All you need to know about the Credit Bearing Short Courses

Whether you are looking at sharpening your skills in certain Forensic areas, or aiming to ultimately obtain a National Certificate, Forensics4Africa//OLM offers various Credit Bearing Short Courses via distance learning to assist in achieving your goal.

Our Credit Bearing Short Courses are focused on improving students’ skills in Forensics and enables them to make informed decisions on what they wish to study next. The Credit Bearing Short Courses are also set out in such a manner that students can work their way towards a National Certificate** over time.

The Credit Bearing Programmes are based on the same learning material used in SAQA registered Unit Standards, making it easy and simple to work towards the completion of SASSETA related qualifications.

Students who wish to complete a National Certificate**, but cannot commit to the full set of modules at once, can enroll for our Credit Bearing Programmes and complete module programmes on their own time and schedule.

### Forensic Investigation Related Short Courses

- **Prog 1:** Investigative Principles
- **Prog 2:** Investigate Corrupt Activities and Interviewing
- **Prog 3:** Prevention and Investigation: Family Violence and Child Protection
- **Prog 4:** Investigative Auditing
- **Prog 5:** Anti-Money Laundering and Crime Intelligence

**Note:** The National Certificate Resolving of Crime** qualification (59989) came to an end and no upgrades or new enrollments are allowed. Current students have until 2020-06-30 to complete their studies. If you previously completed any Resolving of Crime modules, you should consult the admissions officer before enrolling for a Forensic Investigation Short Course to prevent duplication of studies.
