M- Pulse Infrared Sauna Information.

Choose the most effective wavelength for your needs

· **Far-infrared** (FIR) for detoxification (core temp increase), blood pressure and cholesterol reduction & relaxation.

· **Mid-infrared** (MIR) for weight loss, pain relief & improved circulation (passive cardio workout);

· **Near-infrared** (NIR) predominant wavelength for cell health, complexion, wound healing & skin purification;

No other sauna brand has this technology!

Six pre-set programs are controlled from a 25cm Android touch-screen inside the mPulse sauna

Targeting skin health, pain relief, detoxification, weight loss, cardio health and relaxation.

Scientifically proven and clinically trialed Sunlighten's clinical grade saunas are fitted with patented Solocarbon® heating technology unique to Sunlighten, independently tested and proven to emit a consistent perfect delivery of Far-Infrared wavelengths.

Clinically proven to raise the body core temperature by 3^0F.

No other sauna brand can match this technology

Heat therapy of choice for Doctors, Wellness Professionals, Clinics, Beauty Salons, Athletes and thousands of individuals worldwide.

Infrared therapy benefits

Sunlighten's patented infrared technology is 'clinically proven' to lower blood pressure and cholesterol levels.

Regular infrared therapy will increase circulation, eliminate toxins and heavy metals, reduce inflammation (pain relief)

and burn calories plus many other health benefits.

Effective for recovery after workout

Soothes and softens muscles, burns lactic acids and reduces inflammation for faster recovery from exercise and injury.

Detoxification and weight loss, how do we compare?

In a traditional sauna approx. 3% of your sweat will contain toxins and you will burn NO calories.

With Solocarbon® Far-infrared, 20% of your sweat will contain toxins AND you can burn approx. 300-500 calories!
