A WORD FROM DR. STEWART

Sweets in Season

Spring is here... and so are the sugary treats. The usual dental recommendation for patients is to limit their sugar intake. Easier said than done, right?

Remember that it's not the amount of sugar that can cause decay, but the amount of time it stays in the mouth.

Natural bacteria that live in the mouth can mix with sugar and make a mild acid. This acid damages tooth enamel overtime, producing tooth decay and weakening teeth.

Enjoy your treats followed by some water, or better yet, a good brush.

In Health,
Dr. Stewart

APRIL IS ORAL CANCER AWARENESS MONTH

April is a month dedicated to bringing awareness to an often overlooked but serious disease. Oral cancer is the commonly used term by oral health professionals when talking about a variety of cancers that affect the oral cavity, including the tongue, lips, and throat. To keep you and your mouth healthy, it's vital that you schedule regular dental visits, we will look for any signs of oral cancer and check your overall oral health.
