

LIQUID FLOCCULANT MAKE-UP SYSTEMS

EFFECT Engineering Projects

Effective Engineering Solutions

www.effect-eng.com

DESCRIPTION: Liquid Flocculant Make-up Systems

INDUSTRY: Coal, Paper, Water Treatment, Mining, Alumina

APPLICATION: Where there is a need for flocculant make-up and dosing.

OPTIONS: These are offered in plastic, stainless steel or mild steel to suit the environment of operation. Systems are sized to meet client application

FEATURES: EFFECT manufacture systems either in part or in full allowing modules to be retrofitted at a later date. Systems are available with self-contained PLC controls or remote controlled. They can be offered with or without self contained water pumps which overcome potential site supply problems. Support frames are elevated on the pump assemblies to allow ease of cleaning and are ideal for heavy industry unprotected areas
