# ASC winter plan : admission from hospital

Where a person is discharged from hospital into a care home, they will continue to be tested prior to discharge. Results should be communicated to the receiving care home. No care home should be forced to admit an existing or new resident to the care home if they are unable to cope with the impact of the person's COVID-19 illness safely. Local authorities remain responsible for providing alternative accommodation in local systems.

We are working up a designation scheme with CQC for premises that are safe for people leaving hospital who have tested positive for COVID-19 or are awaiting a test result.

# Visitors

## Providers should:

- Set out the precautions that will be taken to prevent infection during visits and ensure these are communicated in a clear and accessible way;
- Ensure the appropriate PPE is always worn and used correctly – which in this situation is an appropriate form of protective face covering (this may include a surgical face mask where specific care needs align to close contact care) and good hand hygiene for all visitors;
- Limit visitors to a single constant visitor wherever possible, with an absolute maximum of two constant visitors per resident to limit risk of disease transmission;
- Supervise visitors at all times to ensure that social distancing and infection prevention and control measures are adhered to;

# Upcoming speakers

---

**Wednesday 14<sup>th</sup> October**

**Cllr Helen Holland & Hugh Evans**

*Bristol City Council*

**Catherine Twine-Kelly**

*Provider*

**Jake Ronaldson**

*BCE Apprenticeships & Training*

**Dr Bruce Laurence**
