100% water proof vinyl material. Mold and mildew resistant.

designer collection

Our Designer tiles are made from a thick .028" PVC vinyl plastic, so they are waterproof, stain and mildew resistant, and will last for years to come. The material also makes them easy to clean and you won't have the nasty water spots that occur on standard mineral fiber tiles.

Our Designer tiles are manufactured to fit all standard 15/16" - 1" T-Bar Ceiling Systems and many are also able to be installed directly on a ceiling. See each product's description for more details.
