

Mat Layton, Sales Professional

Mat first worked with solar panels in 2001, while serving in the United States Coast Guard. It was there that he developed his passion for renewable energy. After completing active duty he received his associate's degree in liberal arts and science from Nassau Community College.

Mat joined Sunpower by EmPower solar during the summer of 2008 as an Installer. He quickly became a Site Foreman and installed solar systems for the next 3 years. Mat then moved into the Service Technician position, which eventually led to his promotion to Service Manager. Mat is now concentrating on sales, and brings years of solar experience with him.

Mat is a proud husband and father, and has played guitar and sang in various Long Island bands over the years. He loves living in Long Beach, and enjoys traveling and being outdoors.

About SunPower by EmPower Solar

SunPower by EmPower Solar is an award-winning solar engineering and installation company in operation since 2003. The company has grown to over 65 skilled employees responsible for more than 1,500 high-performance installations across Long Island and New York City. EmPower provides rooftop solar, battery backup power, and electric vehicle charging stations for residential, commercial, and nonprofit clients.

SunPower by EmPower Solar's vision is a new energy paradigm powered by clean and renewable energy. The company is driven by the fundamental belief that renewable energy will lead to a more prosperous, healthy and civil world. Our mission is to EmPower our clients to control energy costs, reduce their environmental footprint, and achieve energy independence.

Our success stems from our commitment to the "EmPowering Way" philosophy: professionalism, teamwork, excellence, client focus, and commitment to clean energy.
