

“I’m excited to see where my future takes me next.”

“When I was faced with the reality that my job would be ending, I had to face some serious challenges.

I had never completed high school. I knew my options would be limited because of my age and the fact that I didn’t have a diploma.

My high school years were interrupted by my mother’s death. Our family lost its way for a while, and I left school to find work.

Over the years, jobs were plentiful, and I was lucky to enjoy some great work opportunities.

Now, faced with an uncertain future, I contacted Georgian College Midland campus to find out about their GED program.

With the support of the staff, instructors, and my family, I juggled work, school, home, and everything else.

Five months later, I wrote my GED exam and was successful. I am currently involved in a job search and excited to see where my future takes me next.”
