

LONG-RANGE GOALS FOR MIGHTY OAKS GROUP

Emotional: The emotional goals for this group are for the children to be able to express themselves freely and to encourage them to explore their surroundings. We will help them to achieve this by enforcing appropriate language and behavior. We also want to assist them with self-awareness and self-esteem, which will help them feel good about themselves and others.

Social: The social goals for this group are to encourage children to interact with peers in a group setting, as well as, one on one. There will be active participation between teacher and student to problem solve.

Cognitive: The cognitive goals for this group are to help children to actively participate in STEAM and other activities, which will require them to think about and ask questions as to why and how different things function and operate. They will be encouraged to experiment and explore different options.

Physical: The physical goals for this group are to participate in large and small muscle activities. These activities include various art projects and sports. We will prepare for each individual child's needs by offering these activities on a number of levels so that each child will excel at his/her own pace.

Communication: The communication goals for this group are to have the children exchange feelings and ideas through speech and writing. Our goal is to have them feel confident and comfortable in speaking to small and large groups of their peers.
