

LEGENDARY PERFORMANCE COMES FROM WITHIN

SOFTWARE SOLUTIONS

In 1984, LABORIE introduced the world to computerized urodynamics. Thirty years later we maintain our unwavering passion to bring the most capable software tools to the market. As the most comprehensive Urodynamics software suite, UDS120™ and i-LIST™ offer a world-class experience including:

USER-FRIENDLY: Intuitive touch-screen central hub, voice guidance and customized remote-control means technology that enhances simplicity.

STREAMLINED: Intelligently manages appointments, previous visits, patient information and test data providing security and efficiency.

DYNAMIC: Our highly customizable user interface and reporting tools (i-LIST™) allow you to run your practice your way.

AQUARIUS® LT

PRACTICAL - DYNAMIC - EFFICIENT

Innovation for Health

AQUARIUS PLATFORM TECHNOLOGY

INTRODUCING AQUARIUS®LT

The Aquarius LT strikes the perfect balance between performance and utility. It excels in everyday Urodynamics and Anorectal Manometry where cost-efficiency and ease-of-use are essential.

The Aquarius LT embodies fundamental Urodynamics.

PRACTICAL: Intuitive touch screen Central Hub puts control at your fingertips.

DYNAMIC: Globally modular platform delivers a new standard of service and expandability.

EFFICIENT: Advanced cable management and customizability minimize clutter while maximizing clinical productivity.

QUALITY, INNOVATION, SERVICE, SATISFACTION

The AQUARIUS is the ultimate expression of our core company values. The development of this revolutionary platform is predicated on exhaustive attention to user feedback, clinical needs and technological advancement.

The industry's first universally modular product suite, the Aquarius platform celebrates LABORIE's commitment to Quality, Innovation, Service and Satisfaction like never before.

THE ANATOMY OF EXCELLENCE

The **Central Hub** provides unparalleled ease-of-use by enabling device management at the touch of a finger.

The fifth generation of **Urocap** has been thoughtfully redesigned for perfect integration within the Aquarius system platform.

The **Pump Module** features state-of-the-art silencing technology, a wide range of flow rates and multiple calibration line storage.

The gold-standard **Spinning Disk** is a highly accurate and reliable artefact-resistant flowmeter with continuous flow-through technology.

The core of the measurement system, the **Roam DX** delivers high fidelity performance in a state-of-the-art package.

Bubble Detection and Infusion Measurement modules heighten precision and procedural efficiency.

The New Aquarius **Uroflow Stand** marks dramatic upgrades in size, quality and usability over any predecessors.

The **UPX Wireless Puller** boasts the industry's smallest footprint and completely wireless battery operation. Available on a stand-alone rolling floor stand or a bracket mounted to the Aquarius system.
