ELEMENTARY MONTESSORI BOTANY ALBUM

Table of contents

SIMPLE KNOWLEDGE ABOUT PLANTS

The needs of plants

Experiments

THE LEAF

Parts of the leaf

Functions of the leaf

Chlorophyll

Attachment of leaves on the plant

Distribution of leaves on the stem of the plant

Evaporation / transpiration of the leaf

Types of leaves

Shapes of leaves

Margins of leaves

Leaf Activities

STEM

Main function of the stem

Types of stems

Parts and attachments of the stem

Placement of the buds

Parts of the woody stem

Water circulation

Bulbs

Aerial stems

Erect stems

Climbing stems

ROOTS

Main function of the root

Parts of the root

Root types

Varieties of wooden tap roots

Physiology of plants

Experiments

Collaboration between tap roots and leaves

SEED

Main function of the seed

Kinds of seeds

Monocotyledon

Dicotyledon

Seed dispersal

FLOWER

Main function of the flower

Parts of the flower

Flower symmetry

Arrangement of flowers

Colour of the calyx

Types of calyx

Types of corolla

Place of the ovary in the flower

Syngensis

FRUIT

Main function of the fruit

Parts of the fruit

Kinds of fruits

Types of fruits

Kinds of succulent fruits

Types of dry fruits

Types of dehiscent dry fruits

Types of indehiscent dry fruits
