

Activities for people experiencing later stage dementia

This course is designed for frontline workers who are supporting people in the later stages of dementia.

The course can be redesigned and tailored to meet your specific requirements.

This one-day course **aims** to promote the principles of best practice in providing a therapeutic environment and meaningful engagement for individuals experiencing the later stages of dementia.

Learning outcomes

At the end of the course participants will be able to:

- Create therapeutic environments.
- Plan individual activity that appreciates a person's life story and interests.
- Provide meaningful activity and positive engagement.
- Identify strategies for integrating meaningful interaction into physical and/or nursing care.
- Demonstrate an understanding of the importance of oral hygiene and regular turning of individuals confined to bed.

This course can be redesigned and tailored to meet your specific requirements.
