

VERTICAL 4-TRACK STACKING WINDOW

# PORCH & PATIO ENCLOSURES

*Transform an unused place into your favorite space!*

## Do you wish you could spend more time enjoying the beautiful outdoors?

Betterliving's 4-Track Stacking Window System is a flexible solution for outdoor living. Easily slide the windows to stack up, down, or in the middle for refreshing breezes while keeping out the moisture, pollen, and insects. For a fully screened-in space, simply snap the windows out and relax or entertain without bugs.

The 4-track system is a versatile, attractive way to add comfortable outdoor living. It's custom designed to fit the openings of your porch or patio and create a weather-tight enclosure to protect you and your furnishings from the elements. Don't have a covered porch or patio? We'll add a durable patio cover and fill in underneath with Betterliving's 4-Track Stacking Windows, so you'll get more use out of your porch or patio from early spring through late fall.

- Keep your home cooler and reduce glare
- Adjust easily - stack up, down, or in the middle
- Easy to clean with soap & water
- Fixed panels available for kneewalls and transoms

- Widths up to 5 ft • Heights up to 8 ft
- Custom sized to fit existing openings
- Full fiberglass mesh screens
- High strength elastomeric vinyl glazing in lightweight panels that slide easily and provide 75% ventilation
- If distorted by accident, the vinyl film will return to normal in minutes
- Manufacturer's 5-year warranty
