Thibaudneau, Baskin Farms saved from development

Cumbersand / Lincoln

By MARIA GREEN

Limerock Preserve

The Conservancy's 26-acre extension of the

Englefield property, also closed

Nature Conservancy

Preserve near Wake Robin

Conservancy's Limerock

26-acre extension of the

buy the Ethel Austin property

also in Lincoln. The Nature

Conservancy won $127,500 to

close the purchase. This is 17

acres of Baskin Farm on

land adjacent to the preserve.

In Lincoln, $400,000 was

raised from the community to

purchase the land.

Valley Breeze Edition

by Willard Baskin

sold separately by William

Baskin.

The Conservancy plans to

buy the Ethel Austin property

in Lincoln.

$127,500 to buy more land

in Lincoln.

The sale also saved

Thibaudneau Farm on River

Road. The purchase is slated for

open space for the town.

The state, above is

open space surrounding the

farm will be purchased with

the purchase.

The Basin Farm preserve is a 5-year-old plan to develop more than 400 acres of open space. The farm will feature a mix of residential and commercial development, with the preservation of rural and agricultural land. The farm will also include a new community center, open space, and a mix of residential and commercial development.

The farm will be located in a valley close to the Blackstone River and will offer beautiful views of the surrounding landscape. The farm will also feature a dairy farm, which will provide fresh, locally-produced milk and cheese.

The farm is being developed by a local developer, who has a long history of working with local communities to create sustainable, mixed-use developments. The farm will feature a mix of residential, commercial, and agricultural land, with the goal of creating a vibrant, sustainable community.

The farm will also feature a new community center that will provide a variety of community spaces, including a community hall, a library, and a café. The community center will be designed to be energy-efficient and will feature sustainable construction practices.

The Basin Farm preserve is a unique opportunity to create a sustainable, mixed-use community that will provide a range of amenities to local residents. The farm will be a model for sustainable development, and will set a new standard for how we approach land development in the future.
