At Racking + Shelving Ltd, quality and service are more than just words – they are what we believe in and how we do business. Our mission is to design intelligent storage solutions for your unique requirements and in doing so we can increase your storage capacity and help you to best utilise your space as well as increasing your business efficiency and effectiveness in day to day operations.

We are proud to be accredited with SafeContractor, showing our dedication to promote higher standards of competence and compliance to health & safety.

Have your racking inspected by our own SEMA Approved Rack Inspector, Paul Redford.

Our installers are SEIRS approved.

**RSL SERVICES**

At RSL we pride ourselves in providing you with a full professional service package including consultation, design, quotation, delivery/customer collection, installation, dismantling/relocation, rack safety inspections and maintenance/service contracts.

**CONSULTATION**

RSL are dedicated to advising and designing storage and manual handling solutions that make your business function more productively.

**DESIGN**

RSL offers a free design service, using the latest software our qualified CAD Designer will provide a comprehensive Computer Aided Design (CAD) layout and elevation of your storage area.

**DELIVERY & CUSTOMER COLLECTIONS**

RSL stock many racking and shelving components in our warehouse which can be available for speedy delivery or collection by prior arrangement.

**INSTALLATION**

RSL’s installation teams are fully qualified and are highly experienced in their particular field, with a proven track record of successful projects.

**RACK INSPECTIONS & REPAIRS**

RSL can provide a detailed rack inspection report highlighting areas of damage and repairs that need to be carried out, including a quote for RSL to do the repair work.

*It is recommended that a full rack inspection be carried out at least every 12 months*

**SERVICE & MAINTENANCE CONTRACTS**

RSL offer a service and maintenance contract, which would enable us to periodically check your storage structures and equipment as a pro-active way to keep your warehouse in top condition.

AR Beam with Mesh Deck

* Frame loading capacities: All loading capacities must be confirmed with RSL at the time of order. Other sizes available, contact our sales office for details.
Over the past 15 years at Racking + Shelving Ltd. we have installed Pallet Racking in various different sizes of buildings from storage sheds to large warehouses, from single runs to large multi-tiered fit outs.

If you would like to see one of our large projects for yourself, should it be Pallet Racking or any of our other products, we would be happy to arrange a visit to one of our completed installations.

To maximise the storage potential of your space contact one of our sales team for a **FREE onsite survey**

**Do you need a racking inspection carried out?**

Call us and we can arrange an inspection from a fully qualified Sema Rack Inspector today and we can complete the repairs!
## Accessories

PALLET RACKING

Anti-Collapse System:
- Prevents goods from falling on pedestrians
- Fully welded mesh and steel frames
- Mounted using stand-off brackets
- Panels from 1100mm to 2200mm wide
- With a height of 700mm or 1500mm
- Grey in colour as standard (Galvanised panels available on request)

Racking Protection:
- Column Guards
- Rack End Barriers
- End Frame Protectors
- Usually installed in front of exposed uprights that are liable to forklift truck collisions

Rack Armour

Rack End Barriers:

Plastic Upright Protectors:
- These boltless protectors are mounted directly onto the upright not the floor slab, this prevents damage to the concrete
**Pallet Racking**

**Drive-In**
Most suitable for:
- High Density Storage
- FILO (First In Last Out)
- More suited for longer term storage

**VNA** *(Very Narrow Aisle)*
- Narrow Aisles
- High Rise Storage
- Immediate Access to Pallets

**Pushback**
- FILO (First in Last Out)
- Cart System
- Roller Bed
- High Density
- Cost Effective

**Pallet Live**
- FIFO (First in First Out)
- High Density
- Full Roller/Twin + Triple Track
CANTILEVER RACKING

- Commonly used for storing long products such as timber and steel
- Ideal for the vehicle salvage industry
- Allows products to be stored over various levels which enables easier product selection
- Clear access for loading and unloading by fork lift truck or side loader
- Standard system up to 10m high
- Max loading of 2000kg (UDL) per arm
- Easily converted to double sided
- Supplied fully galvanised for outdoor use
- Rack clad building available

For our full range of products visit www.rslni.com
Heavy Duty Longspan Shelving

The perfect solution for manually storing products of medium size and weight. The resistance, versatility and simple assembly of our longspan range allows this system to respond efficiently to the storage needs of workshops, archives, industrial stores and general warehousing.

MOBILE SHELVING

Mobile Shelving Systems offer a flexible and highly effective solution, which can more than double the storage capacity of conventional static shelving or simply free up valuable floor space.

Mobile Shelving is suitable for office, commercial and industrial applications, for general storage and filing systems, in areas such as:

- Document storage
- Library storage
- Magnetic tape storage
- Parts storage
- Medical records
- Archive filing
- Security vaults
- Art storage

MISTRAL SHELVING

Mistral Shelving is a sturdy and robust yet stylish system which offers a wide range of accessories making it a very flexible system to suit all your storage needs, it is ideally suited for archive, general office storage and small parts storage.

Accessories

Commercial Shelf, Pull Out Shelf, Pull Out Cradle, Lateral Rail, Dividers, Door Sets

STABIL (Budget Range)

- Boltless system - comes flat packed
- Load Capacity up to 175kg per shelf
- 5 No. shelf levels
- Recommend 2 person installation

Typical bay size:

2000mm (h) x 1000mm (w) x 500mm (d)

Note: These products are made to measure, please speak to our sales team for more information.
Tegometall is an extremely versatile brand of modular shelving. It is so flexible it can be designed to suit any retail space and is ideal for supermarkets, convenience and hardware stores, off-licences and garden centres to name a few.

Tegometall’s quality design is so strong and durable it can bear weight loads similar to warehouse racking, so you can rest assured it is capable of supporting anything you want to display.

The units can be easily extended so as your business grows the units can be expanded to suit.

SELF STORAGE UNITS

Do you have unused space in your warehouse and are trying to think of ways to generate some extra revenue?

Why not create a Self Storage Centre?
Interested? Call us! We can design, plan and install Self Storage Units in even the most unorthodox spaces.
LABELLING & IDENTIFICATION SOLUTIONS

MAGNETIC EASY-WIPE RACKING STRIP
Provides a fast and effective updating system for identifying product codes and stock level information.

NUMBERS & LETTERS
Magnetic characters are printed black on yellow or white delivering high visibility identification.
Self-Adhesive strips also available.

TICKET HOLDER
Clear plastic holders with flexible pull-forward fronts allow easy loading for updating information. Barcodes can be scanned without removing the insert.

BAY & AISLE MARKERS
High-visibility bay and aisle markers offer clear identification throughout the warehouse. The bay markers feature a formed aluminium section with either magnetic or self-adhesive edges.

WEIGHT LOAD NOTICES
Conform to the latest Health and Safety recommendations by properly identifying safety weight and correct loading procedures for your racking and shelving.

FLOOR MARKING TAPE
Ideal for short and medium term marking. Sizes are 50mm and 75mm widths x 33mm long. Available in five bold safety colours and also three diagonally striped hazard warning colours.

</table>
Mezzanine floors can be used for a variety of purposes including retail, storage, offices, production areas, canteens/staff rooms, plant support and more.

- Floors are fully demountable and easily relocated
- Floors can be erected in single, double or triple tier
- Can expand production capacity and improve operating efficiency

Mezzanine floors provide businesses with the opportunity to maximise unused space and allow your business to expand within the premises, helping companies to save money and increase profitability. We can provide advice regarding Building Regulations.

We offer a range of ancillary components and services to complement your mezzanine floor, such as:

**Staircases and Balustrading**
All our staircases are powder coated to give a highly durable finish with excellent gloss retention. We offer a wide range of colours to enhance your new mezzanine in line with corporate colour schemes.

**Handrails**
Our standard industrial edge-protection system provides a functional and neat solution that integrates both the handrail and toe plate into the handrail post. Mesh panels can be added to prevent small items from falling off the floor. We also offer attractive feature handrails, which are ideally suited to retail and office environments, or any environment where a modern and aesthetically pleasing look is required.
**Pallet Gates**

Designed to protect personnel at exposed opening points at the floor edge, safety gates can have a light-weight, fail-safe roll-over operation. They can accommodate standard sized pallets and require virtually no maintenance.

**Fire Protection**

Fire rating your Mezzanine floor or incorporating fire protection into your office design is governed by Building Regulations, and is based upon a number of factors. RSL will advise whether fire protection is required and to what extent.

**Fire Protection includes**: suspended ceilings, column casings, cavity barriers, bulkheads / fascias, staircase enclosures, fire walls, smoke detection systems.

**Typical Loading Capacities**

**Hazardous**

All hazardous cabinets come with YELLOW doors and SILVER carcass. COSHH regulations demand the safe storage of hazardous items. These cabinets isolate flammable materials and vapours from potential sources of ignition and clearly identify hazardous products in case of a fire.

For the full range please visit [www.rslni.com](http://www.rslni.com)

Please check with our sales team for information on delivery.

K – Bins
Flat pack cardboard parts bins. Available in a wide range of widths and capacities, these versatile bins can be quickly assembled when needed and dismantled when no longer required. This makes them an ideal choice for coping with busier periods or with seasonal demand.

- Flat pack cardboard bins
- Low cost parts storage
- Self-locking tabs
- Assemble and dismantle in seconds
- Write-on label area
- Requires no glue, staples or tape

Wire Storage Baskets
- A tough and durable basket constructed from welded steel with plastic coating to prevent corrosion.
- The baskets stack on top of one another.
- Baskets are snag free.

These baskets are ideal for the following environments:
- Builders’ Merchants
- Retail

Small Basket size: 352mm (h) x 995mm (w) x 385mm (d)
Large Basket size: 490mm (h) x 995mm (w) x 575mm (d)

Here are some of the nice things our customers had to say about us:

**Excellent Service and Product.** I purchased shelving from this company after a lot of research on the internet and communications with several companies. I wanted something strong and secure for my Nursery school as storage is always a problem having such a large selection of resources. I discussed my requirements with Terry who advised me which product was best. Delivery was quick and the fitters arrived the following week to install the shelving. The shelving was constructed in no time and was of excellent quality. Terry rang me the following day to ensure I was happy with the service. I would recommend this company to anyone who wishes to deal with a reliable and professional company that has a wide range of versatile products.”.

**Mary: Head Mistress, Bligh Nursery School**

I would like to thank you for your participation and support of our warehouse-racking project in Belfast Ireland. We are a US based company with limited knowledge of the Belfast region. RSL was able to give us peace of mind, allowing us to leave this project in the hands of a professional, caring vendor. You met our deadline and exceeded our expectations in your commitment to our needs. You provided a great product and an even better service.

**Marilyn: Head of Operations, Logistics Company, Worldwide**

Can I thank you very much for your attention to detail from start to finish on this project from the initial site visit to the final installation. The level of communication and attention to detail for me has been outstanding and I would fully recommend your services to anyone that is looking for Racking. Please feel free to use us as a reference site if you ever need to.

All in all a great price and product and cracking service, would not hesitate to use you again for any of our depots.

**Nigel: Operations Director, Distribution Company, UK and Ireland**

For the past 10 years Racking + Shelving have supplied us storage products from small parts shelving to pallet racking. We use Racking + Shelving as we know we can rely on them to supply a very competitive price, the highest standard of service and the best advice to utilise our space going forward. Would highly recommend RSL to anyone looking such products.

**Mark: Operation Manager, a multi-national Clinical Development Company**
