

WebAct Design Fulfillment on Duda

Your Needs

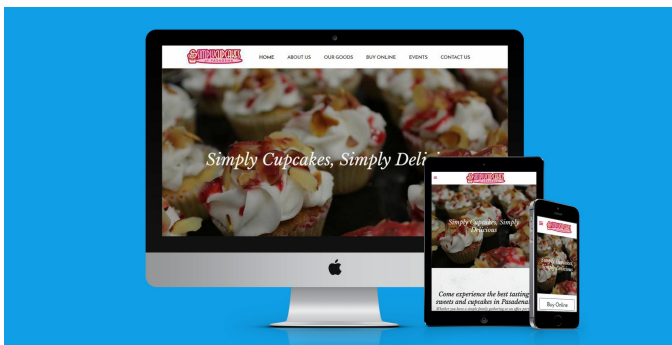

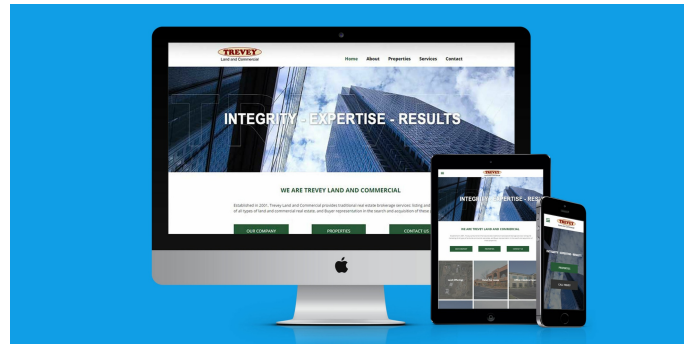

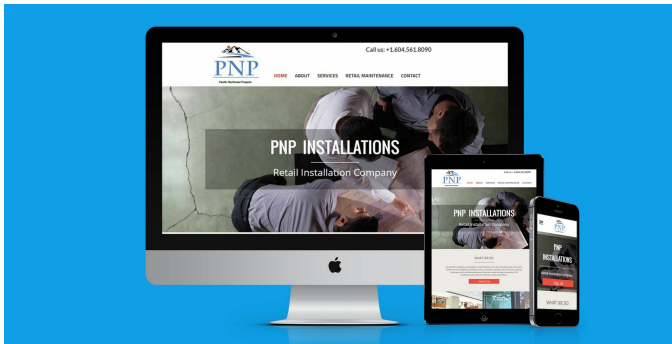

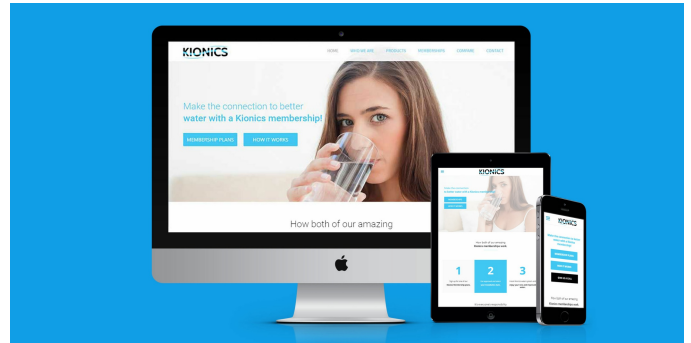

- You are currently a Duda Pro that is experiencing an increased need for website migration work to move your customers' websites to the Duda platform.
- You would like to focus on business development and sales, while an experienced, reliable partner fulfills your customers' orders.
- You want a U.S. based partner that does all of their work in house.
- You want a fair price.

About WebAct

WebAct is a premier web design and digital marketing firm located in Denver, Colorado. We are Duda's preferred fulfillment partner in the United States and work directly with Duda staff on a daily basis. Our team consists of eager, talented web designers, content creators, and marketing specialists who are experts on the Duda platform. We strive to create professional, user-friendly websites in the most efficient and cost-effective way possible.

Some Examples of Our Work

Our Process

Think of WebAct as your white labeled design team. Once you close a deal with your customer, you hand off the project to us, and we build the website on your Duda Pro dashboard. Here is our typical web design workflow:

- Web design content details (collected through our fulfillment form) and 50% deposit (billed to your account) are collected.
- WebAct design team works on first draft of the website.
- First draft completed within 7-14 business days (may be longer for larger projects).
- First draft preview link sent to you so you can send to your client to review.
- You communicate back and forth with your client and the WebAct team until all desired revisions are completed.
- *If you use our white labeled support, we can communicate directly to your customers via email during the revision steps.*
- Client is ready to make the website live.
- WebAct finalizes website by checking design elements on all devices, SEO titles, descriptions and keywords for each page, and setting up URL redirects as needed.
- WebAct collects remaining 50% of web design fees.
- WebAct assists with publishing website, including accessing advanced domain settings to edit the DNS Zone File. This step can happen by providing us a username/password to access the domain registrar's dashboard, or specific instructions can be provided.
- *If you use our white labeled support, we can communicate directly to your customers via email during the publishing steps.*
- The website goes live.
- WebAct adds SSL security certificate if desired.
- WebAct indexes website sitemap on Google and Bing Webmaster Tools.
