

Changing the
Way You See

nu-bird.com

The nu-Bird suction mirror is the ultimate suction, viewing and retraction instrument created for dentists, hygienists and assistants. This amazing design combines both the mouth mirror and suction into one essential device.

Elegantly balanced,
light weight and easy to use.
Versatile, functional and
ergonomically designed.

“ It’s a dream to use
for HV evacuation
while offering clear
indirect viewing ”

Ideal Companion In The Office

See clearly the distals of the maxillary molars without mirror fog and efficiently control liquid debris.

Strong tongue retraction with high volume suction make it easy to access all areas in the mouth.

Clear View with indirect vision when using water spray on anterior teeth.

Patent design provides an exceptional 180° viewing while deflecting oral tissue away from the suction ports. Suction holes are located on the front in direct contact with the reflective surface and the back to keep water and debris off and away from the mirror for clear viewing.

Portable, ergonomically designed & offers mobility

Easily retract tight cheeks to access the distal buccals of the molars while managing pooling water.

Perfect for lower anterior teeth using indirect vision.

Easily inhales a full stream of water spray from 3 ft. away!

This high-volume instrument is used for suction, viewing, and retraction, ultrasonic scaling and sealant placement procedures. The design provides steady retraction of thick tongues and cheeks, allowing suction ports clear access.

Guaranteed To Out Perform All Others

We understand the needs and goals of both dentists and hygienists. Our in-depth experience as both dental hygienists and design manufacturers greatly influenced and contributed to the evolution of the suction mirror.

Our patented suction mirror is simply superior to any other on the market.

“Clinicians are now able to achieve a higher standard of care.”

KEY FEATURES AND BENEFITS

- Saves chair time
- Easy to use - provides comfortable handling
- Ergonomic design eliminates body fatigue
- Strong and steady retraction
- High volume suction capability
- Quickly removes pooling liquid
- Oral tissue won't plug suction ports
- Scientifically proven to reduce aerosols
- Clinically tested
- Improves patient comfort and quality of care
- Provides clear fog-free view with indirect vision
- Able to completely sterilize entire instrument
- Replaceable mirror faces
- Made from stainless steel
- Out performs all other similar devices
- Lifetime quality
- Made in America
