## A WORD FROM DR. STEWART

### Never Ignore Tooth Pain and Discomfort!

We all know that feeling: a sudden toothache which may go away only to return again and again for longer periods of time. *If we ignore it, it gets worse!*

#### Here's why:

The human mouth is filled with hundreds of types of bacteria, some are good and protect our teeth and gums. Other bacteria are harmful and convert sugars into acids. These acids can lead to cavities, swelling around the tooth and infections.

A cavity left untreated, allows bacteria to enter the center of the tooth- and can spread to the tooth's root and underlying bone supporting it.

We are here for you. Our mission is to send you home with a healthy and beautiful smile! Don't wait to get help, the fix is probably easier than you think!

Prevention with regular cleanings and checkups are key to detect and treat the main causes of pain, swelling, bleeding gums or sensitive teeth.
