FAMILY PHYSICIANS
Telehealth visits

To allow us to care for you in a manner that is more comprehensive than what a phone call allows, but that keeps you home and away from COVID-19, we have implemented telehealth visits. The Healow app allows you and your provider to have an appointment using video. The telehealth visit is HIPAA compliant to ensure your privacy. Call our office for more information. *Please note, you must be signed up with the patient portal to access a telehealth visit with your provider.*

For more information about the patient portal, click on the 'Patient Portal' link located on the main web page or call our office at 541-747-4300.
