apple harvesting: FRONT PADDLES

The SFM Front Paddles are used to clear fruit into two rows ready for machine harvesting and are a quick and effective means of collecting loose fruit.

FEATURES:

Front tractor-mounted via a dedicated 3-point linkage

Hydraulically powered by the tractor’s own hydraulic system
NB: A flow of approx. 20L/min is required to operate the paddles

Clearing width of 2.4 meters applies, bespoke / larger widths are available

This item can be used in conjunction with the following equipment:
- Sabre / Mini-Sabre
- Tree Shaker
- Orchard Blower
- Orchard Arm

BENEFITS:

• A quick and effective means of windrowing loose fruit for mechanical harvesting
• Provides clear passage for tractor or other mechanised apple harvesting equipment
• Ensures quicker and easier apple pick-up
• Easily dismounted for storage when not required
