Team Sports
UNIT 2

What policy should your school follow about team sports?

Teacher’s Guide
Notes on using Triple Q materials

Welcome to Triple Q! The following pages detail substantive information about the content of Triple Q and the flow of the lessons. These notes are to provide some detail about the formatting of the materials.

Printing and assembling materials

** Both Student and Teacher materials are meant to be printed 2-sided. **

The Student materials were designed as a notebook binder for each student, organized as sets of materials behind tabs. In our various tryouts with the materials, this seemed the most usable arrangement, because many of the materials are used in several lessons – so simply having pages ordered according to lessons did not work well.

A tab page in the Student notebook marks each set of materials. For example, there is a tab for texts, for worksheets, for essay planning. Each tab page has a highly visible border on the right-hand side, to make it easier to locate activity sheets in each set. You could also have students place post-it flags on the tab pages to make them stand out more.

Many of the pages in the Student Notebook need to be pulled out for students to work on, so the best ways for bundling the packets are with a large clip or punching a hole in the left corner and using a large binder ring.

There are some items used in the program that are not included in the materials here.

- Several large charts and argument maps need to be created. We used chart paper and large post-it notes to create them in our work. Small versions of these charts appear in the Teacher Guide, so you will be well prepared about their contents.
- We also provided students with small post-it notes in several lessons, as described in the Teacher Guide Overview. Of course simple slips of paper can suffice here.
- We provided students with “response slips” for text discussion lessons and in Lesson 6 for writing claims. These were simply strips of blank paper for recording quick responses.
Related Resources

Triple Q is based on three types of queries, as described in the Teacher Guide Introduction. These were drawn from elements in our prior research. A sampling of publications about that work is below, should you like further information.

References and Acknowledgements

We would appreciate the inclusion of the following citation should you need a reference for our Triple Q work for proposals and internal or external documentation:

Introduction to Unit 2

Project Overview

This is the second of three units developed by the Triple Q project. In each unit, students engage in content-focused discussions of model argument texts, examine the features and quality of the arguments in the texts, complete Quickwrites in response to the texts, and write their own argument essay supported by evidence from the model texts. The approach to questioning and discussion in these units is called Questioning the Author. Triple Q refers to the three types of queries that guide discussions and support students as they plan, draft, and revise their argument essays. Gist queries help students develop deep-level comprehension of a text. Argument queries help them identify and evaluate argument elements. Language Choice queries help them examine how authors use specific words to influence the reader’s reaction.

Unit Overview

The title of this unit is Team Sports. As in the first unit, there are two model argument texts and an Assorted Evidence table. The first text argues that team sports help young people build good character. The second text argues against that idea, and the table provides additional evidence about the topic. The writing prompt for the final essay is: What policy should your school follow about team sports? The essay requirements are the same as in Unit 1 except that students are also required to include a counter-reason and rebuttal.

The sequence of 15 lessons is very similar to Unit 1. In Lessons 1 through 5, students read and discuss the PRO and CON texts, create an argument map for each text, and identify evidence in the Assorted Evidence table that supports their own position. As in Unit 1, most of these lessons include quickwrites in which students respond to one or both texts. Students begin planning their essay in Lesson 6. They work on their claim in Lessons 6 and 7 and build their outline in Lessons 8 and 9. In Lesson 10, they examine and then practice using the language of explanation to build connections within an argument. Students write their rough draft in Lessons 11 through 13 and their final essay in Lessons 14 and 15.

Unit 1 focused primarily on argument structure. The unit included a number of introductory activities that used familiar examples to help students understand the structural elements of an argument, including claim, reasons, evidence, counter-reason, and rebuttal. Unit 2 continues this focus on structure, but adds a focus on building coherence by making explicit connections between elements. Students learn that everything in an argument essay ultimately connects back to the claim, and they are encouraged to identify and describe connections throughout the unit.

The other major difference between Units 1 and 2 is that Unit 2 provides increased opportunities for students to engage in oral argument. For example, in Lesson 9, one student presents their claim and a reason. Another student generates a counter-reason to challenge the argument. The first student can then provide a rebuttal or call on a friend to provide one.

Lesson 1 – Discussion of *Team Sports Build Character* (PRO Text)

**Bird’s Eye View**

**Introducing the Unit (Part 1) – 5 minutes**
This lesson begins with a brief review of the concept of argument and a quick overview of the unit.

**Text Discussion (Part 2) – 25 minutes**
Each portion of text is then read aloud and discussed using Questioning the Author gist queries.

**Quickwrite (Part 3) – 10 minutes**
Students then write about whether they agree or disagree with the author and why.

**Part 1 – Introducing the Unit**
Have students turn to Unit 2 in their binders.

Review argument concepts:
Uncover each definition as you review:

- *What is an argument?*
- *What is a claim?*
- *What are reasons?*
- *What is evidence?*
- *What is a counter-reason?*
- *What is a rebuttal?*

---

**Definitions Chart**

Post this chart before class with the definitions covered. Uncover them as you review.

**An argument** is a statement and reasons given to convince others about something you believe.

**The claim** is a statement of an argument's big idea.  
"**What you believe**"

**Reasons** explain why you believe the claim.  
"**Why you believe it**"

**Evidence** is information that shows your reason is true.  
"**How you know**"

A **counter-reason** is a reason someone might use against your argument.

A **rebuttal** answers the counter-reason with evidence for your side.
Describe unit:

_Over the next couple of weeks we’ll be working together around a topic called “Team Sports.” We’ll read and discuss some argument texts, and we’ll do some oral arguing about the topic. Then you will write your own argument essay that responds to this prompt:_

Show students the Argument Essay Chart.

```
What policy should your school follow about team sports?

Claim – clearly stated; responds to prompt
Reasons – at least 2 different reasons
Evidence – at least one piece of text evidence for each reason
C-R/Rebuttal – counter-reason goes against claim; rebuttal shows C-R is false
Conclusion – connects back to claim
Signal Words – help readers follow the logic of your argument
Organization – paragraphs organize your argument
```

Part 2 – Text Discussion

Review Questioning the Author:

_In Unit 1, when we read the texts about school lunches we did something called “Questioning the Author.” How did that work?_ Students should recall that someone would read part of the text aloud while everyone followed along. Then the class would stop and talk about what the author was saying in that part of the text.

Give examples of QtA gist queries:

_When we question the author, we ask things like:_

- What is the author trying to say?
- How does this connect to what we already read?
Review the purpose:

*Why do we use Questioning the Author?*

Help students understand that the questions help us share what we think the author is saying. By sharing what we think and listening to each other’s ideas, we will work together to get a good understanding of the author’s message.

Discuss PRO text:

**Major Ideas Students Should Understand Through this Discussion**

In this essay, Robert Fuller argues that team sports help young people build good character. He believes that players learn positive values from being part of a sports team. They also learn to make good choices and avoid bad behaviors. He uses expert opinion, evidence from research, and data from surveys to support his view and respond to critics who say team sports can have negative impacts on players. He concludes by summarizing his argument and emphasizing that young people who play team sports build character while having fun.
Guiding a Q&A Discussion

Using Gist Queries to Promote Comprehension
Questioning the Author gist queries are designed to help students figure out what the author is trying to say. Suggested responses are provided with each query. As students identify a major idea, write it on the board. This will help students remember what was stated and provide visual support for understanding the author’s message.

Troubleshooting Problems
Students may misinterpret the text or offer ideas that don’t come from the text. To develop strong understanding of the text, follow up the responses to help students clarify, elaborate, or refocus their ideas:
- Reread a key line or two and repeat the query.
- Or use follow-up questions such as:
  - What makes you think that?
  - Is that what the author told us?
  - What lines in the text say that?
  - How does that connect to what we said earlier?

If students respond by rereading text sentences, prompt them to say it in their own words. For example, “That’s what the author said but what does the author mean?”

When students use their own words without being prompted, provide reinforcement by saying something like, “You did a great job of saying that in your own words.”

Response Slips
You have an envelope marked Response Slips. If students do not respond to a question or if only a few students are participating, give each student a response slip and have everyone write a one-sentence response. You can then have students read what they wrote or you can collect the slips and read random answers. If you establish this as a routine, students may be more likely to respond orally to avoid having to write.

Introducing Unfamiliar Words
The highlighted words are terms that might be unfamiliar to your students. Definitions can be found at the end of the text. Please provide brief explanations of these and other unfamiliar words as they arise during the reading.

Have students turn to the first text under Tab 1 in their binders.

Conduct a discussion based on the questions indicated on pages 5 and 6.
Why join a sports team? It is a fun way to get exercise, build friendships, and develop physical skills. But participating in sports is a good choice for an even more important reason. The greatest benefit of team sports is that they help young people build good character.

A key part of developing character is learning positive values, and that is an outcome of being part of a sports team. Discovery Education surveyed 9,000 children, parents, teachers, and coaches. According to the survey, most parents whose children play sports believe their child is learning values such as teamwork, commitment, fairness, and respect for others. In addition, the survey showed that more than half of the children who play sports agree that they have a stronger sense of right and wrong because of the sport they play. Another survey, conducted by the Josephson Institute of Ethics, involved 35,000 high school students. They found that 90% of athletes say their coach “consistently sets an example of good character” and “expects players to do the right thing.” Both surveys provide evidence that playing a team sport helps young people learn positive values.

Participating in sports also helps young people learn to make good choices. The U.S. Department of Education sponsored a series of studies that followed the same students over multiple years. Results indicate that students who play sports are less likely to drop out of school than those who do not play sports. They also spend more time on homework, get higher grades, apply to more colleges, and are more likely to graduate from college. In another study, researchers surveyed over 7,000 high school students in Georgia. They found that athletes are more likely than non-athletes to use seatbelts, exercise regularly, and eat healthy foods. The Department of Education and the Georgia studies provide a great deal of evidence that young people learn to make good choices when they play team sports.

Finally, team sports build character by discouraging bad behaviors. Researchers surveyed 400 middle school students in Arizona. They found that sports participants are less likely than non-participants to exhibit such behaviors as smoking, drinking, cheating on tests, vandalizing school property, fighting, and stealing. Another study examined the rate of fights and other disturbances at 21 high schools in Maryland. They...
Lesson 1 – Discussion of PRO Text

found that, when two schools have the same number of students, the school with more students involved in team sports will have fewer disturbances. The authors conclude that encouraging more students to play team sports may help make schools safer. All of this evidence shows that sports help young people stay out of trouble.

Critics say that team sports often have negative impacts on players. If players are made to feel that they do not play well, it may lower their self-esteem and cause them to become angry or depressed. Such outcomes do occur, but they can be minimized if coaches are properly trained. Programs like Coach Effectiveness Training encourage coaches to focus less on winning and more on improving each player’s skills. One study examined the impact of this training on Little League coaches by interviewing 152 players, ages 10 to 12. The study found that trained coaches were evaluated more highly by their players than untrained coaches. Players with trained coaches also had more fun, liked their teammates more, and had higher self-esteem than players with untrained coaches. In a British study, surveys were given to 265 boys who played soccer or cricket. Results indicate that, when the coach focuses on effort and improvement, most players feel good about themselves. When the coach focuses on winning, most players feel unsuccessful and incompetent. These studies show that, by focusing on effort and improvement, coaches can help players feel competent and build self-esteem.

Playing team sports can provide young people with positive experiences that build character. Players learn important values like discipline, teamwork, fairness, and respect for others. They also learn to make good choices and avoid bad behaviors. And best of all, while they’re learning all those things, they are playing a game and having fun.

Part 3 – Quickwrite

Have students turn to the Lesson 1 Quickwrite under Tab 2. Tell them they are to decide if they agree with what the author says about team sports and explain why or why not.

Give students 3-4 minutes to complete the task, then ask a few students to share what they wrote.
(This worksheet is under Tab 2 in the student notebook.)

Name

Lesson 1

Quickwrite!
In response to “Team Sports Build Character”

Do you agree with this author about team sports building character? Explain why or why not.

_________________________________________________________________________________

_________________________________________________________________________________

_________________________________________________________________________________
Lesson 2 – Discussion of *The Dark Side of Team Sports* (CON Text)

**Bird’s Eye View**

**Discuss CON Text (Part 1)** – 25 minutes  
Each portion of the CON text is read aloud and discussed using Questioning the Author gist queries.

**Quickwrite (Part 2)** – 15 minutes  
Students then respond to both texts by describing what each author wants the reader to think about team sports.

**Part 1 – Discuss CON Text**

**Major Ideas Students Should Understand Through this Discussion**

Grace Young argues against the idea that team sports build character. She says that kids who play team sports often develop bad personality traits and learn to make bad choices. Playing team sports can also interfere with family activities and cause families to drift apart. She uses examples, expert opinion, survey data, and research results to support her view and argue against those who say team sports teach positive values.

**Guiding a QtA Discussion**

**Using Gist Queries to Promote Comprehension**

Each portion of text is read aloud, then you ask gist queries to help your students figure out what the author is trying to say. Suggested responses are provided with each query. Record major ideas on the board as students identify them.

**Troubleshooting Problems**

Use follow-up questions to help students elaborate or refocus their ideas. Examples:

- *What makes you think that?*
- *Is that what the author told us?*
- *How does that connect to what we said earlier?*

Encourage students to use their own words rather than reading sentences from the text.

**Introducing Unfamiliar Words**

Provide brief explanations of highlighted and other unfamiliar words as they arise during the reading. Definitions for highlighted words are at the end of the text.

Have students turn to the second text under Tab 1 in their binders.

Conduct a discussion based on the questions indicated on pages 2 and 3.
Lesson 2 – Discussion of CON Text

The Dark Side of Team Sports
by Grace Young

Playing sports should be fun for kids, but too often the focus is not on having fun but on winning, being the best and beating the competition. The best players are recognized as stars, which can make them think too much of themselves. Kids who are not the stars feel unsuccessful and incompetent. Instead of working to improve their skills, they often quit trying or drop out of the sport altogether. For these reasons, participating in sports can lead young players to focus on the wrong values instead of developing good character.

Kids who play team sports often develop bad personality traits. Researchers in Finland studied girls and boys, ages 8 to 16, who played baseball. They measured sensitivity, which is the ability to understand what others are feeling. They also measured narcissism, which is when people think only of themselves. The study found that, the more years kids spent playing baseball, the lower they scored on sensitivity and the higher they scored on narcissism. This shows that sports can cause kids to ignore what others are feeling and become vain and self-centered. Mark Edmundson is a writer who played football in high school. He says that athletes “are often bullies. They often seek violence for its own sake. They like to humiliate their foes, off the field as well as on it.” This shows that sports can cause kids to become overly aggressive and even cruel.

Participating in team sports can also encourage kids to make bad choices. The Josephson Institute of Ethics conducted a survey of 35,000 high school students. They found that athletes are more likely than non-athletes to cheat in school, and many athletes believe it’s okay for coaches to teach players how to cheat without getting caught. In another study, researchers gave the Youth Risk Behavior Survey to 4,000 middle school students. They found that kids who play sports are more likely than non-players to engage in risky behaviors like fighting, smoking, drinking, and using drugs. Taken together, the two studies show that sports encourage kids to make bad choices on the field and in life.

People who promote team sports claim that they teach positive values like discipline, fair play, respect for others, and teamwork. In a Discovery Education survey, those were all rated as important values for sports to teach. Competitiveness and winning were rated as
unimportant. And yet, when asked which values sports actually teach, competitiveness and winning were at the top of the list and the others were at the bottom. In another study, researchers gave the Youth Experiences Survey to 450 high school students. They found that kids who played sports reported more negative experiences than kids in non-sport activities like church choir or scouts. For example, kids in sports were more likely to report that peers in their activity made fun of them or that an adult told them to do something they knew was wrong. Although team sports could teach important values, these studies show that, in reality, they do not.

Finally, playing team sports can weaken the family ties that are essential for developing good character. Jeannette Twomey is a writer whose son played youth league baseball. His family attended all practices and games, which often involved weekend travel. She wrote this about the impact on her family:

Over the years, we saw one family activity after another bow its head to youth sports. Dinner at home, reading before bedtime, visits to grandma’s, games, picnics, camping trips – all were casualties of the sport schedule.

Researchers interviewed parents of tennis players, who described similar problems. They reported less time with their spouses and less time spent together as a family. Family activities bind families together. Without them, a family will drift apart. This can cause children to feel less support and parents to have less influence over their children’s behavior.

It is often said that team sports build character. Yet kids who play sports often develop bad personality traits. They tend to make bad choices in life, and their family relationships often suffer. Despite what many people believe, participating in team sports can be harmful to a player’s character.

(40-52) The author says some people claim that sports teach good values. Then what does she do?
- She tries to show that is not true.

(52-56) Is there anything that both sides agree about?
- Yes, on the values that sports could teach.

So where is the disagreement?
- Whether playing on sports teams really does teach those values.

(63-66) What do these things have to do with weakening family ties?
- These activities make families stronger. Giving them up can make them weaker.

(67-73) How does all this information about family ties fit together?
- If families don’t spend much time doing things together, parents will have less of a role in helping their children develop good character. What does it mean that parents may have less influence over their children’s behavior?
- Kids may be less likely to listen to their parents or think it is important to do what they say.

(74-79) How does the author wrap things up?
- She summarizes how playing sports might be harmful to building good character.

Part 2 – Quickwrite

Have students turn to the Lesson 2 Quickwrite under Tab 2 in their binders. Tell them they are to describe in their own words what each author wants the reader to think about this topic.

Give students 5-7 minutes to complete the task, then ask a few students to share what they wrote.
(This worksheet is under Tab 2 in the student notebook.)

Lesson 3 – Argument Map: PRO Text

Bird’s Eye View

Review Argument Elements (Part 1) – 10 minutes
This lesson begins by reviewing argument elements and the concept of an argument map.

Map the PRO Text (Part 2) – 30 minutes
The teacher and students then work together to create an argument map of the PRO text.

Part 1 – Review Argument Elements
Connect back to texts:
We just read two texts about team sports. Let’s think about the big idea from each. What does each author want us to think? That’s what you wrote about in the Lesson 2 Quickwrite. Let’s remind ourselves about those.
Review a few strong QW responses that clearly state each big idea – the PRO author believes team sports build character; the CON author believes they prevent kids from developing good character.

Review argument elements:
Ask students to describe each element in their own words.
• claim
• reason
• evidence
• counter-reason
• rebuttal

Review argument mapping:
Today we’re going to create a map of the PRO author’s argument. What is the purpose of an argument map?
Students should recall that an argument map shows how reasons and evidence fit together to support the claim.

Part 2 – Map the PRO Text
Have students turn to the PRO text under Tab 1 in their binders.

PRO Text Argument Discussion & Mapping
As you go through the text and identify each element:
• Place the corresponding post-it on the chart (see page 5), and
• Have students bracket and label the element in their text (see last page).
Why join a sports team? It is a fun way to get exercise, build friendships, and develop physical skills. But participating in sports is a good choice for an even more important reason. The greatest benefit of team sports is that they help young people build good character.

A key part of developing character is learning positive values, and that is an outcome of being part of a sports team. Discovery Education surveyed 9,000 children, parents, teachers, and coaches. According to the survey, most parents whose children play sports believe their child is learning values such as teamwork, commitment, fairness, and respect for others. In addition, the survey showed that more than half of the children who play sports agree that they have a stronger sense of right and wrong because of the sport they play. Another survey, conducted by the Josephson Institute of Ethics, involved 35,000 high school students. They found that 90% of athletes say their coach “consistently sets an example of good character” and “expects players to do the right thing.” Both surveys provide evidence that playing a team sport helps young people learn positive values.

What is the author’s claim?

- The greatest benefit of team sports is that they help young people build good character.

The author talks about other benefits here. How do you know his claim is about building character?

- He says it is the greatest benefit.

(Add the Claim post-it to the chart, then have students bracket and label lines 4-5 as “C”.)

What is all this other information here?

- Evidence for sports helping kids learn values.

Tell me some of the evidence

- (As evidence is identified, add to chart and have students mark text.)

(Reread last sentence.) Do you agree with the author that the surveys show that sports help kids learn positive values?

- (E.g. Yes because a lot of parents and kids said they do; No because surveys don’t show if kids really follow the values.)
Participating in sports also helps young people learn to make good choices. The U.S. Department of Education sponsored a series of studies that followed the same students over multiple years. Results indicate that students who play sports are less likely to drop out of school than those who do not play sports. They also spend more time on homework, get higher grades, apply to more colleges, and are more likely to graduate from college. In another study, researchers surveyed over 7,000 high school students in Georgia. They found that athletes are more likely than non-athletes to use seatbelts, exercise regularly, and eat healthy foods. The Department of Education and the Georgia studies provide a great deal of evidence that young people learn to make good choices when they play team sports.

Finally, team sports build character by discouraging bad behaviors. Researchers surveyed 400 middle school students in Arizona. They found that sports participants are less likely than non-participants to exhibit such behaviors as smoking, drinking, cheating on tests, vandalizing school property, fighting, and stealing. Another study examined the rate of fights and other disturbances at 21 high schools in Maryland. They found that, when two schools have the same number of students, the school with more students involved in team sports will have fewer disturbances. The authors conclude that encouraging more students to play team sports may help make schools safer. All of this evidence shows that sports help young people stay out of trouble.

(Before reading) Stop me when you hear something we should add to the map.
- (Students should stop you after first sentence.) Sports help kids make good choices.

How does that fit into the author’s argument?
- Making good choices is part of good character. So this is a reason that supports the claim.

(Add Reason 2 to chart; have students mark text.)

(Read second sentence.) What’s coming up next?
- Evidence for kids making good choices.

How do you know?
- It tells about a series of studies.

(Read rest of paragraph.) Let’s sort out this evidence. Who can describe what the author has given us?
- One study says athletes do better in school; another says they do things like using seatbelts and eating well.

(Add Evidence to chart; have students mark text.)

(Read first sentence.) How does this fit with the author’s argument?
- People with good character don’t engage in bad behaviors. The author says sports discourage bad behaviors, so this is a reason why sports help build character.

(Add Reason 3 to chart; have students mark text.)

(Read rest of paragraph.) What else does the author give us in this section?
- Evidence that sports discourage bad behavior.

(Add Evidence to chart; have students mark text.)
Critics say that team sports often have negative impacts on players. If players are made to feel that they do not play well, it may lower their self-esteem and cause them to become angry or depressed. Such outcomes do occur, but they can be minimized if coaches are properly trained. Programs like Coach Effectiveness Training encourage coaches to focus less on winning and more on improving each player’s skills. One study examined the impact of this training on Little League coaches by interviewing 152 players, ages 10 to 12. The study found that trained coaches were evaluated more highly by their players than untrained coaches. Players with trained coaches also had more fun, liked their teammates more, and had higher self-esteem than players with untrained coaches. In a British study, surveys were given to 265 boys who played soccer or cricket. Results indicate that, when the coach focuses on effort and improvement, most players feel good about themselves. When the coach focuses on winning, most players feel unsuccessful and incompetent. These studies show that, by focusing on effort and improvement, coaches can help players feel competent and build self-esteem.

Playing team sports can provide young people with positive experiences that build character. Players learn important values like discipline, teamwork, fairness, and respect for others. They also learn to make good choices and avoid bad behaviors. And best of all, while they’re learning all those things, they are playing a game and having fun.

(Read first two sentences.) What part of an argument is the author giving us here?
- A counter-reason.

Why would an author do that?
- He gives a reason that goes against his argument because he wants to show that it is not true.

(Read rest of paragraph.) How does the author answer the idea that sports can have negative effects?
- He talks about how coaches who are trained can make sure those bad things don’t happen.

What goes on our map from this section?
- The counter-reason – that sports can have negative effects – and evidence that these effects can be prevented if coaches get training.

What do we call the evidence that shows a counter-reason is not true?
- The rebuttal

(Add Counter-reason and Rebuttal to chart; have students mark text.)

(Read paragraph.) Did the author add any more to his argument here?
- No.

Then why did he include this paragraph?
- To summarize his main points so the reader will remember them.
Lesson 3 – Argument Map: PRO Text

Team Sports Build Character
by Robert K. Fuller

Claim
Team sports help kids build good character.

[lines 4-5]

Reason 1
Players learn positive values.

Reason 2
Players learn to make good choices.

Reason 3
Sports discourage bad behaviors.

Evidence 1a
Disc Ed: Parents & kids talk about values.

Evidence 2a
USDE: Do better in school.

Evidence 3a
Arizona: Less likely to smoke, etc.

Evidence 1b
Josephson: Coaches set good examples.

Evidence 2b
Georgia: Choose healthy behaviors.

Evidence 3b
Maryland: Fewer fights.

Counter-Reason
Team sports can lower self-esteem & cause bad feelings.

[51-54]

Rebuttal 1
CET: Trained coaches can build self-esteem.

[54-65]

Rebuttal 2
Britain: Focus on effort is good for kids.

[65-70]
Team Sports Build Character

by Robert K. Fuller

Why join a sports team? It is a fun way to get exercise, build friendships, and develop physical skills. But participating in sports is a good choice for an even more important reason. The greatest benefit of team sports is that they help young people build good character.

A key part of developing character is learning positive values, and that is an outcome of being part of a sports team. Discovery Education surveyed 9,000 children, parents, teachers, and coaches. According to the survey, most parents whose children play sports believe their child is learning values such as teamwork, commitment, fairness, and respect for others. In addition, the survey showed that more than half of the children who play sports agree that they have a stronger sense of right and wrong because of the sport they play. Another survey, conducted by the Josephson Institute of Ethics, involved 35,000 high school students. They found that 90% of athletes say their coach “consistently sets an example of good character” and “expects players to do the right thing.” Both surveys provide evidence that playing a team sport helps young people learn positive values.

Participating in sports also helps young people learn to make good choices. The U.S. Department of Education sponsored a series of studies that followed the same students over multiple years. Results indicate that students who play sports are less likely to drop out of school than those who do not play sports. They also spend more time on homework, get higher grades, apply to more colleges, and are more likely to graduate from college. In another study, researchers surveyed over 7,000 high school students in Georgia. They found that athletes are more likely than non-athletes to use seatbelts, exercise regularly, and eat healthy foods. The Department of Education and the Georgia studies provide a great deal of evidence that young people learn to make good choices when they play team sports.

Finally, team sports build character by discouraging bad behaviors. Researchers surveyed 400 middle school students in Arizona. They found that sports participants are less likely than non-participants to exhibit such behaviors as smoking, drinking, cheating on tests, vandalizing school property, fighting, and stealing. Another study examined the rate of fights and other disturbances at 21 high schools in Maryland. They
found that, when two schools have the same number of students, the school with more students involved in team sports will have fewer disturbances. The authors conclude that encouraging more students to play team sports may help make schools safer. All of this evidence shows that sports help young people stay out of trouble.

Critics say that team sports often have negative impacts on players. If players are made to feel that they do not play well, it may lower their self-esteem and cause them to become angry or depressed. Such outcomes do occur, but they can be minimized if coaches are properly trained. Programs like Coach Effectiveness Training encourage coaches to focus less on winning and more on improving each player’s skills. One study examined the impact of this training on Little League coaches by interviewing 152 players, ages 10 to 12. The study found that trained coaches were evaluated more highly by their players than untrained coaches. Players with trained coaches also had more fun, liked their teammates more, and had higher self-esteem than players with untrained coaches. In a British study, surveys were given to 265 boys who played soccer or cricket. Results indicate that, when the coach focuses on effort and improvement, most players feel good about themselves. When the coach focuses on winning, most players feel unsuccessful and incompetent. These studies show that, by focusing on effort and improvement, coaches can help players feel competent and build self-esteem.

Playing team sports can provide young people with positive experiences that build character. Players learn important values like discipline, teamwork, fairness, and respect for others. They also learn to make good choices and avoid bad behaviors. And best of all, while they’re learning all those things, they are playing a game and having fun.
Lesson 4 – Argument Map: CON Text

Bird’s Eye View

Map the CON Text (Part 1) – 25 minutes
This lesson begins with the teacher and students working together to create an argument map of the CON text.

Quickwrite (Part 2) – 15 minutes
Students then select the most convincing reason in each text and describe evidence the author provided for that reason.

Part 1 – Map the CON Text

Have students turn to the CON text under Tab 1 in their binders.

CON Text Argument Discussion & Mapping

As you go through the text and identify each element:
- Place the corresponding post-it on the chart (see page 6), and
- Have students bracket and label the element in their text.
The Dark Side of Team Sports
by Grace Young

Playing sports should be fun for kids, but too often the focus is not on having fun but on winning, being the best and beating the competition. The best players are recognized as stars, which can make them think too much of themselves. Kids who are not the stars feel unsuccessful and incompetent. Instead of working to improve their skills, they often quit trying or drop out of the sport altogether. For these reasons, participating in sports can lead young players to focus on the wrong values instead of developing good character.

Kids who play team sports often develop bad personality traits. Researchers in Finland studied girls and boys, ages 8 to 16, who played baseball. They measured sensitivity, which is the ability to understand what others are feeling. They also measured narcissism, which is when people think only of themselves. The study found that, the more years kids spent playing baseball, the lower they scored on sensitivity and the higher they scored on narcissism. This shows that sports can cause kids to ignore what others are feeling and become vain and self-centered. Mark Edmundson is a writer who played football in high school. He says that athletes “are often bullies. They often seek violence for its own sake. They like to humiliate their foes, off the field as well as on it.” This shows that sports can cause kids to become overly aggressive and even cruel.

What is the author’s claim
• Team sports can keep kids from developing good character.
(Add the Claim post-it to the chart, then have students bracket and label lines 8-10 as “C”.)

(Before reading) We know the author’s claim. What do you think will be coming up next?
• Reasons.
Ready? Stop me when you hear a reason.
• (Students should stop you after first sentence.)
Players often develop bad personality traits.
(Add Reason 1 to chart; have students mark text.)

(Finish reading paragraph.)
How does the rest of this section fit with the author’s argument?
• It presents evidence that players develop bad personality traits.

How does the evidence show that players develop bad traits?
• A study showed that kids who played baseball the longest were not as sensitive to others’ feelings. A writer who played high school football says that athletes are often bullies.
(Add evidence to chart; have students mark text.)
Participating in team sports can also encourage kids to make bad choices. The Josephson Institute of Ethics conducted a survey of 35,000 high school students. They found that athletes are more likely than non-athletes to cheat in school, and many athletes believe it’s okay for coaches to teach players how to cheat without getting caught. In another study, researchers gave the Youth Risk Behavior Survey to 4,000 middle school students. They found that kids who play sports are more likely than non-players to engage in risky behaviors like fighting, smoking, drinking, and using drugs. Taken together, the two studies show that sports encourage kids to make bad choices on the field and in life.

People who promote team sports claim that they teach positive values like discipline, fair play, respect for others, and teamwork. In a Discovery Education survey, those were all rated as important values for sports to teach. Competitiveness and winning were rated as unimportant. And yet, when asked which values sports actually teach, competitiveness and winning were at the top of the list and the others were at the bottom. In another study, researchers gave the Youth Experiences Survey to 450 high school students. They found that kids who played sports reported more negative experiences than kids in non-sport activities like church choir or scouts. For example, kids in sports were more likely to report that peers in their activity made fun of them or that an adult told them to do something they knew was wrong. Although team sports could teach important values, these studies show that, in reality, they do not.
Finally, playing team sports can weaken the family ties that are essential for developing good character. Jeannette Twomey is a writer whose son played youth league baseball. His family attended all practices and games, which often involved weekend travel. She wrote this about the impact on her family:

Over the years, we saw one family activity after another bow its head to youth sports. Dinner at home, reading before bedtime, visits to grandma’s, games, picnics, camping trips—all were casualties of the sport schedule.

Researchers interviewed parents of tennis players, who described similar problems. They reported less time with their spouses and less time spent together as a family. Family activities bind families together. Without them, a family will drift apart. This can cause children to feel less support and parents to have less influence over their children’s behavior.

It is often said that team sports build character. Yet kids who play sports often develop bad personality traits. They tend to make bad choices in life, and their family relationships often suffer. Despite what many people believe, participating in team sports can be harmful to a player’s character.

Tell students they have their own copies of the PRO and CON maps under Tab 3 in their binders.
Part 2 – Quickwrite

Introduce quickwrite:
Have students turn to the Lesson 4 Quickwrite under Tab 2.

You will answer the same question for each text: What is the most convincing reason the author gave? In your own words, briefly describe the reason and evidence the author provided to support it. So you just need to write four sentences: one reason and one piece of evidence for each text.

Give students 5-7 minutes to complete the quickwrite.

Share reasons & evidence:
Invite several students to share the reasons and evidence they chose.

Use follow-up questions to encourage students to explain why a reason was convincing and to elicit different reactions to the same reason. Examples:

• Why was that a good reason?
• Anyone else have that reason?
• Anyone think it’s not a convincing reason?

Troubleshooting: When students describe evidence, make sure it supports the reason they chose. If not, or if a student offers another reason instead of evidence, follow up by asking how that evidence shows the reason is true. If needed, remind students that a reason is a statement of an author’s idea about the claim, whereas evidence describes supportive information that comes from a source.

Target
Help students see that people can have different reactions to the same argument. One person might think a particular reason is really convincing. To another person, the same reason might seem totally irrelevant.
Argument Map: CON Text

The Dark Side of Team Sports
by Grace Young

Claim
Team sports can keep kids from developing good character.
[lines 8-10]

Reason 1
Players develop bad personality traits.
[11-12]
supports

Evidence 1a
Finland: Less sensitive & more selfish.
[12-19]

Evidence 1b
M. Edmundson: Some are bullies.
[21-25]

Reason 2
Players learn to make bad choices.
[27-28]
supports

Evidence 2a
Josephson: Cheating.
[28-33]

Evidence 2b
YRBS: Risky behaviors.
[33-37]

Reason 3
Sports weaken family ties.
[57-58]
supports

Evidence 3a
J. Twomey: Fewer family activities.
[59-66]

Evidence 3b
Tennis: Less time together.
[67-69]

Counter-Reason
Sports can teach positive values.
[40-42]

Rebuttal 1
Disc Ed: Actually teach competitiveness & winning.
[42-47]

Rebuttal 2
YES: Negative experiences.
[47-55]
Team sports help kids build good character.

**Reason 1:** Players learn to make good choices.

**Evidence 1a:** USDE: Do better in school.

**Evidence 1b:** Georgia: Choose healthy behaviors.

**Evidence 2a:** Arizona: Less likely to smoke, etc.

**Evidence 2b:** Maryland: Fewer fights.

**Counter-Reason: Team sports can lower self-esteem & cause bad feelings.**

**Evidence 3:** CFT: Trained coaches can build self-esteem.

**Evidence 3b:** Josephson: Coaches set good examples.

**Rebuttal 1:** CET: Trained coaches can build self-esteem.

**Rebuttal 2:** Britain: Focus on effort is good for kids.

**Evidence 3:** Parents & kids talk about values.

**Evidence 3b:** Joeeshson: Coaches set good examples.

**Counter-Reason:** Team sports can lower self-esteem & cause bad feelings.

**Evidence 3:** CFT: Trained coaches can build self-esteem.

**Evidence 3b:** Josephson: Coaches set good examples.

**Rebuttal 1:** CET: Trained coaches can build self-esteem.

**Rebuttal 2:** Britain: Focus on effort is good for kids.

**Evidence 3:** Parents & kids talk about values.

**Evidence 3b:** Josephson: Coaches set good examples.
The Dark Side of Team Sports

Claim: Team sports can keep kids from developing good character.

Reason 1: Players develop bad personality traits.
- Evidence 1a: Finland: Less sensitive & more selfish. (lines 11-12)
- Evidence 1b: YRBS: Risky behaviors. (lines 28-33)

Reason 2: Players learn to make bad choices.
- Evidence 2a: Josephson: Cheating. (lines 27-28)
- Evidence 2b: YRBS: Risky behaviors. (lines 33-37)

Reason 3: Sports weaken family ties.
- Evidence 3a: J. Twomey: Fewer family activities. (lines 57-58)
- Evidence 3b: Tennis: Less time together. (lines 67-69)

Counter-Reason: Sports can teach positive values.
- Rebuttal 1a: Disc Ed: Actually teach competitiveness & winning. (lines 42-47)
- Rebuttal 2: YES: Negative experiences. (lines 47-55)

Reasons:
- Players develop bad personality traits.
- Players learn to make bad choices.
- Sports weaken family ties.

Counter-Reason:
- Sports can teach positive values.
(This worksheet is under Tab 2 in the student notebook.)

________________________________________________________________
Lesson 5 – Discussion of Assorted Evidence

Bird’s Eye View

Evidence Discussion (Part 1) – 30 minutes
This lesson begins with students adopting a position on team sports. They then examine assorted snippets of evidence and identify pieces that support their position. In a whole-class discussion, students present their evidence and respond to questions and challenges from their listeners.

Quickwrite (Part 2) – 10 minutes
Students then describe something from one of the texts that did not convince them and explain why it was not convincing.

Part 1 – Evidence Discussion
Introduce evidence:
Have students turn to the Assorted Evidence table under Tab 1 in their binders.

Explain that the table contains pieces of evidence from a variety of sources. Some supports the PRO text, some supports the CON text, and some provides additional information about the topic.

Students adopt a position:
From what we’ve read and talked about so far, do you think team sports are good for middle school students?

Draw and label a line on the board:

YES – good

NO – not so good

Where do you fall on this line? Do you think team sports are good for kids? Not so good? Or somewhere in the middle? Do you think there might be certain conditions that would have to be true in order for team sports to be good for kids?

For today’s activity, even if you’re not yet sure where you stand on this issue, I’d like you to adopt a position somewhere along this line.

Give students a minute or two to decide on a position.
Students identify evidence:
Explain that students are to read through the table and find evidence that could support their position. They should be prepared to present one piece of evidence to the class and explain how it connects to their argument.

Give students 5-7 minutes to work. You might have them work independently at first, then pair up and share what they found and how it connects to their position.

Whole-class discussion:
I’ll call on people to come up and present one piece of evidence to the class. When you are presenting, you need to explain how your evidence connects to your position.

When you’re finished, the class will have a chance to ask questions or challenge what you’re saying. You can ask other students to help you answer their questions or defend your ideas.

During the discussion, encourage listeners to offer questions or comments that focus on connections between claim, reasons, and evidence. Examples:

- How does this evidence connect to your position?
- What reason could you use to link this evidence to your claim?
- I’m not sure I understand how your evidence connects.

If students do not discuss evidence that suggests broader options beyond a simple PRO or CON position, offer a piece and ask how it could be used in an argument about team sports. For example, you could use #10, about playing well being more important than winning, to support the idea that team sports can be good for kids, but only if parents and coaches emphasize playing well and having fun over winning.

Part 2 – Quickwrite
Introduce quickwrite:
Have students turn to the Lesson 5 Quickwrite under Tab 2 in their binders. Review the writing prompt and tell students they are to choose something from one of the texts that they found unconvincing. It can be a reason, a piece of evidence, or a sentence explaining what the evidence shows. They are to respond to the author of the text and tell what was not convincing and why.

Give students about 5 minutes to write, then ask several to share what they wrote. To encourage oral argument, ask if anyone agrees or disagrees with what each student says.
### Assorted Evidence

Lesson 6 – Claims and Connections

Bird’s Eye View

**Brainstorm Claim Ideas (Part 1) – 10 minutes**
This lesson begins with students examining essay criteria and brainstorming possible responses to the prompt.

**Discuss Connections (Part 2) – 10 minutes**
The teacher then introduces the idea that the claim ties an argument essay together.

**Making Connections (Part 3) – 20 minutes**
Student are then given sample claim-sentence pairs, and they are asked to explain connections between them.

Part 1 – Brainstorm Claim Ideas

Introduce criteria:

_Over the next several days you will plan and then write an essay about team sports. Today you’ll start by planning your claim._

Display the Argument Essay Chart and have students turn to their copy under Tab 4.

Read the prompt and remind students that they are to write an argument that answers that question.

_As you are deciding what to write, think about all we’ve read – about the benefits of team sports, the problems they can cause, and ideas people have for making sports good for kids._

Go over the criteria list with your students. Remind them that their claim is their big idea that answers the prompt. They need to provide at least two reasons, each with at least one piece of evidence from the PRO or CON text or the Assorted Evidence table.

For this essay, they also need to provide a counter-reason that goes against their claim and a rebuttal that goes against the counter-reason.

What policy should your school follow about team sports?

Claim – clearly stated; responds to prompt

Reasons – at least 2 different reasons

Evidence – at least one piece of text evidence for each reason

C-R/Rebuttal – counter-reason goes against claim; rebuttal shows C-R is false

Conclusion – connects back to claim

Signal Words – help readers follow the logic of your argument

Organization – paragraphs organize your argument
Brainstorm ideas:

What big ideas can you think of that respond to this prompt?

As students begin to offer ideas, use questions as needed to help them keep the criteria in mind. Examples:

- Does that claim respond to the prompt?
- Can you think of two different reasons to explain that claim?
- Could you use text evidence to support that claim?

Part 2 – Discuss Connections

Introduce connections:

Another important thing to remember about an argument’s claim is that it ties together the whole essay.

Have students turn to the argument map for the PRO text under Tab 3.

Let’s look at how everything in the argument connects back to the claim.

Describe connections:

- How does Reason 1 connect back to the claim?
  Learning positive values is part of building good character.

- How does Reason 2 connect back to the claim?
  Learning to make good choices is part of building good character.

- How about Reason 3?
  Avoiding bad behaviors is part of building good character.

All of your answers are saying pretty much the same thing. Why?
Because the entire argument is in support of the big idea that team sports help kids build good character.

So your claim needs to be clear, it needs to respond to the prompt, and it also needs to connect with your reasons and counter-reason, and those need to connect to text evidence.
Part 3 – Making Connections

Introduce task:

Part of your job as an author of an argument is to help your readers understand how your claim, reasons, and evidence fit together. That may not be clear from just stating your reasons and evidence – you need to add explanations.

So for example, suppose I said “Joe didn’t see that the sidewalk was broken. Joe broke his leg.” Is it clear what happened? How might you explain the connection?

Call on a couple of students to offer explanations, which should make clear that Joe fell because of the broken sidewalk.

Let’s look at some examples that might be part of arguments.

Guide task:

Read the breakfast claim post-it and the sentence about blood sugar, then place both post-its on the board.

Could this sentence support the claim? Explain how it connects.

Sample connection: Not eating breakfast can cause low blood sugar, which can make you drowsy. So that’s why it’s important to eat breakfast.

Read the post-its about video games and bullying, then place both on the board.

Could this sentence support the claim? Explain how it connects.

Sample connection: Playing violent video games might make some students do violent things, such as bullying others in school. Banning violent video games might make kids less likely to bully others.
Read the post-its about attendance and test scores, then place both on the board.

\[
\begin{align*}
\text{Claim} & \quad \text{Amanda had the highest test scores.} \\
\text{Good attendance is very important.} & \\
\end{align*}
\]

Could this sentence support the claim? Explain how it connects.
Sample connection: Amanda had the highest test scores, and she had perfect attendance. So attending school every day may help you score better on tests.
Team Sports
Extended Writing Task: Argument Essay

Essay prompt:

What policy should your school follow about team sports?

Your score will be based on the following criteria:

Claim 
Your claim is clearly stated and it responds to the prompt

Reasons
You include at least two different reasons why you believe your claim

Evidence
Each reason is supported by at least one piece of evidence

CR/Rebuttal
You include a counter-reason that goes against your claim and a rebuttal that shows that the C-R is false

Conclusion
Your essay ends with a conclusion that connects back to the claim

Signal Words
You use signal words to help readers follow the logic of your argument

Organization
Your essay has paragraphs that organize your argument

Bonus points will be awarded for:

- a third reason with evidence
- originality of ideas
Lesson 7 – Work On Claim

Bird’s Eye View

Students Write Claim (Part 1) – 10 minutes
Students write a rough draft of their own claim and circle evidence they can use to support it.

Class Feedback (Part 2) – 15 minutes
Students then present their claim and evidence, and the class discusses whether and how the evidence connects to the claim.

Peer Feedback (Part 3) – 15 minutes
Students then meet in pairs to review each other’s claim and provide feedback.

Part 1 – Students Write Claim
Review outline template:
Have students turn to the outline template under Tab 4. Remind them that the claim, two reasons and evidence go inside the first two pages. For this essay, they will also need the counter-reason and rebuttal on the third page of the template. The last page is for extra credit, if they want to include a third reason.

Introduce task:
*Write your claim on a post-it and put it on your outline. When you finish writing your claim, look at the PRO and CON texts and the Assorted Evidence table and circle evidence you can use to support it.*

Hand out small post-its and give students 5 minutes to write their claim and circle evidence.

Part 2 – Class Feedback
Introduce task:
*Getting other people’s reactions can help you find out how strong your evidence will be. Let’s have a few of you read your claim and evidence to the class and see what they think.*

Guide discussion:
Call on several students to read their claim and a piece of evidence they think will support it. Ask the class to give a thumbs up or down to indicate whether they agree that the evidence supports the claim. Call on a student who gave a thumbs up and ask them to explain the connection. Then call on a student who gave a thumbs down and ask if the explanation helped or, if not, why they think the evidence does not connect to the claim. Repeat this for as many claims as time allows.
Part 3 – Peer Feedback

Introduce task:

Now you’ll work in pairs to review each other’s claim. You and your partner will trade binders. You will read your partner’s claim and write comments on a post-it and put it on their outline near their claim. Write your initials on the post-it so your partner will remember who wrote it.

Have students take out Peer Feedback 1 under Tab 4.

This page will help you decide what to write. Ask yourself the questions and try to write helpful suggestions.

Remember that your job as reviewer is to give honest feedback to try to help your partner improve their claim.

Peers review claims and discuss comments:

Have students pair up and trade binders. Tell them that, when they both finish writing comments, they should get together and talk about the feedback they gave each other. While students are working, circulate and provide your own feedback.

---

Feedback

Potential issues to watch out for:

- Reviewers writing yes or no instead of actual comments.
- Reviewers writing only positive comments about a weak claim. (They may be reluctant to criticize, or they may not recognize the need for improvement.)
Evidence 1a
(How I know it’s true)

Evidence 2a
(How I know it’s true)

Evidence 1b
(How I know it’s true)

Evidence 2b
(How I know it’s true)
Outline Map on Front
Counter-Reason
(A reason that goes against my argument)

goes against

Rebuttal a
(How I know it’s false)

Rebuttal b
(How I know it’s false)
Reason 3
(Why I believe it)

Evidence 3a
(How I know it’s true)

Evidence 3b
(How I know it’s true)
(This form is under Tab 4 in the student notebook.)

# PEER FEEDBACK 1

- Read the author’s claim and provide feedback by writing comments that answer the questions below.
- Write your comments on a post-it and place it on the author’s outline near the claim.
- Add your initials to the post-it so your partner will remember who wrote it.
- Honest feedback can help your partner improve their essay.

**Essay prompt:** What policy should your school follow about team sports?

<table>
<thead>
<tr>
<th><strong>Question 1 – Do you understand exactly what the claim is saying?</strong></th>
<th><strong>You could write something like:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>If your answer is:</td>
<td></td>
</tr>
<tr>
<td>yes</td>
<td>Your claim is clear.</td>
</tr>
<tr>
<td>kind of</td>
<td>Try to make your claim a little clearer.</td>

<td>Will probably be hard to support.</td>
</tr>
</tbody>
</table>
Lesson 8 – Begin Argument Outline

Bird’s Eye View

**Review Types of Evidence (Part 1) – 10 minutes**
This lesson begins with a brief review of the three types of evidence and an examination of text evidence.

**Teacher Models Outline (Part 2) – 10 minutes**
The teacher then models outlining a claim, reasons and evidence.

**Students Begin Outline (Part 3) – 20 minutes**
Students then start working on their own argument outline.

**Part 1 – Review Types of Evidence**

List types:

*Do you remember the three types of evidence we identified in the Junk Food Wars unit?*

Help students remember the following:

- **Expert opinion** is a quote from a person who knows about the topic.
- **Facts** include results from studies and surveys as well as statistics from government and agency reports, news articles, etc.
- **Examples** are stories and program descriptions that illustrate the author’s idea.

Discuss text evidence:

*As readers, we need to decide whether the evidence an author provides is convincing. And as writers, we need to provide evidence that our readers will find convincing.*

Have students take out the PRO and CON texts and the Assorted Evidence table. Ask them to examine the evidence sources in the text and identify evidence they found convincing.

*I’d like some volunteers to describe a piece of evidence that you found convincing, then tell us why you found it convincing.*

Call on several students, then conclude that deciding if evidence is convincing or unconvincing depends partly on whether you trust the source. It also depends on your perspective. The same evidence may be convincing to some people but not to others.
Information
In Part 2, you will use large post-its to model the process of outlining an argument. Sample post-its are shown below, and a completed outline can be found on page 4.

Part 2 – Teacher Models Outline
Introduce modeling activity:

*Today you’re going to start working on your outline. I’ll walk you through part of the process with my own outline.*

Read your claim:

Hold up and read your claim then place it on the chart.

Add first reason:

*My first reason is this:* (Read it aloud.)

*What does this have to do with my claim?* (It explains why you believe it. The school should encourage all kids to play team sports because it will keep them active and healthy.)

Add it to the chart.

Add second reason:

*How about this one?* (Read Reason 2.)

*Does this fit? Does it explain why I believe the school should encourage all kids to play team sports?* (Yes. The school should promote team sports because they can help kids do well in school.)

Add evidence:

*I’m trying to decide between two pieces of evidence for my first reason.*

Hold up both post-its and read them aloud.

*Evidence 1a*  
Georgia: More likely to exercise & eat healthy foods.  
[pro: 30-33]

*Evidence 1a*  
Arizona: Less likely to smoke, drink, cheat, steal, etc.  
[pro: 38-42]

*What do you think? Which one should I use and why?*

Guide students to select the Georgia study because it more directly shows that playing sports keeps kids active and healthy. Add the Georgia evidence to the chart.
Take a look at the Assorted Evidence table. I’d like to use piece #4 in my essay. How can I fit that into my argument?

| 4 | Researchers from the University of Illinois surveyed 2300 high school students. The survey asked about students’ experiences in different types of activities, including drama and music groups, volunteering, faith-based activities, and sports. They found that sports help students learn to set goals, work hard, solve problems, and manage their time. |

Guide students to agree that it supports your second reason because setting goals, working hard, solving problems, and managing your time are all important skills for doing well in school.

I have more to add to my outline, but I want you to have the rest of the period to work on your own outline. I’ll finish mine while you’re getting started.

Part 3 – Students Begin Outline

Review criteria:

Have students turn to the outline template under Tab 4. Remind them that the first three pages show the pieces they are required to include in their essay. The last page is for extra credit, if they want to include a third reason.

Evidence needs to have a source. You need to tell who said it or where you got your information so your readers can decide whether it’s convincing. This is especially important if you use additional evidence from outside sources.

When you write post-its for evidence, don’t just copy sentences from the text. Write a brief description and include line numbers. That way you can go back to the text for details when you’re writing your essay.

Students begin outlines:

Give students the rest of the class period to begin planning their argument. While they’re getting started, add the remaining post-its to your model outline, then circulate and provide feedback.

Feedback

Potential issues to watch out for:

- Individual post-its include multiple ideas (e.g., claim & reasons).
- Sentences are copied from the text rather than briefly described.
- Evidence post-its don’t include line numbers.
- A reason doesn’t explain the claim.
- A piece of evidence doesn’t support its reason.
Sample Outline for Teacher Model

**Claim**
The school should encourage all kids to play team sports.

**Reason 1**
Playing sports keeps kids active and healthy.

- **Evidence 1a**
  Georgia: More likely to exercise & eat healthy foods.
  [pro: 30-33]

- **Evidence 1b**
  CDC: Exercise keeps kids healthy.
  [AE table #14]

**Reason 2**
Playing sports helps kids do well in school.

- **Evidence 2a**
  YES: Learn to work hard & manage their time.
  [AE table #4]

- **Evidence 2b**
  HSB: Girls who play sports do better in science.
  [AE table #13]

**Counter-Reason**
Sports can make kids too competitive and focused on winning.

- **Rebuttal 1**
  CET: Trains coaches to focus on improvement rather than winning.
  [pro: 56-58]

- **Rebuttal 2**
  [AE table #1]
Lesson 9 – Finish Outline

Bird’s Eye View

Counter-Reason Practice (Part 1) – 10 minutes
This lesson begins with a brief activity in which students generate counter-reasons and rebuttals in response to ideas from other students.

Students Finish Outline (Part 2) – 30 minutes
Students then finish their own argument outline.

Part 1 – Counter-Reason Practice
Review definitions:

Today we will talk a little more about counter-reasons. A counter reason is a reason that goes against your argument. Why would you want to use a counter-reason?

A counter-reason allows you to anticipate ideas from readers who disagree with you and gives you a chance to argue back.

What’s it called when you argue against the counter-reason?
Rebuttal.

A counter-reason is a reason that goes against your argument. A rebuttal is evidence that shows the counter-reason is wrong.

Introduce task:
Writing a counter-reason and rebuttal can be a little confusing because you bring up an idea that goes against your argument and then you argue against that idea. So we’re going to practice coming up with counter-reasons and rebuttals as a class.

Guide discussion:
Ask one student to present their claim and a reason. Ask another student to pose a counter-reason that challenges the argument. The first student can then provide a rebuttal or call on a friend to provide one. Repeat this for as many arguments as time allows.

Part 2 – Students Finish Outline
Remind students that their essay needs to have:

- A claim that responds to the writing prompt.
- Reasons that explain why you believe your claim.
- Evidence that shows each reason is true.
- A counter-reason that goes against your argument.
- A rebuttal that shows the counter-reason is false.
Give students the rest of the class period to finish their outline. While they are working, circulate and provide feedback. The focus at this point should be on writing clear, logical notes for all elements (claim, two reasons with evidence, counter-reason and rebuttal).

**Feedback**

Potential issues to watch out for:

- Outline includes two very similar reasons.
- A reason doesn’t explain the claim.
- The same evidence is used for more than one reason.
- A piece of evidence doesn’t support its reason.
- Individual post-its include multiple ideas (e.g., reason & evidence).
Lesson 10 – Language of Explanation

Bird’s Eye View

Examine Models (Part 1) – 15 minutes
This lesson begins with students examining PRO and CON text examples of language authors use to explain how their ideas connect.

Use Language of Explanation (Part 2) – 25 minutes
Students then use the language of explanation to create sentences that connect different pieces of evidence.

Part 1 – Examine Models
Review connections:

What do you do when you explain something? (Allow a few students to answer.)

In Lesson 6 we talked about how everything in an argument needs to connect back to the claim. Making those kinds of connections is basically an explanation of how ideas fit together. So we had two ideas:

• breakfast is important, and
• low blood sugar can make you drowsy.

We connected those ideas by explaining that not eating breakfast can cause low blood sugar, which can make you drowsy. So eating breakfast is important for keeping alert.

(Use this or wording from student responses:) “Explain” means to make something clear or easy to understand.

When you make connections you show how some idea or information is related to something else – that’s how you make it easy to understand.

Today we will talk more about connections and the language authors use to make connections.

Introduce first example:

First, let’s look at the CON text that Grace Young wrote. (Point to the CON map.) We can check our map and see that Young’s claim was that team sports can keep kids from developing good character. She provided three reasons for this and evidence to support each reason.

But Young didn’t just give us her reasons and evidence. She did something else that helped make her argument effective. Read the paragraph that starts on line 27. See if you can find the sentence where Young connects her evidence back to the reason.
What two phrases did Young use to let us know that she was talking about both pieces of evidence in this paragraph?

- taken together
- the two studies

Draw a box around those two phrases.

What verb did she use? (show) Underline the verb show.

So what do these two studies show?

Guide students to see that she ended the paragraph by telling us that the two pieces of evidence connect right back to her reason.

Students examine models:

Let’s look at the PRO text that Robert Fuller wrote. Examine the four middle paragraphs, between lines 6 and 72. In each paragraph, find the sentence that connects his evidence back to the reason. Draw a box around the words the author uses to tell you what evidence he’s talking about. Underline the verb.

Give students 2-3 minutes to finish.

PRO, lines 20-21

Both surveys provide evidence that playing a team sport helps young people learn positive values.

lines 33-36

The Department of Education and the Georgia studies provide a great deal of evidence that young people learn to make good choices when they play team sports.

lines 49-50

All of this evidence shows that sports help young people stay out of trouble.

lines 70-72

These studies show that, by focusing on effort and improvement, coaches can help players feel competent and build self-esteem.

What words did Fuller use to let us know that he was talking about all the evidence presented in the paragraph?

Students should identify the boxed phrases: “Both surveys,” etc.
Lesson 10 – Language of Explanation

What verbs did he use? (provide, show)

What other verbs could we use? These studies tell us. These studies .... what?
Record responses on the board. (Examples: demonstrate; indicate; suggest.)
If students need help, start writing a word letter by letter until they complete it.

So our authors write something like, “These studies show,” and then what do they do?
(Read the first PRO example, lines 20-21.) What does he do in the rest of that sentence?
Guide students to see that the author rephrases the reason this paragraph is about.

What about this one? (Read the third PRO example, lines 49-50.)
Guide students to see that, here, the author rephrases the reason in a way that summarizes the two studies.

What about this one? (Read the CON example.)
Guide students to see that this author repeats the reason, then summarizes the first study by saying “on the field” and the second by saying “in life.”

Part 2 – Use Language of Explanation
Introduce task:
Have students turn to the Assorted Evidence table under Tab 1 in their binders.

Now let’s try our hands at explaining connections. Look at numbers 4 and 11. Do they seem similar to you? What sentence could you use to explain what they show?
Give students a chance to consider this, then call on a couple of students. If they have strong responses, work from theirs. Otherwise offer the following:

**Taken together, these studies suggest that playing team sports can help students learn the kinds of work habits that lead to better grades in school.**

How about 1 and 12? How could you explain what they show?

| 4 | Researchers from the University of Illinois surveyed 2300 high school students. The survey asked about students’ experiences in different types of activities, including drama and music groups, volunteering, faith-based activities, and sports. They found that sports help students learn to set goals, work hard, solve problems, and manage their time. |
| 11 | A study described in School Counselor examined the grades of 123 high school students who played soccer one semester and did not play a sport the following semester. They found that their grades were significantly higher during the soccer season than during the off season. |

| 1 | Quote from Lisa Harper, mother of an 11-year-old who has played soccer since age 7: “We’ve seen our daughter and her teammates learn how to work together. They respect the uniform and one another. They know what it means to work for something beyond themselves.” |
| 12 | The 2002 National Youth Survey of Civic Engagement shows that young adults who played sports in high school are more likely than non-athletes to watch the news, register to vote, volunteer, and participate in fundraising events and public meetings. |

Use the following as needed:

**Both the quote and the survey indicate that students who play team sports learn to cooperate with others and be unselfish.**
Students explain connections:
Have students create an explanation that connects #2 and #8, and another for #7 and #14.

<table>
<thead>
<tr>
<th></th>
<th>A survey by i9 Sports found that most mothers of sports players are stressed by their child’s participation in sports, and over half said it caused stress for the entire family. Almost 90% said the stress was due to schedule conflicts and about 60% blamed money issues.</th>
<th>Researchers from the University of Ottawa reviewed 185 studies of young athletes and their families. They found that parents often pay thousands of dollars for sports fees, equipment, uniforms, and other costs.</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>8</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th></th>
<th>A study described in <em>Youth &amp; Society</em> followed 1800 young people from sixth grade until age 25. They found that most children who play sports continue to be active in sports and fitness activities as adults.</th>
<th>According to the Center for Disease Control, regular physical activity helps children build strong bones and muscles, reduces the chance of being overweight, and promotes emotional health.</th>
</tr>
</thead>
<tbody>
<tr>
<td>7</td>
<td>14</td>
<td></td>
</tr>
</tbody>
</table>

They can work in pairs or teams if that is preferable.

Give students 5 minutes to work, then take a few responses.

Use the following as needed:
- **2 & 8** – The two pieces of evidence demonstrate that sports equipment can be very expensive, and spending all that money can cause stress for families.
- **7 & 14** – Together, the two pieces of evidence suggest that playing sports can keep kids active and healthy throughout their lives.

Conclude lesson:
To make connections, we need to ask, “What do these ideas have in common?” and then explain that relationship.
Lesson 11 – Begin First Draft

Bird’s Eye View

Peer Feedback (Part 1) – 15 minutes
This lesson begins with students meeting in pairs to review each other’s outline and provide feedback.

Teacher Models Outline to Draft (Part 2) – 10 minutes
The teacher then models the process of using an outline to write a first draft.

Prepare Students for Writing First Draft (Part 3) – 15 minutes
The teacher then goes over the essay requirements and students start working on their first draft.

Part 1 – Peer Feedback
Introduce task:

Now you’ll work in pairs to review each other’s outline. You did this before with the claim. This time you will examine the whole outline. Write your comments and your initials on post-its and put them on the outline near the item your comment is about.

Have students take out Peer Feedback 2 under Tab 4.

This page will help you figure out what to write. Try to write suggestions that will help your partner improve their outline. Also, you are not limited to the comments in the table. If you think of suggestions that aren’t listed, you’re welcome to include those as well.

Peers review outlines and discuss comments:
Have students pair up and trade binders. Give them 5 minutes to examine the outline and write comments, then have them meet and talk about the feedback they gave each other.

Information

In Part 2, you will walk students through the process of using an outline to write a first draft. Students will examine two paragraphs that are based on two sections of your model outline. Have your outline handy so students can compare it to the draft.

Part 2 – Teacher Models Outline to Draft
Introduce modeling activity:

Now you’re ready to use your outline to write your first draft. I think it would be good to go through a little of this process together. I’d like you to take a look at part of my first draft, and we’ll talk through some of the things we need to think about when moving from an outline to a rough draft.
Lesson 11 – Begin First Draft

Have students turn to the Teacher’s Model Draft under Tab 5 in their binders.

Model first reason and evidence:
*These two paragraphs are based on two sections of my outline.*

Read or have a student read the first sentence of Paragraph 1.

**Draft, Paragraph 1**

One reason the school should promote team sports is because it can help students stay active and healthy. A survey of high school students in Georgia found that sports players are more likely than non-players to use seatbelts, get regular exercise, and eat healthy foods. Moreover, the Center for Disease Control says that regular physical activity helps children grow physically strong and emotionally healthy. Together, these two pieces of evidence show

**Which section is this paragraph about?**

Students should recognize that the first paragraph describes Reason 1 and its evidence.

**The first sentence is Reason 1. How is the draft different from the outline? Why do you think I changed it?**

Help students see that the sentence starts with “One reason,” which clearly signals this as your first reason. The next part restates your claim, and the last part is a slightly more formal version of Reason 1 than the outline.

Read or have a student read the second sentence.

**How is this sentence different from Evidence 1a on the outline?**

Guide students to see that you went back to the text and added more detail to the description. For example, instead of “Georgia,” the draft describes it as a “survey of high school students in Georgia.” Also, the draft adds more details about healthy things sports players are likely to do.

**Read the third sentence. How is it different?**

Students should recognize that you started with “moreover” to signal that this sentence provides more evidence for the same reason. The draft version also spells out name of the CDC and provides a more complete and formal description of the evidence.

**The last sentence isn’t on the outline. Why did I add it?**

Help students understand that this sentence explains how the evidence connects to the reason.
Model counter-reason and rebuttal:

*Read the first sentence of Paragraph 2. What’s going on in this paragraph?*

Help students recognize that this paragraph contains your counter-reason and rebuttal.

**Draft, Paragraph 2**

Some people say sports make children too competitive. However, programs like Coach Effectiveness Training teach coaches to focus more on improvement than winning. This helps players work together instead of competing with each other. Similarly, Lisa Harper says playing soccer taught her daughter to work with her teammates and respect them. Both pieces show that sports can teach

*What word did I use to start the second sentence? Why?*

Students should understand that you start with “however” to signal your rebuttal, which goes against the counter-reason.

*Read the second sentence. How is it different from the outline?*

Students should see that it spells out the name of CET and identifies it as a program.

*Read the third sentence. What does it add?*

Help students see that it adds information about how coach training can make players less competitive.

*Read the fourth sentence. How is it different from the outline?*

Guide students to agree that the draft’s description of what soccer teaches (“work with her teammates and respect them”) is a stronger contrast with “competitive” than the outline’s description (“respect and teamwork”).

*The last sentence isn’t on the outline. Why did I add it?*

Help students recognize that you want to make sure your readers understand how your rebuttal shows the counter-reason is false.
Part 3 – Prepare Students for Writing First Draft

Describe writing task:

*Turn to the Self Checklist under Tab 5. You will complete this form when you finish your final copy. Let’s read it together to remind us what you need to include in your essay.*

After reading through the checklist, have students turn to the draft paper, which is under the checklist. Remind them that this paper is designed to provide lots of space for revisions. If they write on every other line, they’ll have room to cross out segments and write their changes above them.

Remind students that this is just a rough draft and that it’s not supposed to be perfect. Encourage them to get their ideas down on paper quickly so they’ll have plenty of time to revise. Tell them you will be giving them feedback while they’re working on their drafts and revisions.

If time remains, give students the rest of the class period to begin their first draft. While they are working, circulate and see that they are off to a good start.
PEER FEEDBACK 2

- Examine the author’s outline and write comments that answer the questions below.
- Write your comments and your initials on post-its and place them on the author’s outline.
- Honest feedback can help your partner improve their essay.

Essay prompt: What policy should your school follow about team sports?

<table>
<thead>
<tr>
<th>Question 1 – Is there a clearly stated claim that addresses the prompt?</th>
</tr>
</thead>
<tbody>
<tr>
<td>If your answer is:</td>
</tr>
<tr>
<td>yes</td>
</tr>
<tr>
<td>no</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Question 2 – Are there at least two different reasons that clearly explain why the author believes the claim?</th>
</tr>
</thead>
<tbody>
<tr>
<td>yes</td>
</tr>
<tr>
<td>no</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Question 3 – Is there at least one piece of text evidence to support each reason?</th>
</tr>
</thead>
<tbody>
<tr>
<td>yes</td>
</tr>
<tr>
<td>no</td>
</tr>
</tbody>
</table>

<table>

<td>One reason the school should promote team sports is because it can help students stay active and healthy. A survey of high school students in Georgia found that sports players are more likely than non-players to use seatbelts, get regular exercise, and eat healthy foods. Moreover, the Center for Disease Control says that regular physical activity helps children grow physically strong and emotionally healthy. Together, these two pieces of evidence show that playing sports can help students develop healthy habits and stay fit. Some people say sports make children too competitive. However, programs like Coach Effectiveness Training teach coaches to focus more on improvement than winning. This helps players work together instead of competing with each other. Similarly, Lisa Harper says playing soccer taught her daughter to work with her teammates and respect them. Both pieces show that sports can teach cooperation rather than competition.</td>

Lesson 12 – Work on Draft

Students Work on Draft
Tell students they have the entire class period to work on their essay. Remind them that this is just a rough draft, and it doesn’t need to be perfect. Encourage them to get their ideas down quickly so they’ll have plenty of time to revise. When they finish their draft, they should go back to the Self Checklist and make sure they have everything.

While students are working, circulate, give feedback, and share examples.

Feedback
Students will need feedback throughout the writing process. Some of this can be done in walk-arounds during class, but you may need to collect notebooks and check some students’ work between lessons. If several students are struggling with the same issue, you might pull a group for a quick conference or interrupt the whole class for a mini-lesson.

As you circulate, be on the lookout for good sentences to share with the class. Try to find an example of each of the following and stop the class briefly to share:

- A strong opening sentence.
- A reason that fits the claim.
- Evidence that fits the reason.
- A sentence that explains how evidence supports a reason.
Lesson 13 – Finish Draft

Bird’s Eye View

Teacher Describes Marking (Part 1) – 10 minutes
To begin this lesson, the teacher helps students understand how to mark argument elements and how to interpret the marks.

Students Finish Draft (Part 2)
Students then finish the first draft of their argument essay.

Peers Mark Essays (Part 3)
Students who are finished meet in pairs to read each other’s draft and mark the elements.

Students Begin Revisions (Part 4)
Students then begin revising their rough draft and preparing to write their final essay.

Part 1 – Teacher Describes Marking

Today you’ll finish your rough draft. Then you’ll trade essays with a peer. You will read your partner’s rough draft and mark the elements. When you get your essay back, the marks will help you see if you have included all the parts you need to include.

Have students turn to the Sample Marked Essay under Tab 5.

This sample shows how to mark the essay. In Unit 1, you only marked the claim, reasons, and evidence. In this essay, you’ll also mark the counter-reason, rebuttal, and conclusion. If needed, help students understand how to mark each of the elements:

- Claim = C
- Reason = R1, R2, etc.
- Evidence = E1a, E1b, E2a, etc.
- Counter-Reason = C-R
- Rebuttal = reb
- Conclusion = conc

If your essay looked like this after your partner marked it, what would you need to do?
Students should recognize that, since there is no evidence for Reason 2, they would need to add evidence for that reason. They should also move each reason and its evidence to a separate paragraph.

When you get your marked essay back, you can get started on revising your draft.
Part 2 – Students Finish Draft
Encourage students to finish their rough draft as quickly as possible so they’ll have plenty of time to mark their partner’s essay and get started on revisions.

Part 3 – Peers Mark Essays
As students finish their rough draft, have them pair up and trade essays. Tell them to read their partner’s essay and mark the elements.

Part 4 – Students Begin Revisions
When peers finish marking essays, they can begin revising their draft and preparing to write their final essay.

Feedback
You will need to provide feedback throughout the writing process. If several students are struggling with the same issue, you might want to pull a group for a quick conference or interrupt the whole class for a mini-lesson.

Potential issues to watch out for:
- Claim is vague or doesn’t respond to the writing prompt.
- Reasons are unclear or don’t explain the claim.
- There are no explanations connecting evidence to reasons.
- Sources of evidence are not provided.
- Essay is not divided into paragraphs.
- A paragraph contains multiple big ideas.
- Conclusion doesn’t connect back to the claim.

By the end of this lesson, all students should be finished with their first draft. Students who are behind may need to come in during a free period or at lunchtime to work on their essays.
My school should not have a team sports program, and here's why.

One reason is because kids can get hurt playing sports. The National Center for Sports Safety says that 3.5 million kids are treated for sports injuries each year.

Another reason is because uniforms, equipment, and fees can be very expensive.

A third reason is that it can be hard on families. In a 2010 Sports survey, most moms say their whole family is stressed by the sport, mostly because of time and money issues. This shows that families can suffer when kids play sports. Also, some coaches teach players to cheat without getting caught.

Supporters claim that sports build character. But that isn't really true.

Writer Mark Edmundson says that many athletes are bullies who "like to humiliate their foes." This shows that sports actually do the opposite of building character. In conclusion, middle schools should not have sports teams because kids can get hurt, it can be expensive, and it can stress their family.
Lesson 14 – Begin Final Essay

Bird’s Eye View

Review Requirements (Part 1) – 5 minutes
This lesson begins with a brief discussion to review essay requirements.

Revision Ideas (Part 2) – 10 minutes
The teacher then offers ideas to help students begin revising, and students identify revisions needed in the sample marked essay.

Students Begin Final Essay (Part 3) – 25 minutes
Students then start working on the final version of their argument essay.

Part 1 – Review Requirements
At this point, most of you are ready to revise your first draft and write your final essay. You have the Self Checklist to guide you, and there is also a scoring rubric.
Have students turn to the Scoring Rubric under Tab 5.

Let’s briefly look at this rubric together.
Point out that the category “Connections” was not included in the scoring rubric for Unit 1. To earn full credit for this essay, students need to add sentences that explain how evidence connects to a reason or how a reason connects to the claim. They can also earn bonus points for a third reason and for originality of ideas.

Part 2 – Revision Ideas
Some of you may know exactly what you want to change and how you’re going to change it. But others may not be sure. If you need help getting started, here are a couple of things you might try:

- Read each paragraph and make sure it has one big idea that connects to your claim.
- Within each paragraph, read each sentence and make sure it connects to that paragraph’s big idea.

Let’s try these out on the sample essay that we looked at in Lesson 13.
Have students turn to the Sample Marked Essay under Tab 5.

Does each paragraph have one big idea that connects to the claim?
Students should recognize that the first paragraph has several big ideas. Each reason and its evidence should be in a separate paragraph. The claim and conclusion might also be moved to separate paragraphs.
Lesson 14 – Begin Final Essay

Look at the sentence between the rebuttal and conclusion.

This shows that sports actually do the opposite of building character.

What is the author doing with that sentence?

Help students understand that the author is explaining how the rebuttal shows that the counter-reason is false.

How about the sentence after the evidence for Reason 3.

This shows that families can suffer when kids play sports.

Why did the author write that sentence?

Students should recognize that the author is explaining how the evidence shows that Reason 3 is true.

What about the next sentence?

Also, some coaches teach players to cheat without getting caught.

Why did the author include it?

Guide students to understand that it provides evidence that could connect to the claim, but it doesn’t connect to any of the author’s reasons. The sentence should be deleted or moved to a new paragraph with a new reason that connects it to the claim.

Part 3 – Students Begin Final Essay

You’ll have the rest of the class period to revise and start writing your final essay. You have two sheets of single-lined paper in your binder. I have more if you need it.

When you finish your essay, you will need to complete the Self Checklist.

Give students the rest of the class period to work on their essays. Remind them that they should first mark up their rough draft to plan their revisions before writing their final essay. While they are working, circulate and give feedback.

Feedback

All students should be working on revisions or final essays. Students who are behind may need to come in during a free period or at lunchtime to work on their essays.
<table>
<thead>
<tr>

Lesson 15 – Finish Essay

Bird’s Eye View

**Students Finish Essay (Part 1)**
This lesson begins with students completing the final version of their argument essay.

**Essay Presentations (Part 2)**
If time permits, volunteers present their essays to the class.

Part 1 – Students Finish Essay

You have the whole period to finish your essay and complete the Self Checklist. If most of you are finished ahead of time, we’ll ask for volunteers to present your essay to the class.

While students are working, circulate and give feedback. As students finish, ask if they would like to read their essay to the class.

Part 2 – Essay Presentations

Invite students to read their essay. After each essay is read, encourage the class to ask questions or offer feedback. You may need to model this for your students. Sample questions and comments:

- What was the hardest part of writing this essay?
- Did your claim or reasons change from your outline to your final version?
- How did you decide what evidence to use?
- I like how you use signal words to help us follow your argument.
- You do a great job of explaining how your evidence supports your reasons.
