HFS Alpaca ALL GRAIN 12

- Balance of protein and energy, minerals, and vitamins to meet the requirements of pregnant, lactating and maintenance during periods of adequate pastures
- “Precision Disc Milled” grains for improved digestibility and feed uniformity
- Scientifically formulated using latest findings on nutritional requirements for new world camelids. Feed formulations have been designed based on National Research Council “Nutrient Requirements of Small Ruminants Sheep, Goats, Cervids, and New World Camelids 2007 and the findings ‘Nutrient Requirements of South American Camelids: A factorial approach” Robert J. Van Saun. Department of Veterinary Science, Penn State University, 2005.
- Incorporates Calsea Powder Advance Rumen Buffer, a natural choice for reducing the potential risks of acidosis and to help condition the animal to the introduction of grains into the diet.
- Unlike pellet formulations our whole grain feeds are based on fixed formulas with no byproducts. This means our feeds are always made the same way, from the same ingredients, not made to a price, ensuring a consistent product every time.
- Contains additional flavourings for improved palatability and acceptance.
