VSA 300 – for single surgery use

The Durr VSA 300 S Suction Pump is a fantastic solution for any practice looking for a reliable and robust single surgery suction pump for general dentistry.

With legislation in place stating the need for amalgam separation, the Durr VSA 300 S Suction Pump's fully integrated centrifuge separator is a must.

Durr have cleverly squeezed everything in to the compact VSA 300.

Micro Smart – for single surgery use

The main features of the Micro Smart Catani Single Surgery Suction pump are:

The most effective cyclone amalgam separator available

Advanced technology and a remote keypad enables you to instantly control vacuum and airflow levels at the touch of a button, significantly reducing running costs and noise

Flexible 3 programs to choose from

- 1) Low volume for Orthodontics
- 2) High volume for Conservation procedures
- 3) High power for oral surgery and implantology

Dimensions: L63 W50 H41
(cm)

VT75D– for single surgery use

At the heart of the VT range is our Vee Twin pump unit with one of the lowest noise levels of any oil free compressor available.

Perfect when you demand the highest possible air quality for critical applications

Every model is available with our innovative Air Dryer unit designed to guarantee “desert dry” air. The multi row, fan assisted after-cooler reduces the air temperature prior to entering the dryer.

Low maintenance

AC100 – for single surgery use

The range of Cattani compressors gives you reliability and high performance to achieve clean, dry air all the time.

Their reputation for quality and service is the result of a specialisation in the field of dental air compressors and suction systems that spans over twenty years.

Each unit is rigorously tested and monitored prior to being delivered to your practice to give you ultimate confidence from the day you start using it.
