SMILE PROVOKING FUN FACTS

- No joke, 152 people in the U.S. are legally named LOL. Oddly most live in Wyoming.
- The average person laughs 13 times a day.
- German chocolate cake is named after it's creator, Sam German, not the country.
- Every year, March and June finish on the same day of the week.

A WORD FROM DR. STEWART

Invisalign Month is Here!

March is Invisalign month at Smile Savers Dentistry, and for this month only you can SAVE \$500!

Get healthier this year, and one way you can do this is by correcting your crowding so that your teeth will wear less and function better. Straight teeth are shown to be healthier because they are easier to clean. Invisalign is the best, least painful, and more predictable than any of the clear aligners on the market. I have been doing them for over ten years and have had some amazing results that have changed many patients lives. I think it is one of the most beneficial services I have delivered over my 34 year career.

If you are interested, or have been told that you need to have your bite changed, call this month and get started. We have great payment plans and the average time to complete treatment is usually less than a year.

Call us, or mention it the next time you are in and we can talk more about it.

In Health,
Dr. Stewart

BEFORE

AFTER

invisalign® did you know?

- You can easily remove Invisalign aligners whenever you eat, brush and floss.
- Invisalign aligners are custom made to fit your teeth and are different for each patient.
- Invisalign is made from thermoplastic that is durable, safe, and can stand the pressure required to align your teeth.
- Invisalign treatments are fairly invisible. To a general audience and cameras, they are undetectable.
- Invisalign does not irritate your gums once you start the treatment. They are very gentle and accommodating.
