"People seldom notice old clothes if you wear a big smile."

~ Lee Mildon

A WORD FROM DR. STEWART

The Benefits of Implant-Supported Dentures

Those with dentures know that they are difficult to wear. Did you know that dental implants can be used underneath removable dentures to eliminate many of the issues associated with denture wear?

Implant-Supported Dentures

An implant-supported denture is simply a type of over-denture that is supported by, and attached to, dental implants. While a regular denture rests on the gums, an implant-supported denture is used when a person has enough bone in their jaw to support dental implants. Four dental implants under an upper denture can hold it securely so that the size of the plate can be reduced, removing the palate from the denture altogether. Just two implants are all that's needed under a lower denture!

Non-removable implant supported dentures may be an option for those who don't want to take their dentures out every day. This option requires more dental implants than a removable implant denture. With non-removable implant supported dentures the denture is actually screwed onto the dental implants. The final result is a much more natural feeling with one's normal chewing forces completely restored... and you never have to take it out.

Patients at Smile Savers Dentistry say that the improved ability to chew their food is one of the biggest benefits of their implant-supported denture. Since the dentures anchor on the implants instead of merely resting on the gums, they allow patients to bite much harder with no discomfort. Another benefit of implant supported dentures – no messy adhesives!

If you would like to see if you are a candidate for implant-supported dentures, please call our office at 410-730-6460 and schedule a free consultation with Dr. Daniel Stewart during the month of May. Smile Savers Dentistry is looks forward to helping you keep your healthy teeth and gums for a lifetime. You can also request a dental appointment online.

Regards, **Dr. Stewart**

Staff Team-Building Getaway

Dr. Stewart and the Smile Savers Dentistry staff were joined by some of their spouses in April for a staff team-building getaway in Costa Rica. Dr. Stewart also attended Invisalign training, keeping up on new technology so that his patients get the best experience possible. He learned how the Invisalign trays are made and what the best techniques are to get the best results.

20th Annual Port to Fort 6K

Believe in Tomorrow's 20th Annual Port to Fort 6K was a huge success! We were happy to participate once again in the annual Port to Fort 6K to benefit the Believe in Tomorrow Children's Foundation. It was our third year running in the race and we look forward to doing it again next year. Thank you to our patients who donated to this great cause.

Smile Savers Dentistry Invisalign Success Story

"For the past couple of years I have been so self-conscious about my smile. I always hated the way it looked in pictures. The excellent staff at Smile Savers helped me through the Invisalign process. They have been so helpful throughout the whole process. Now I have a smile I can't wait to show, especially at my upcoming wedding! Thank you so much!"

- J.P., Savage, MD
