A WORD FROM DR. STEWART

Dental Fear

"I didn't go to the dentist because I didn't have insurance." This is what I hear often as the reason why patients neglect their oral health visits. It is interesting, but I don't believe that's the actual reason why. I believe it's fear caused by the unknown of what could be happening behind those lips!

We all have fears and they haunt us, but what is fear? I think it's when we are not actually living in the present looking at the situation, but imagining what we are seeing and filling it in with all of those *"what ifs?"*

Remember lying in bed and thinking there was a monster underneath? Dentistry is that monster lurking behind those lips. It becomes unconfontable, mysterious and painful the longer one stays away not in actuality but imagined. So excuses like time, money, and no insurance become the alibi. Did you know in all dental surveys done through the years the number one reason why someone doesn't go to the dentist is? It is fear and trust, not money or time or insurance. Actually they are the lowest on the list!

So how to cure this? Stay on schedule and keep informed on your oral health so there is no mystery. Or you can come in for our great new patient exam to find out for yourself what is actually going on in your mouth in a caring, comfortable and informative environment... and get rid of that monster under the bed!

In Health,
Dr. Stewart
