

Air Conditioners & Evaporator Coils with R-410A Refrigerant

Right for You

How can we say that Payne knows what's right for you? The answer is experience. D.W. Payne and sons started making the right products for their west coast customers back in 1914. Since that time, we've expanded nationwide with a brand that provides attractive, affordable products that work. These same principles apply to our family of air conditioners and evaporator coils with R-410A refrigerant. Because this environmentally sound lineup of cooling equipment carries the Payne name, you can be sure it's the right product at the right price, right for you.

Efficient, Environmentally Sound

Comfort is important to all of us. After all, who doesn't enjoy the refreshing feel of an air conditioned home on a scorching summer day? That's why Payne offers a complete family of affordable central air conditioners.

If your concern over environmental issues is on equal footing with your desire to be comfortable at home, we offer two air conditioners with chlorine-free, R-410A refrigerant - the PA13NA and PA16NA. Attractive, designed for minimal effect on the Earth's ozone layer and built to last, these are two smooth-running, energy-saving cooling machines.

The PA16NA offers our highest efficiency, 16 SEER (Seasonal Energy Efficiency Ratio). Like miles-per-gallon for a car, SEER ratings allow consumers to compare energy efficiency of air conditioners - the higher the SEER, the better the efficiency. This model also features our deluxe dense grille for greater protection of the unit's outside coil.

The PA13NA delivers comfort with 13 SEER cooling efficiency. It's equipped with our standard grille for attractive, durable coil protection.

No matter which model you choose, you'll enjoy the comfort of your home undisturbed from the first time you turn it on, because Payne air conditioners operate so quietly. And, you can expect comfort and savings to continue for years because Payne products are designed, built and tested for long lasting operation.

Let Payne Complete Your Comfort

You may not realize this, but central air conditioners are two-part systems. There's an outdoor unit that most are familiar with, and there's an indoor component that includes a cooling coil and a fan or blower. Payne always recommends replacing the indoor coil when purchasing a new air conditioner because most likely, it is as old as the outdoor unit you are replacing. Replacing the indoor coil will ensure the best comfort, the best efficiency and the best reliability in addition to covering your entire system with new product warranties.

Payne is the Right Choice

Payne offers the right products at the right price, offering dependable, comfortable and efficient cooling summer after summer. So make the decision easy on yourself - choose Payne. When you do, you're choosing a long-standing history of indoor comfort products that are just right for you.

Dense Grille

For improved protection, the dense grille is available on the PA13NA and is standard on the PA16NA models.

What You Get With Payne

- 1 Long-Lasting Fan Motor**
Our high-efficiency fan motor contributes to your comfort by braving the summer's heat for years of durable operation.
- 2 Neighbor-Friendly Design**
Your neighbors will appreciate the quiet operation, thanks in part to our specially designed fan blades. Our exclusive design improves economy and reduces noise associated with turbulent air movement.
- 3 Attractive Finish**
The PA13NA and PA16NA look good today, and will continue to look good for years. The painted finish is durable and corrosion-resistant to help maintain unit integrity.
- 4 Built-to-Last R-410A Compressor**
Count on years of cooling comfort because the most important component of the entire unit, the compressor, operates quietly and reliably with built-in protective features.
- 5 Smooth, Quiet Operation**
Rubberized isolation pads create a buffer between the base pan and the compressor to minimize noise from vibrations.

Environmentally Sound

The Models PA13NA and PA16NA incorporate the EPA-approved and industry accepted R-410A refrigerant, the environmentally sound alternative to R-22.

Low Maintenance

Cleaning or changing the indoor filter regularly will greatly reduce the need for required maintenance of the system.

Enhanced Air Conditioning Performance with Payne Indoor Coils.

An air conditioning system consists of more than the unit that sits out in your flower bed. It includes an indoor section that is vital to cooling performance. Your Payne dealer will determine which of these R-410A indoor coils will best suit the air conditioner you have selected.

Install Now, Pay Later with Payne Financing

If you're like many people, your need for comfort doesn't always match your immediate ability to pay for it. So Payne makes your life easier with 6 or 12 months of deferred interest, minimum monthly payment financing. If you pay it off within the promotional period, you pay no interest. Or, spread your payments over time with a reasonable finance charge. Either way, you can enjoy comfort now, when you need it. Credit provided by GE Money.
