TECHNICAL SPECIFICATIONS

Feature

Benefit

Dual Height

2 working heights offers the flexibility of 23Ltrs or 28Ltrs fill capacity

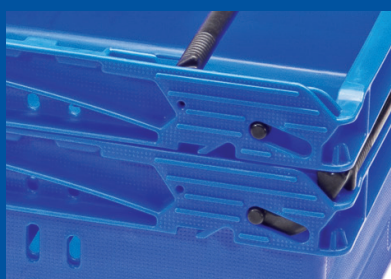

75% Deep Nest

Nesting to a quarter of its height reduces road transport costs and optimises available storage space

Interlocking horizontal Ribs and strapping lugs

Ribs help stop crates riding upon each other. Corner strap retainers encourage the use of strapping to further secure loads

Positive lock stacking bars and base

Ribs on stacking bars lock into grooves in the base of the crate above to prevent sideways movement

No sharp edges with either vented or solid base options

Ventilation slots optimise airflow and a completely smooth interior limits bruising and tearing (Solid base option holds 5Ltrs of liquid)

Stippled exterior surface and robust ID card holder

Stipple makes it easy for auto wash systems to completely remove self adhesive labels, a hygiene plus where crates are used for food processing lines
