MAY 12TH  10AM - 12PM

COMMUNITY TREE PLANTING AT RESTORED CAMBRIDGE GREENWAY FLOODPLAIN
Adjacent to Jeffersonville Park and Ride

This tree planting represents the last step of the Cambridge Greenway Trail Bridge Replacement project. A mix of trees will be planted in the floodplain to stabilize the banks along the Brewster River and restore floodplain functions including flood control and wildlife habitat. This project is one of many planning efforts to make Cambridge, Jeffersonville, and the Lamoille Watershed a more resilient place to live.

Planting Sponsored by: Intervale, Lamoille County Planning Commission, Lamoille County Conservation District, Cambridge Conservation Commission, and the Cambridge Rotary Club, Lake Champlain and Tributaries Restoration Fund, One Tree Planted and Community Resiliency Organization

Open to ALL interested community members and volunteers

Bring shovels and pruning equipment if available

Please RSVP by Wednesday May 9th to Meghan Rodier, LCPC Regional Planner, at 802-851-6339 or email Meghan at meghan@lcpcvt.org
