed to a policy of buying all timber from well-managed forest/plantations.

Storage, Handling & Finishing

- Doors must be kept and stored dry and flat
- To avoid warping when the doors are piled up, they must have at least 3 equal bearers
- To avoid absorption of humidity and protect from deterioration, the door has 4 lippings
- Doors must be handled in accordance with the following instructions:
 - Hung with 3 hinges to avoid warping
 - Treatment of cut-outs (e.g. letterboxes, locks, glass apertures)
- All edges must be protected with humidity resistant exterior paint
- Additionally, glass apertures must be sealed with putty or silicone
- Painting
 - Should be done before the door is exposed to the elements
- For best results only use approved paints/treatments and always refer to manufacturers guidelines
- Final finishing can be effected after installation
