

How To...

Report a Microchip Number on the **paper** Registration Application

This **method** is for those breeders and owners who are sending the **original paper** registration application back down to The Jockey Club, directly or via the CTHS.

*Remember the microchips are not linked to a horse until you indicate that a specific microchip has been implanted.

You will receive your microchip with your registration application kit.

1. Write the year of birth and dams name on the back of the microchip package.
2. Implant the microchip in the horse (either in the “nasal area” or the neck – nuchal ligament).
3. Place a bar code sticker provided in each of these locations (a & b):
 - a. On the front of the Registration Application
 - b. And in the “microchip box” found on the identification markings side of the registration application (the back).
 - i. **If it is a nasal microchip implant**, write “nasal” beside the bar code sticker.
4. To report the microchip number and location to the Canadian Thoroughbred Horse Society (CTHS), National Office:
 - a. Place a bar code sticker on the “Declaration for foals born in Canada”
 - b. Please indicate the location of the microchip implant.
 - c. Mail the Canadian Declaration and associated fees to the National Office.

** Visual Aids can be found on the next two pages.*
