## Option 1: Standard Payment

Typically, we would take a 30% deposit as a commitment to the installation, then the remaining balance is taken upon completion of the installation

## Option 2: Easy monthly Payment Solutions

Typically, we would take a 10% deposit as a commitment to the installation; the remaining balance is then simply paid in monthly payments through direct debit. This would be after a successful completion of the quick and easy finance application process, under-written by Hitachi (UK) Plc
