

## WHY WYOMING AIR?

### Get hassle-free maintenance from our team

Most families spend more than half of their energy costs on heating and cooling. Your energy costs shoot up even higher when equipment isn't working properly, and you'll have to replace the equipment sooner if the problem isn't fixed. Routine maintenance from our Wyoming, Ohio-based business will prolong the life of your equipment. Choose from several different maintenance agreements to keep your units working at maximum efficiency and save money!

### Don't wait around for service

One of the most frustrating parts of home or business ownership is when your equipment needs maintenance or repairs, and you have to wait for service.

With us, you'll always get the service you need on time and according to schedule.

- ▶ **5% off** equipment replacement
- ▶ **Priority service** (within 24 hours)

## WHY DO YOU NEED A SERVICE PLAN?

- ▶ **Increase energy efficiency.**  
Cooling and heating your home uses more energy than any other system in the home. By using a few inexpensive energy-efficient measures, we can help you reduce your energy bills by 5% to 25%.
- ▶ **Help prevent mechanical failure.**  
Regular maintenance allows us to catch the little things before they cause larger problems. This will not only save you money, but allow us to give you an accurate expectation on the remaining life of the system.
- ▶ **Improve comfort conditions.**  
Seasonal tune-ups allow us to ensure your heating and cooling system is running properly before extreme temperatures hit.
- ▶ **Maintain your warranties.**  
A system's manufacturer warranty is typically void if the system has not been inspected at least once a year.
