Create a 'Review Us' page in your app

url/apps

Google, Google and more Google

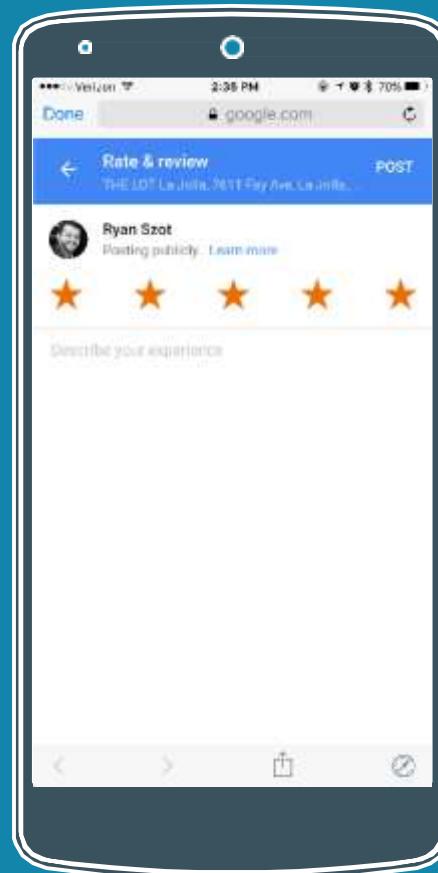

Get the Google review page post dialog to load directly, with 5 stars already selected!

Follow Google's steps [here](#) to create your businesses direct review URL.

You will end up getting a URL like [this](#).

Load this address in your browser to get a URL like [this](#).

Now add a '3' to the end of the URL like [this](#).
This will pre populate the review post with 5 stars!

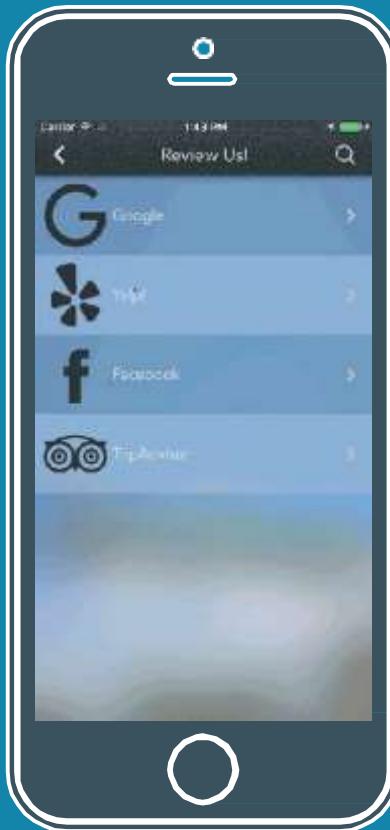

Use the 'Best of Both Worlds' website option

Available only on iOS

The website will load in a hybrid Safari browser

The users login session will be maintained to remove a huge step in friction.

This means app users can be sent straight to the review page

Ask for feedback on receipts!

When are your customers the happiest?
When they use your product/service of course!

Add your review sites to your customers receipts.
These can be links, QR codes or just simple text.

Asking politely for honest feedback is a great way
to get business reviews!
