Tripod Stand

Part No.: 920154

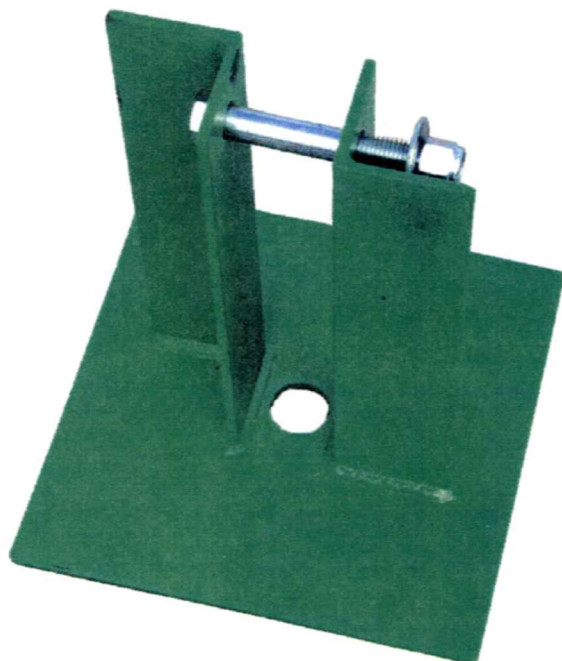

Dimensions: 17wx15wx16w in.

Load Capacity: 1,500 lb.

Weight: 21 lb.

Construction: Steel

Finish: Painted

Description

Practical! A simple, clean and lightweight solution for rigging through roof holes. Examples: core drilled concrete holes, steel grated decks, etc.

Simply insert the tip of the wire rope through the hole and fasten the 3/4" bolt through the thimble. There is a 12" clearance for the swaged fittings or fist grips (from the center of the bolt to the top of the steel plate.) **NO MORE IMPROVISING!**

Strong! Steel construction.
