

## Alarm, Security & Tracking Options

Total Vehicle Solutions install high quality vehicle security systems to a variety of different vehicles. All of our products are tried and tested and come with lengthy guarantees.

We have many years' experience in automotive security. We can deal with all aspects of your vehicle security. Whether you're looking to upgrade with a Thatcham approved or a non-Thatcham approved alarm, stolen vehicle tracking, continual tracking or an engine immobiliser - we can cater to all your needs.

### Alarms & Security

We have been installing motorhome security for some of the biggest motorhome dealers in the South West for over 9 years. We have a wealth of experience and know what we're doing. Because of this, we use only the best products available on the market today.

Sigma - The Sigma S Series is designed to work independently as a full remote control system linked to the

vehicle's central door locking, or to interface with the manufacturer's pre-installed remote locking system. All models are manufactured to the highest European certification standards, including Thatcham approval for the appropriate insurance-approved systems. Vehicle Security with built-in intelligence.

### Stolen Vehicle & Continual Tracking

ScorpionTrack actively protects your vehicle against illegal movement using GPS technology along with movement detection sensors hidden within the vehicle. Upon Illegal movement detection ScorpionTrack will discretely notify our international control centre of a possible theft.

ScorpionTrack is able to provide, speed, direction, ignition state, battery condition and location details to the Police control room in the event of a theft. Subject to environmental variables, ScorpionTrack is accurate to within 10 metres.

This information is gained using the very latest in UK designed and manufactured electronics along with the already proven GPS and GSM technologies.

### Thatcham 2-1 Upgrade Alarms

Brand	Product Code	Image	Description
	<b>Sigma S34</b> Thatcham Category 2-1 Upgrade Alarm		Thatcham Category 2-1 Upgrade Alarm with new radio keys, immobiliser, perimeter and ultrasonic interior protection. Additional rear door & locker protection available. Can be integrated with ScorpionTrack tracking products.

## ScorpionTrack – Vehicle Tracking Options

ScorpionTrack, ScorpionTrack 5 and ScorpionTrack Fleet with Monitoring have been subjected to the rigorous Thatcham test requirements to meet their TQA level in vehicle tracking system approval. This will cater for any insurance company TQA tracking system requirement.

Upon recovery, the ScorpionTrack operator can arrange for the return of the vehicle to the customers desired location.\* Scorpion Automotive are not liable for any costs incurred for recovery

### Enhanced product features for your peace of mind

Key theft is a growing problem in the UK and across Europe and our Scorpion Track 5 product is there when your vehicle is most vulnerable. The system is an advanced GPS tracking unit enhanced with the facility to remotely prevent the vehicle from being driven but, more importantly, alert our Secure Operating Centre in the event that the vehicle is taken following a key theft.

The unit is complemented by two piano-black driver recognition cards. These are discreet and rechargeable and should the vehicle be moved without one of these

cards being present, the ScorpionTrack 5 unit will send an alert to our secure operating centre who, in turn, will contact you to confirm whether or not a theft has taken place.

ScorpionTrack and ScorpionTrack 5 also have web location on demand via your PC, table or smart phone. There's no need to download a specific App - the ScorpionTrack personal log-in has been optimised for browsing via a mobile device. Know where your vehicle is at anytime from anywhere in the world.
