A VITA Company

2011

PRODUCT CATALOG

VITA®

Welcome to the 2011 Edition of the Vident, a VITA Company, Product Catalog

Dear Dental Professional:

You've come to rely on VITA as the industry benchmark for quality and consistency. VITA materials offer seamless compatibility and flawless fabrication, regardless of material type, and now VITA Made restorations enable you to maintain esthetic integrity without sacrificing simplicity and productivity. We invite you to explore our product offerings in this catalog and to embrace the future of efficiency with VITA Made restorations and quality VITA products: from the Easyshade Compact shade-taking device and Vacumat 6000M furnace to the next generation of VMK porcelain – VMK Master. And remember, if it's a VITA Shade, it has to be VITA Made!

For those who are not familiar with Vident... for 26 years we have prided ourselves on offering unique products of the highest quality, including the world renowned VITA line of shade determination and restorative products. We are different from broad-line dental dealers in that we focus on innovative, specialty products, sourced from around the world or developed here at Vident. Our products are designed for dental labs and dentists that want to save time, enhance productivity, and provide the most natural looking, reliable outcome for your clients. These products are supported by Vident's extensive technical support and professional education resources.

For those who are already Vident customers... thank you for your continuing business. We know it is important to earn your loyalty with each order you place. Vident continues to invest heavily to improve and increase availability of technical support and professional education courses.

***"We strive to be the best in all we do
with one single objective in mind:
helping you succeed."***

Fred Ketcho
President

Vident Culture Book

At Vident, we have a new culture book that contains our core beliefs and values as well as provides the foundation of how we make our decisions, all with the goal of satisfying our customers. It contains our main ideals like Honesty and Integrity, Trust, Anticipating Customer Needs, Educational Leadership and more.

We take our culture very seriously and look forward to demonstrating our devotion to you and our core beliefs every day. You can access a downloadable PDF at www.vident.com Or call us at 800-828-3839 USA, 800-263-4778 Canada and will send you a free copy.

VITA Easyshade® Compact

The all-new VITA Easyshade Compact delivers the fastest, easiest way to measure tooth shades under any lighting condition. Easyshade Compact gives you the ability to conquer the trickiest shade challenges all day, every day, instantly and accurately. Now you can measure natural teeth, check restoration shades and track bleaching progress with the push of a button.

The pressure of getting a perfect shade match has never been higher due to patients’ increased attention to esthetic appearance. The VITA Easyshade Compact quickly and precisely measures 16 VITA Classical Shades, 29 VITA System 3D-Master shades and even those hard-to-see intermediate shades. High esthetics with VITA materials has never been easier to achieve.

Measure a single central, check crown accuracy before seating, get a more detailed shade analysis with a detailed map – it’s all here with Easyshade Compact. And with built-in memory that stores the last 25 measurements, you never have to worry about forgetting the result. Plus, Easyshade Compact seamlessly integrates with VITA ShadeAssist software for a complete shade communication solution.

Select the appropriate measurement setting easily using the navigation buttons and easy-to-follow icons:

- Tooth single mode
- Tooth areas mode: maps the cervical, middle and incisal shades
- Verify restoration mode: check a restoration for shade accuracy
- Shade tab mode: practice proper placement of probe on VITA shade tab

VITA Easyshade Compact Unit
Order No. E75-201 \$2,295.00

Reorder Items

Infection Control Sleeves, 160 pk
Order No. E75-012 \$66.00

VITA ShadeAssist Software

VITA ShadeAssist software allows the dental professional to enter VITA shades manually or import them from the VITA Easyshade Compact. ShadeAssist allows the user to create a detailed prescription and case planning document that can be printed or emailed.

Case-related, importable photos provide the ability to adjust images with cropping and contrast tools for optimal display of critical characterization details. ShadeAssist also features the ability to draw a detailed characterization sketch and add notes.

ShadeAssist can be used as stand-alone software for case planning and patient data storage or in conjunction with the VITA Easyshade Compact for a complete digital shade solution.

VITA ShadeAssist Software
Order No. GX10-003..... \$99.00

Easyshade® Quality Manager Software

An efficient way to analyze the shade of ceramic restorations prior to staining and glazing. If shade correction is needed, Quality Manager recommends the necessary adjustment and can also provide a printed quality certificate. Easily connects to the VITA Easyshade for fast, accurate results.

Easyshade Quality Manager Software
Order No. GX10-002..... \$795.00

Easymatch™ Software

Easymatch Software saves time and money by predicting the optimal VITA 3D-Master shaded VITABLOCS before placing a milling block into your CEREC or Sirona inLab device.

Easymatch Software
Order No. GX10-001..... \$795.00
Patterson Order No. 706-8992

VITA Linearguide 3D-Master®

VITA Linearguide 3D-Master®

The all-new VITA Linearguide 3D-Master enables the quick determination of precise tooth shades and uses the same scientific principles found in the popular VITA 3D-Master shade guide. The Linearguide features a sleeker, linear design that makes the process of precise shade determination even faster and easier. In two simple steps the final shade is achieved, first by selecting from five value tabs, then by choosing the proper mix of chroma and hue within the selected value range.

The VITA Linearguide 3D-Master contains the same 29 shade samples as the VITA Toothguide 3D-Master.

- Advantages:
- Classic linear handling
 - Self-explanatory, simple use
 - Quick, reliable and precise shade determination
 - Modern design which reflects perfect esthetics and clear arrangement

VITA Linearguide 3D-Master
Order No. GX69-913..... \$229.00

VITA Bleachedguide 3D-Master

VITA Bleachedguide 3D-Master®

The new VITA Bleachedguide 3D-Master offers a true alternative to the traditional VITAPAN Classical shade guide, and sets a new standard for the planning and monitoring of the patient’s tooth whitening regimen. The VITA Bleachedguide 3D-Master also offers new intermediate shade tabs that are arranged specifically for measuring bleaching progress.

VITA Bleachedguide 3D-Master
Order No. GX69-911 \$103.00

VITA 3D-Master Shade Guide with bleached shade tab

VITA 3D-Master® Shade Guide

Dental professionals around the world have discovered precise and repeatable shade selection and improved communication using the VITA 3D-Master Tooth Guide. Based on true color science, shades can now be selected with incredible accuracy using a fast, efficient, three step process applying Value (lightness), Chroma (saturation), and Hue. VITA offers 29 shade tabs, including 3 bleached tabs in one autoclavable guide. The 3D-Master shade system is supported by VITA tooth-colored restorative and prosthetic materials used for the veneering of metal ceramics, densely-sintered zirconia and alumina, as well as indirect laboratory composites, denture teeth and direct micro-hybrid composites.

VITA 3D–Master Tooth Guide With Bleached Cartridge

VITABLOCS® Guide 3D-Master®

Improves the shade selection by matching Vitablocs shades faster. The new Vitablocs shade tabs offer a realistic shade and translucency that's relevant to the final restoration's appearance. All the shade tabs are fabricated from Vitablocs material. The new VITABLOCS Guide is based on the original VITA 3D-Master system, reproducing the three natural tooth shade dimensions of value, Chroma and Hue. VITA future-oriented for more than 80 years

Order No. GX69-920 \$103.00

VITA Simulate Color Indicator

Ideal for preparation shade choice and comparisons.

Order No. GX70-430 \$73.25

VITA Improved Classical Shade Guide

Order No. G68-990..... \$114.00

VITA has improved the VITA Classical Shade Guide to include additional features and benefits:

- The new holder is made with a stronger material which allows the entire guide (holder and tabs) to be autoclaved.
- Wider metal tabs increase the retention of the tab into the slots in the holder.

VITA VM®13

VITA's VM13 ceramic veneering porcelain offers outstanding physical properties, handling characteristics and, due to the homogeneous distribution of glasses in the fine microstructure, clinical wear characteristics that mimic those of enamel.

VM13 has a CTE of 13.1-13.6 x 10-6K⁻¹ and is ideal for veneering metal frameworks that have a coefficient of thermal expansion in the range of 13.8–15.2 x 10-6K⁻¹. It is also an excellent material for laminated veneers.

The revolutionary formulation of VITA VM13:

- Low wear rate
- Offers optimum firing stability, which preserves shades even after several firings.
- Has a low firing temperature and reduced shrinkage
- Offers excellent shade cover with the new higher chroma, higher opacity Base Dentines
- Matches dentition with accurate, consistent 3D-Master and Classical shades

Dental ceramists will marvel at its modeling characteristics and its structural and color stability through its firing cycles. Grinding and polishing has been made easier and more effective than most other porcelain systems. The esthetic build-up technique has been improved over historical systems by introducing a simpler, more logical approach to shading/layering.

	CP5	Burlywood	Green-brown

VITA VM13 COLOR OPAQUE			
	CO1	Gold	Orange
	CO2	Brown	Brown
	CO3	Lilac	Lilac

VITA VMK®Master Porcelain

This new third generation VITA VMK porcelain offers the lab technician, the dentist and the patient exceptional physical properties, handling characteristics and, due to its fine structure, clinical wear characteristics that mimic natural tooth enamel.

From simple minimal powder buildups to the more complex cases with individual characteristics, VITA VMK Master’s optimum firing temperature and chemical and physical properties make it suitable for veneering nearly all types of dental alloys, including non-precious. Working with the new VITA VMK Master offers some important advantages, including excellent working properties, improved modeling characteristics, easy and fast handling and minimal shrinkage. Accurate and outstanding esthetic results with traditional layering.

VMK Master offers a selection of additional porcelains, including Luminaries to enhance fluorescence, Translucent porcelains to reproduce the translucency of natural tooth enamel, Neck Modifiers to simulate the cervical third, Gingival porcelains to simulate tissue color, and Opal and Pearl modifiers to achieve true youthful and bleached teeth.

Available in VITA 3D-Master and VITA Classical A1 – D4 shades. A CTE of 13.1 – 13.6 x 10⁻⁶ K⁻¹, ideal for veneering metal frameworks that have a coefficient of thermal expansion (CTE) in the range of 13.8 – 15.2 x 10⁻⁶.

Titanium Porcelain

VITA Titanium Porcelain is matched to the specific material properties of titanium. The inherent versatile properties of titanium provide an incredibly biocompatible, corrosion-resistant coping that is lightweight, hypo-allergenic, mechanically strong (Vicker's hardness of 180-250, degree 1-4) and has low thermal conductivity. VITA Titanium Porcelain provides the proper coefficient of thermal expansion for titanium copings (9.6 x 10-6 K-1) and is available in both VITA 3D-Master and Classical shades.

VITA VM®9

VITA VM9 features desirable characteristics while satisfying the unique requirements of yttrium-stabilized zirconia. This 3D-Master and Classical shaded porcelain is compatible with VITA PM9 pressable ceramics, VITA's In-Ceram YZ Cubes for CEREC and many of today's zirconia substructure materials.

VITA VM®9 Low Fusing Add-On Powders

The low-fusing (780° C) VITA VM9 Add-On materials are particularly well suited for individualizing (layering technique) substructure-free VITA PM9 restorations. This material is based on the proven VITA VM9 veneering material, which enables the technician to reproduce shade nuances in a fast manner to achieve top-quality, esthetic restorations.

VITA VM 9 Add-On:

- Economic efficiency: The excellent stability during layering, minimal shrinkage and outstanding shade reproduction ensure economic processing.
- Natural shade effect: Thanks to its beautiful translucency, enamel-like refraction behavior, efficient polishability and excellent bond to the VITA PM9 base structure, VITA VM 9 Add-On materials create a natural interplay of colors.
- Reliable bonding (adhesion): VITA VM 9 Add-On materials have been perfectly matched with the VITA PM9 ceramic and easily achieve excellent, distortion-free sintered bond to the VITA PM9 base structure. As a result, permanent loadability and strength is ensured.

VITA PM®9

VITA PM9 is VITA's latest restorative material in the VM line of small particle, 3D-Master shaded porcelain systems with low wear rates. PM9 is an extremely versatile press-to-zirconia system that enables technicians to consistently produce beautiful, high-strength restorations.

Pressable VITA PM9 is based on the proven fine-structure ceramic VITAVM9 and is used for pressing to yttria-stabilized ZrO2 frameworks in the CTE range of 10.4 - 10.6 x 10⁻⁶, such as VITA In-Ceram YZ and other zirconium oxide substructure materials for natural looking high-strength anterior and posterior crowns and bridges.

VITA PM9 may also be pressed without the support of a zirconia sub-structure for the fabrication of single or multi-surface inlays, onlays, partial crowns, veneers and anterior crowns using the staining/glazing or layering technique. Restorations made from VITA PM9 can be easily characterized using the layering technique with the entire range of VITA VM9 ceramic materials or individualized (staining technique) with VITA Akzent or VITA Shading Paste stains. Each of the ten shaded pellets in the system is available in two levels of translucency.

VITA VM®7

VITA VM7, the first of the VITA VM fine-grain family, is made to veneer alumina substructures. With an average expansion (CTE) of 7, and formulated to accurately reproduce VITA 3D-Master shades directly out of the bottle, it is ideal to use with VITA In-Ceram Alumina, VITA In-Ceram 2000 AL, Spinell and Zirconia.

VITA In-Ceram®

The proven In-Ceram family of all-ceramic substructure porcelains includes three materials possessing differing properties. The phenomenal success rate (99%+) of the In-Ceram family of materials is unsurpassed by any other all-ceramic system. They do not require enamel/dentine bonding and their varying levels of translucency enable ceramists to deliver restorations that satisfy every esthetic restorative need.

In-Ceram Alumina is indicated for use with single unit anterior or posterior crowns and three-unit anterior bridges. This popular substructure ceramic offers a high level of translucency and a flexural strength of 500 MPa.

In-Ceram Spinell is indicated for single unit anterior crowns, with a very high level of translucency and a flexural strength of 350 MPa.

In-Ceram Zirconia, with its very high strength, is indicated for single unit posterior and three-unit posterior bridges. In-Ceram Zirconia has a moderate level of translucency and a flexural strength of over 700 MPa.

In-Ceram Alumina, In-Ceram 2000 AL, In-Ceram Spinell and In-Ceram Zirconia are also available in machinable block form for CEREC inLab and other milling systems.

In-Ceram Sprint offers the lab the ability to control the production of Alumina crowns (no waiting for copings in the mail). Though limited to single Alumina crowns, the end result is the same outstanding strength and esthetics of In-Ceram Alumina. In-Ceram Sprint is ready to sinter in about one hour and easily comes off the die in just twenty minutes.

In-Ceramat III® T Touchscreen Furnace

The Inceramat “high temp” sintering furnace is used for the In-Ceram technique as well as all prolonged high temperature sintering and glass infiltration requirements.

Features/Benefits

- High-heat quartz spiral muffle (rated 1200°C)
- 100 user-modifiable programs (10x In-Ceram pre-installed)
- Self-calibrates automatically after every 100 hours of use
- Firing table moves forward for easy access
- Fold-away twin cooling table
- Stainless steel construction
- Supplied complete with second muffle as back up
- 2 year warranty on parts and labor
- 1 year warranty on muffle

Order No. E98-051	\$7,425.00
-------------------	------------

Vitasonic Mixer

The Vitasonic is a special frequency controlled ultrasonic with highly precise timing to ensure that correct flow and maximum thixotropic properties are achieved with the VITA In-Ceram slip mixing process. 2 year warranty.

Order No. E98-004	\$690.00

VITA Akzent Stains

Developed by Claude Sieber, Akzent can be used in both metal-ceramic and all-ceramic restorations. These stains enable the ceramist or dentist to achieve a more life-like three-dimensional effect.

Features/Benefits

- A selection of 20 colors based upon the spectrum of colors found in natural teeth.
- Akzent Stains demonstrate fluorescence as observed in natural dentition.
- Only completely safe metal oxides are used in Akzent Stains
- The stains are extremely fine-grained, resulting in excellent wear rate.
- The fine grain structure helps eliminate porosity on the surface of the restoration, which helps prevent plaque accumulation and assures biocompatibility with the gingival area.
- When used with the Akzent finishing agent, a semi-translucent glazed effect is achieved, resulting in excellent light transmission.

VITA Interno Stains

The Interno effect powders, developed by Claude Sieber, enable the ceramist to reproduce the internal structures found in the interior of a natural tooth. Interno powders are for use in both VITA metal-ceramic and all-ceramic restorations.

Features/Benefits

- Increased luminescence due to intensified light transmission
- High fluorescence to increase the effects of light and depth
- Interno powders are particularly suitable for washing-in to the Dentine and enamel area
- They can be mixed with translucent powders for layering to increase the chromatic effect
- Used to create the illusion of depth when space is lacking

VITA VM®LC

VITA VMLC is a light curing microparticle paste resin for the indirect manufacture of fixed and removable restorations. The fine-particle inorganic filler, the size of a few nanometers, and its unique distribution, allow high translucency and natural scattering of light. VMLC exhibits excellent moldability, grindability and polishability which provides high esthetics. VMLC can be built up over both metal and resin frameworks and is indicated for veneering of full and partial crowns, bridges, inlays and onlays. It can also be used to individualize VITA Physiodens and Vitapan denture teeth.

VM Bond Kit

Order No. KX44-0010\$**FPO**

- 1 Bond for VM LC 12g
- 2 Bond LIQUID for VITA VM LC 5 ml
- 1 Solvent for VM Bond/LC Opaque 10 ml
- 1 Mixing pad, 100 sheets pk
- 2 Brush-holder, white
- 1 Measuring spoon, mixing spatula
- 1 Disposable brush tips, 50 pcs pk
- 1 Instructions for use

VITA VM® Bond Reorder Materials

- V69-910 VM Bond Powder 12g
- V69-911 VM Bond Mixing liquid 5 ml
- V69-903 VM Solvent for VM Bond/LC Opaque Cleaning Solution 10 ml
- Measuring spoon/mixing spatula (2-sided)

VITA VM®CC Cold Cure Resin

VITA VMCC cold cure polymer resin is ideal for producing beautiful long term temporary restorations in VITA 3D Master shades. VITA VMCC is an unfilled, acrylate based polymer which polishes to a high luster. VMCC offers four minutes of working time and self cures completely in ten minutes. VMCC is available in 18 3D-Master shades, 15 Classical shades and one bleach shade (0M1). All shades are available in 30 and 100g powder.

VMCC can be used with any traditional technique for creating provisional restorations and may be placed with any temporary cement. When shade customized temporaries are required, VMCC is ideal because in addition to the dentine shades, there are also enamels, necks, and translucents available.

Indications:

- For all applications involving temporary restorations and extra-oral repairs
- Full crowns and bridges
- Affixing shell crowns
- Affixing teeth to model casts
- Covering attachments/joints on fixed removable restorations

VITA VM®CC Basic Kit (16)

Order No. KX45-0001 \$770.00

- 16 Dentine powders, 30g ea. (0M1,1M1,2L1.5, 2M1, 2M2, 2M3, 3L1.5, 3L2.5,3M1, 3M2, 3M3, 3R1.5, 3R2.5, 4L1.5, 4M2, 5M1

For the processing of VITA CAD-Waxx and CAD-Temp in the compact inLab and CEREC 3 systems (not in the MC XL), the Sirona CAD-Waxx Starter Set with a modified tank and reinforced filter system is required.

* Mandrel fits both compact and MC XL milling units
† Only suitable for MC XL milling unit

In-Ceram® YZ for inLab

Sintering ceramic indicated for crown copings and multi-unit bridge substances in the anterior and posterior area. This yttrium-stabilized zirconium dioxide is the "diamond" among dental ceramics for the construction of high strength, attractive crown and bridge substructures (inVizion restorations). Unsurpassed strength for highly stable,thin substructures. Flexural strength ≥900MPa. Veneer with VITA VM9.*

VITA CAD-Waxx™

High molecular translucent acrylpolymer for the construction of PFM metal frameworks for crowns & bridges. Also indicated as a drilling template in implantology. Burns away cleanly during the lost-wax technique. Not for clinical use.*

Vident Order No.	Patterson Order No.	Block Type	Qty	Size
V52-4402	707-2994	CAD-Waxx	2	14 x 15 x 40mm
V52-4410	707-2986	CAD-Waxx	10	14 x 15 x 40mm
–	636-6678	CAD-Waxx starter set		

Note: For the processing of VITA CAD-Waxx and CAD-Temp in the compact inLab and CEREC 3 systems (not in the MC XL), the Sirona CAD-Waxx Starter Set with a modified tank and reinforced filter system is required.

In-Ceram® AL

Partially sintered alumina blocks suitable for tooth colored primary components, crowns, and anterior bridge substructures with up to 3 units. Veneer with VITA VM7.*

Vident Order No.	Patterson Order No.	Block Type	Qty	Size
V58-4204	707-2879	AL - 20/19	4	14 x 19 x 20mm
V58-4224	707-2861	AL - 20/19	24	14 x 19 x 20mm

VITA CAD-Temp™ DISCS for KaVo Everest

CAD-Temp for KaVo Everest systems is suitable for the fabrication of multi-unit, fully or partially anatomical long-term provisional restorations with up to 2 pontics. Up to 35 restorations can be milled from each disc. An integrated “chip” ensures that the system detects which restorations have already been milled and how many can still be produced. Disc Size 100 x 20mm.

VITA In-Ceram® YZ DISCS for Open CAD/CAM Systems

VITA In-Ceram YZ made of zirconium dioxide partially stabilized with yttrium in DISC format with a circumferential groove. This extra-large geometry is designed for the manufacture of multi-unit bridge substructures and the economical manufacture of single crowns using batch milling in open CAD/CAM Systems. The enlargement factor in all 3 spatial dimensions is clearly imprinted on each DISC.

Vident Order No.	Description	Qty	Price
V59-1401	VITA In-Ceram YZ DISC-98mm x 14mm	1 piece	\$375.00*

VITA Akzent Glaze Spray

Easy to apply, spray ceramic powder for simple, time-saving glazing of all ceramic restorations with a sintering temperature of 850°C.

Akzent Glaze Spray 125ml
Order No. S28-790\$122.00
Patterson Order No. 706-9628

Accu-Spray™

Reflective spray scan powder specifically designed for lab use with a non-clinical propellant. Accu-Spray enhances the reflective properties of a prepared dental model fabricated with dental stone or scan stone. 200 ml can.
Order No. V55-120\$234.00

Accu-Liquid™

A liquid version of scan powder that dries to a reflective powder prior to scanning. 10ml bottle specifically for lab use. Accu-Liquid is perfect for scanning implant abutments.
Order No. V55-123\$123.00

Accu-Wax™

This highly reflective wax provides increased laser-scanning accuracy. Perfect for blocking out undercuts, voids, defects and recontouring die stone prior to scanning. 50g Tin.
Order No. V55-122\$52.75

Accu-Scan Plus™ Universal Scan Stone

Accu-Scan Plus is an exceptional resin-reinforced die stone for conventional and electronic laser scanning applications. This Class IV low expansion, high density die stone produces highly-detailed models for accurate fitting restorations.

Order No. B43-225 \$101.00

VITA CEREC Powder

White contrast powder to eliminate reflections for optical impressions.

Quick-Peg™ Custom Firing Pegs

Quick Peg is a paste that is squeezed into/onto the restoration, and placed onto the peg or firing tray. It dries quickly, holds the restoration in place during firing and is removed easily. It can be used with all-ceramic or porcelain-fused-to-metal restorations. It can also be used for degassing and staining and glazing. It is especially helpful in eliminating the frustrating balancing act experienced placing the crown onto the peg. With over 60 applications per 10cc syringe, Quick-Peg is economical enough to use with every type of restoration.

Quick-Peg 3-pack of 10cc syringes
Order No. A47-320 \$35.50

VITA CEREC Etch

5% hydrofluoric acid gel for etching ceramic restorations. Not for use etching tooth structure.

Order No. V55-105 **\$FPO**
Patterson Order No. 707-9965

VITA Simulate Preparation Material – a light curing composite – is used for simulating the shade of the prepared tooth that is being restored. This material is used as an aid in all-ceramic restorative cases in which the final shade of the restoration may be strongly influenced by the shade of the prepared tooth stump. The simulate material makes it easier for the dental technician or CEREC doctor to control the final shade of the restoration and to correct it if necessary before the restoration is tried in with the patient.

Easymatch™ Software
Shade Accuracy from Prep to Placement

Easymatch Software saves time and money by predicting the optimal VITA 3D-Master shaded VITABLOCS before placing a milling block into your CEREC or Sirona inLab device. With the new Easymatch software it is easy to predict difficult shade variables that could lead to remakes. Easymatch software displays the best shade solution based on critical shade parameters such as ceramic thickness, prep shade, and prescribed shade. Easymatch works with VITABLOCS Mark II, TriLux and TriLux Forte.

Use Easymatch software with the VITA Easyshade for highly precise, predictable shade outcomes every time.

VITA Simulate Preparation Color Guide

VITA Physiodens®
Anterior and Posterior Teeth

VITA Physiodens teeth are designed to provide the highest esthetics and natural tooth morphology. Each anterior tooth is created using 3 layers of material which provides exciting nuances that provide light reflectiveness matching natural teeth. This multi layering provides opalescence, luminescence and balanced translucency. All teeth are hand made ensuring that each tooth is unique and provides the subtle characterization needed to enhance optimum esthetics. The teeth are made from a ceramic filled (16%) hardened acrylic material which provides strength, chip resistance and wear resistance for long term function. Since Physiodens teeth are the same size as natural teeth this makes the teeth ideal for partials. There is exceptional shade accuracy even after grinding the Vitapan tooth to a shell like thickness.

Physiodens teeth are available in 21 anterior moulds, 8 lower anterior moulds, 6 upper and lower posterior moulds. All Physiodens teeth come in 26 3D-Master, 15 VITA Classical and two bleached shades.

Dentures by Dennis Purinton, CDT

VITA Vitapan® Anterior & Posterior Teeth

Ergonomic, simple, easy to set up, and natural esthetic separate Vitapan from other premium teeth. The hand made 3 layer esthetic teeth provide for individual characterization and a high degree of translucency, florescence and opalescence. The Vitapan material is the same high quality ceramic filled hardened acrylic as the VITA Physiodens. This unique formula provides a high strength, shock and impact resistant tooth which resists chipping even when grinding.

Vitapan teeth offer a large selection of anteriors and posteriors teeth to meet everyday needs. There are 31 anterior uppers and 13 lower anteriors. The lower anteriors are manufactured either in full or abraided anatomy to mimic natural wear. The posteriors are available in either Cuspiform, with a 23-28% cusp angulation or Synoform, with a 5% angulation to meet individual patient needs. The Synoforms are specially made where there is a low degree of intercuspation and their narrow design provides for more tongue room for aging patients.

All Vitapan teeth are available in 26 3D-Master, 15 VITA Classical and two bleached shades.

Synoform Posteriors exhibit the same material physical properties as Vitapan Anteriors and have shallow inter-locking occlusal surfaces.

Synoform teeth are particularly indicative where there is a low degree of intercuspation. Their narrow design provides for more torque room for the aging patient.

- VITA MFT 1 x 8

VITAPAN® PLUS Anterior Teeth

VITA has modernized the classical VITAPAN and given it a new, future-oriented design. VITAPAN PLUS is a superior anterior tooth that combines a natural appearance and ideal function. The distinct horizontal and vertical curvature characteristic of the tooth provide optimum support of the lip area and offers a balanced anterior set-up. The anatomy of the tooth matches the design of the palatal surfaces for conserving the patient's phonetics and accustomed tongue sensation. With life-like layering, VITAPAN PLUS features noticeably enhanced esthetics with natural shade, light and reflective properties. To facilitate better dental hygiene and for more realistic gums, the broadened tooth neck area features interdental spacing and a natural papilla form, which offers several possibilities for age-appropriate prosthesis. Produced from excellent material quality, VITAPAN PLUS consists of homogeneously uniform VITA MRP (Microfiller Reinforced Polyacrylic) material throughout all layers and features an outstanding degree of wear resistance.

VITAPAN PLUS is available in 10 upper anterior and 5 lower anterior moulds and 10 Classical and 3D-Master shades.

VITA LINGOFORM Posterior Denture Teeth

The aim of a lingualized occlusion denture set up is the stabilization of the prosthetic restoration. The lingualized occlusion concept reduces lateral excursion loading which could minimize off axis stress to the underlying bone structure. In implant supported overdentures, this may minimize destructive lateral forces on the implant.

The LINGOFORM posterior teeth makes it possible to combine excellent function and superior esthetics. The occlusal surfaces in the mandibular teeth have a buccal cuspal inclination of 15° and 20° in the lingual area. In the upper jaw the somewhat deeper occlusal surface relief comes very close to nature without sacrificing function. The ridge lap has been reduced to facilitate faster set up and reduce grinding. The VITA LINGOFORM posteriors are indicated for:

- complete denture prosthetics
- implant supported overdentures
- attachments
- partial dentures

VITA LINGOFORM posteriors can be combined with VITA PHYSIODENS or VITAPAN anteriors as required.

VITA LINGOFORM posterior teeth sets are exclusively available in 26 3D-MASTER shades, 15 VITA CLASSICAL shades and 1 Bleached shade. LINGOFORM is available in three upper and lower moulds 21L, 22L, 23L and 24L.

VITA® MFT (Multi Functional teeth)

The VITA MFT teeth are a new tooth concept designed to provide excellent function as well as esthetic in a medium priced tooth. The design principle was to create harmony with nature. VITA MFT teeth are indicated for full and partial dentures.

The true-to-nature appearance of the anterior teeth, built up in three layers, meet all the criteria of a restoration designed to satisfy the patients needs:

- Opalescence, luminescence and translucence combined with perfectly matching tooth morphology and an individual mamelon structure, create a play of rich colors in anterior nuances as well as a vivid light reflection in every single tooth.
- The slightly convex design of the labial facettes purposefully enhances the lip contour and thus promotes dentofacial harmony.
- The natural reproduction of the palatal surfaces assist every patient in maintaining their familiar phonetic skills and tongue contact.
- As a further highlight, the white incisal margins support the outstanding esthetic of the VITA MFT anteriors.

It is the unique design of the posteriors that gives VITA MFT its name. This multifunction teeth posterior design lends itself to various occlusal schemes with ease, including lingualized occlusion. The occlusal design is based on the innovative easy-centric principle, i.e. the occlusal surfaces are designed in such a way that, almost automatically, the perfect centric is reached.

- The unique pre-abraded occlusal surfaces of the lower posteriors is designed to minimize horizontal shear forces. This is particularly important with implant supported overdentures.
- The ridge lap has been reduced to minimize the need for grinding and enlarges the surface for safe bonding to the denture base material.

VITA MFT is available in 13 Shades, 0M1, 0M3, 1M1(B1), 2M1 (A1), 2L1.5 (B2), 2M2 (A2), 3L1.5, 3L2.5 (B3), 3M2 (A3), 3R2.5 (A3.5), 4L1.5, 4M2, 5M1, (A4) and 17 anteriors and 3 posterior moulds.

The whole range of indications in a pleasantly small VITA MFT product line. A reduced and harmonic range of shades/moulds makes for increased economic efficiency.

Multifunctional VITA MFT teeth are suited for:

- Full Dentures
 - Implant Prosthetics
- Partial Dentures
 - Combination Cases

VACUMAT 6000M Ceramic Furnaces

VITA presents a first in the dental industry; one-of-a-kind VITA VACUMAT 6000M modular ceramic furnaces. The unique and innovative concept satisfies any laboratory's firing needs in an efficient and economical way. The heart of the system is the VITA VACUMAT 6000M furnace with its four unique control units, the vPad easy, the vPad comfort, vPad Clinical and the vPad excellence. These feature-filled controllers enable up to four furnaces to be controlled with one control unit. Buy one controller with a firing unit now, then add additional firing units inexpensively as needed.

The new VITA VACUMAT 6000M is a premium microprocessor-controlled, fully automatic furnace used to fire all types of veneering and crystallization ceramics. The unit features a modern, compact and ergonomic design and just like its predecessors, requires considerably less bench space in comparison to conventional ceramic furnaces.

In addition, each of the VITA VACUMAT 6000M firing units can be individualized with colored side panels. The white panels can also serve as a notepad.

A choice of three different icon-driven control units with intuitive symbols are available to program and operate the furnace.

- **The vPad easy** has 200 user-adjustable programs, all the required functions and produces excellent firing results.
- **The vPad Comfort** has 500 user-adjustable programs, a color touch-screen, a Photo Viewer and can control one or two furnaces simultaneously.
- **The vPad Clinical** is matched with the requirements of CEREC dentists, featuring a 7-inch touch display that offers clearly arranged menus and enables fast and intuitive operation. All necessary block programs are pre programmed. Up to 2 furnaces can be conveniently controlled.
- **The vPad Excellence** control unit offers 1,000 customizable programs, is equipped with an 8.5 inch color touch-screen, a Photo Viewer, can control up to four furnaces simultaneously, has individual user accounts and many other useful extras.

In-Ceramat III® T Touchscreen Furnace

The Inceramat “high temp” sintering furnace is used for the In-Ceram technique as well as all prolonged high temperature sintering and glass infiltration requirements.

Features/Benefits

- High-heat quartz spiral muffle (rated 1200°c)
- 100 user-modifiable programs (10x In-Ceram pre-installed)
- Automatic calibration at power up
- Firing table moves forward for easy access
- Fold-away twin cooling table
- Stainless steel construction
- Supplied complete with 2nd muffle as back up
- 2 year warranty on parts and labor
- 1 year warranty on muffle

Order No. E98-051	\$7,425.00
-------------------	------------

Easyglaze Furnace

The Easyglaze Furnace is ideal for any dentist or lab that is staining, glazing, or performing any firing function that does not require vacuum. Fully automatic, precise and affordable, the Easyglaze Furnace offers a roomy muffle, a 3 inch diameter firing tray and a microprocessor capable of holding temperatures to within ± 2 degrees C. The accurate muffle is wound alloy with high temperature fibrous alumina insulation.

Features/Benefits

- 2 Preset programs for typical VITA and CEREC Glazes
- 3 Customizable user programs
- Automatic Re-glaze Feature
- Operating temperature up to 1000°C
- Controlled temperature ramp-up rate (60-120°C/min.)
- Clamshell design allows the firing tray to remain stationary
- Small size, does not take up much bench-top space
- Simple and user-friendly interface and controls
- Large and clear LCD display
- ETL/CE safety markings
- Retractable cooling tray
- 1 year warranty

Order No. E45-001	\$1,795.00
-------------------	------------

In-Ceramat III T Touchscreen Furnace

Program example

Easyglaze Furnace

ZYrcomat® T Furnace

The VITA Zyrcomat T is a completely new programmable atmospheric high-temperature sintering furnace for VITA In-Ceram YZ and In-Ceram AL cubes, and is recommended for use with the Sirona inLab system. Time-saving sintering features include fifty adjustable programs that are easily accessed using the new large color touchscreen.

Features/Benefits

- High-heat firing chamber (rated 1600°C)
- Furnace and control (power) unit is separate for convenient shipping
- Attractive and robust casing consisting of painted sheet steel and stainless
- Processing capabilities of 75 + plus/single/mixed unit restorations (Stacked)
- 5 molybdenum elements for uniform heat distribution (4 with 230V)
- Typical processing time including cooling and removal 5.45 hours
- Voltage loss protection with restart recovery
- 2 year warranty parts and labor (6 months on heating elements)
- 110 voltage (with optional 230v delivery)
- Total weight 130.9 lbs (57 kgs)

Accessories included:

- Furnace tweezers
- Sintering crucible
- Sintering dish
- 1 pack ZrO2 sphere pearls
- Allen wrenches
- Operating instructions
- Automatic calibration at power up
- Upgradeable software via USB
- Multiple user languages
- 40 programmable programs

Super Steam Cleaner

The Vident Super Steam Cleaner provides continuous demineral-ized steam cleaning. Its large tank capacity allows for extended use between fillups.

- Simple to use and install.
- Fitted with three pressure safety devices
- Large half gallon tank capacity
- For cleaning models through to completed work
- Degrease of frameworks prior to ceramics
- Cleaning attachments and implant components
- De-waxing denture teeth
- 70-75 PSI Pressure range
- 1 year warranty on parts and labor

Order No. E68-001 \$1,290.00

Poly-Die™ and Poly-Base™ Material

Poly-Die and Poly-Base polyurethane material are specifically designed for dental laboratories. These products can be used with any type of impression material and many different styles of models, from regular pin to tray and plastic plate systems.

Poly-Die is ideal for implants, orthodontic models and partial denture work and can be used in combination with regular stone when using dowel pins, providing superior cost savings. The die material features no contraction or expansion, eliminating the fit problems sometimes encountered with typical die stone. Poly-Die is odorless.

Poly-Base is a less-expensive model base material that shares many of the physical properties of Poly-Die. It is not quite as dimensionally accurate, and as such, is ideal as a base material. Due to the inclusion of advanced resin technologies, Poly-Die and Poly-Base weigh 40% less than other materials, producing more models with less consump-tion.

Order No.	Description	
A95-090	Poly-Die Kit, 1000g	\$110.00
A95-091	Poly-Base Kit, 1800g.....	\$162.00
A95-018	Separating Spray (also for Klic-Lok)	\$21.70

Sta-Put™ Adhesive for Models

Sta-Put Gel is used to temporarily hold the restoration in place on the model while it is being worked on. This low-viscosity gel-like material is squeezed into the restoration or onto the die.

Once placed, the porcelain is held in position while the dentist or ceramist adds stain, glaze, contacts, creates characterizations, etc. It burns out clean when heated.

Sta-Put Adhesive, 3-pack of 3ml syringes
Order No. A89-400..... \$47.40

Vident Diamond Restoration Polish, Jar

Specially formulated for restoring the glaze finish on ground porcelain or composite surfaces. Adds a smooth mirror finish to all high-noble, noble and base metal alloys.

Order No. C15-100	\$68.00
1	Jar Diamond Restoration Polish, 3g
1	Mandrel
1	Brush Wheel
3	Felt Wheels

Diamond Restoration Polish, Syringe, 3g

Syringe delivery system for convenient dispensing of diamond impreg-nated polishing paste. Ideal for polishing ceramics and composite materials. Kit contains one 3g syringe, straight handpiece wheel brush, and three felt wheels.

Order No. C15-101 \$64.00

Wax-Up Assistant from Smile Line

With the Architect Wax-up Assistant, technicians have the ability to create accurate diagnostic wax-ups using a simple, fast technique. After selecting the correct wax pattern (available in 3 sizes), position the pattern on the die using positioning wax, fill and then finish with modeling wax.

All patterns are available in white only.

Laservest Soldering Investment

Vident’s Laservest Soldering Investment is a premium quality, high-heat investment material specially formulated for use in soldering high-noble, noble and base metal crown and bridge alloys.

- Does not give off destructive gases
- Fine particle size allows the investment to be mixed and poured easily
- Stable at high temperatures for both high and low fusing soldering operations
- Assured dimensional accuracy and fit

Ceramic Alloys

Vident offers a variety of superior quality ceramic alloys that are matched to the thermal expansion of VITA VM13, VMK 95, Omega and Omega 900 Porcelain Systems. All Vident alloys exhibit improved working characteristics, excellent casting and finishing properties and consistent marginal integrity. Call for market prices and available discounts.

V13 Alloy

V13 is a high-strength ceramic alloy, ideal for single units through bridges, in both the anterior and posterior areas of the mouth. Made as a match for VITA VM13, it is also compatible with a wide range of porcelains with a CTE of up to 14.2. With 45% Au, 44.3% Pd and no silver or Cu, V13 is easy to work with, offers a high bond strength, and produces a high-gloss polish.

Order No.	M25-100
	CALL

Palladius V+ Alloy

Palladius V+ is a micro-fine grain, silver-free PFM alloy with only 1.8% gold content. The alloy creates a silver-free environment that virtually eliminates the discoloration in porcelain. It is compatible with most porcelain systems, and is recommended for fabricating single crowns, short and long-span bridges and implant super-structures. 1.8% Au, 75.7% Pd, 8.0% In, 6.3% Ga.

Order No.	M20-132
	CALL

Aurix Alloy

Vident’s Aurix is a silver-free, micro-fine-grained alloy formulated to be compatible with most dental porcelains. Its structure and superior physical properties facilitate the fabrication of all types of crowns, multi-units and bridge substructures. 66% Au, 25.5% Pd, 8.1% In, 0.3% Ga.

Klic-Lok™ Model Tray System

The Klic-Lok Model Tray System introduces a new dimension in model-making. This unique single-pour re-usable system features a unique locking retentive feature, which retains the dies securely in a durable base tray with a “Klic”. It is easy to use and offers attractive benefits, such as full arch and quadrant trays, and your choice of mounting methods, including magnetic mounting plates. You no longer have to compromise accuracy with conventional dowel-pin systems. You won’t have to worry about breaking lower anterior dies when sawing your model. The Vident Klic-Lok Model System offers an outstanding professional-looking model with extreme accuracy, time savings, and ease-of-use.

The Quick Fix Mandrel System
For the quick release and attachment of discs

This new mandrel system does away with the tedious process of changing discs and polishers. The system consists of two different mandrels.

The Yellow mandrels are designed to be used with two-layered flexible diamond discs for shaping porcelain and larger diamond discs used to cut/section stone/polyurethane models. To mount them, you simply insert the pin into the mandrel and press until it engages with a click.

The Black mandrels are used with Vident’s Golden Devil separating discs. These discs are truly superior in terms of durability and cutting efficiency and can be used on all metals. To change a disc, you just turn the pin 90°.

Quick Fix Kits/Accessories

Precision Porcelain Scoop Set

This elegant stainless steel instrument set features four scoop sizes (0.02 g, 0.05g, 0.2g, and 0.3g) to mix the exact amount of porcelain required without guessing. The scoops are very useful for achieving interpolated (intermediate) VITA 3D-Master shades. Available in a set of two double-ended instruments and packaged in a brushed aluminum case for safe storage and handling.

Order No. A10-200..... \$65.00

Modeling Liquids

These universal modeling liquids have been developed to work with the majority of VITA ceramics. VITA Modeling Liquid improves the working and handling characteristics of your porcelains. Use VITA Modeling Liquid with VMK 95, VMK Master, Omega, Omega 900 and Vitadur Alpha. This fluid replaces Omega Modeling Liquid, Omega 900 Modeling Liquid, VMK 95 Modeling Liquid and Vitadur Alpha Modeling Liquid.

Quick-Peg™ Custom Firing Paste

Quick Peg is a paste that is squeezed into/onto the restoration, and placed onto the peg or firing tray. It dries quickly, holds the restoration in place during firing and is removed easily. It can be used with all-ceramic or porcelain-fused-to-metal restorations. It can also be used for degassing and staining and glazing. It is especially helpful in eliminating the frustrating balancing act experienced placing the crown onto the peg. With over 60 applications per 10cc syringe, Quick-Peg is economical enough to use with every type of restoration.

"Motivation" by Claude Sieber

"Motivation" by Claude Sieber is a stunning pictorial tour of teeth as designed by nature and Claude. Telling the two apart is one of the challenges presented to the reader. With incredible photography, special textured papers, many foldouts and precise reproduction of dozens of restorations, you are sure to be motivated to take your own restorations to a higher level. This oversize hardcover book features a slipcase and a special preservation binding to permit limitless viewing. The photography is museum quality. A softcover textbook is included in a rear pocket that provides details about the photos and techniques used. "Motivation" is a must for anyone interested in the esthetics of modern dental restorative materials.

"Motivation" by Claude Sieber
Order No. L-1244E.....\$180.00

"The Art of Passion" by Ed McLaren

"The Art of Passion: a photographic journey" showcases Dr. McLaren's years of study in the dental profession and photography. The level of understanding and respect for the optical behavior of teeth shows through in stunning spreads, each lovingly reproduced with breathtaking four-color photography. Dr. McLaren takes his book one step further by providing a step-by-step guide to taking and communicating shade information and covers his innovative ceramic layering "Skeleton Buildup Technique" in great detail. This elegant coffee-table sized book is a must-have for everyone who appreciates fine dentistry and fine photography.

"The Art of Passion" by Edward A. McLaren
Order No. L-9357.....\$169.00

Terms and Conditions

The following terms and conditions covering Vident products, equipment, and price lists are subject to change by Vident without prior notice.

Orders Orders may be placed by mail, telephone, facsimile, e-mail or directly with a Vident salesperson. The buyer should include name, address (with zip or postal code), and Vident account number with any order. To facilitate accurate order fulfillment, the buyer should be as specific as possible and include the Vident product number, the desired quantity, and any descriptive information such as size and color shade, wherever indicated. There is no minimum order. For orders under \$30 (\$35 Canadian), a processing fee of \$5 (\$6.00 Canadian) will be applied. Some items shown in Vident’s catalog may be available by special order only and may be shipped separately from your original order. In all cases, efforts will be made to consolidate shipments.Vident reserves the right to reject any order in its sole discretion.

Price and Terms of Payment Prices for products are those in effect at the time of purchase. For current retail prices, call Vident. Each shipment will be accompanied by an itemized packing slip. An invoice will either be included with the shipment, or will be delivered separately. Except in those cases where C.O.D. payment is specified or a credit card is used, buyer agrees to pay the full amount due on each invoice within thirty (30) days of the invoice date. All or any portion of an invoice amount which has not been paid within thirty (30) days of the invoice date, will accrue service charges at the rate of one and three-quarters percent (1 3/4%) per month, but in no event in excess of the maximum legal rate, commencing thirty (30) days after the invoice date. Returned checks are subject to a \$25 (\$29 Canadian) charge. Payment by Visa, Master Card or American Express is available.

Credit Approval All orders, shipments and deliveries at all times shall be subject to the approval of buyer’s credit by Vident’s Finance Department. Vident reserves the right to decline to make deliveries whenever, for any reason, there is doubt as to buyer’s financial responsibility, and Vident shall not, in such event, be liable for nonperformance of contract in whole or in part.

Leasing Contact Vident for leasing information.

Taxes The buyer will be responsible for all applicable sales, excise and GST taxes which will be added to the sale price on each invoice and are due and payable on the same terms as the sales price. For tax exemption, the buyer must provide suitable documentation of tax exempt status.

Shipments Usually, products will be sent via ground carrier unless otherwise specified by Vident. Equipment will usually be sent via air freight. The buyer will be responsible for the shipping, handling and insurance costs, which will be prepaid by Vident and added to the sale price on each invoice. These charges are due and payable on the same terms as the sales price. COD shipments will be made at Vident’s discretion and will be subject to the carrier’s COD surcharges. Shortages or shipment errors must be reported within seven (7) business days of invoice date to be eligible for credit or adjustment as appropriate.

Title and Risk of Loss Title of the product and/or equipment passes to the buyer at the time of shipment. Buyer assumes all risk of damage to or loss or destruction of the product and/or equipment shipped, and no loss, injury or destruction of the product and/or equipment shall release buyer from buyer’s obligations to Vident.

Return Policy No returns will be accepted without prior authorization from Vident. A buyer first must obtain a return authorization number from the Vident Customer Service Department. The return authorization number must be included with the return.

Standard catalog products Except as indicated below, Standard catalog products may be returned within thirty (30) days of the date of shipment; provided, however, that return will only be granted if all the following conditions are met:

- A. The buyer obtains a return authorization number from the Vident Customer Service Department.
- B. The product and/or equipment is unused, in resalable condition, in original packaging, unmarked, with seals and labels intact.
- C. A copy of the invoice of sale, a written reason for the return and a copy of the return authorization accompanies the product and/or equipment.
- D. The product and/or equipment is returned with shipping costs and insurance prepaid, at the buyer’s expense to:

U. S. Customers

Vident, 3150 E. Birch Street, Brea, CA 92821

Canadian Customers

Vident Canada c/o TCD, 3505 Laird Road, Unit 7
Mississauga, ON L5L 5Y7

- E. The return is made within thirty (30) days or sixty (60) days of the date of the original shipment (see below).

If the above conditions are met and if in Vident’s reasonable judgment the return is due to a defective product and/or equipment or Vident’s error, the product or equipment will be exchanged or a full credit or refund will be issued, at Vident’s discretion. For any returns received between thirty-one and sixty (60) days after the date of shipment, a restocking charge equal to fifteen percent (15%) of the value of the return, or \$10.00 (\$12 Canadian) for returns of less than \$70.00 (\$80 Canadian) will be deducted from the credit or refund, provided that a credit or refund will only be granted if the conditions specified in A, B, C, D and E above are met. No returns will be accepted later than sixty (60) days from the shipment date.

Special Returns Refunds or credits for returns of high noble and noble alloys, will be based upon the market price on the date Vident receives the return, but in no event will the credit or refund exceed the original purchase price. These materials must be unused and in original sealed packages, with seals intact.

Denture Teeth Contact your VITA Denture Tooth Dealer

Return of Full Sets Full sets may be returned for exchange for new teeth of like kind only. Full set exchanges will be on a card for card basis. Only currently available teeth in Vident’s product line may be exchanged.

Full sets may be returned for exchange within thirty (30) days of the original order date, if all the following conditions are met:

- 1.The buyer obtains a return authorization number from the Vident Customer Service Department prior to return
- 2.The returned denture teeth are unused, in resalable condition.
- 3.A copy of the return authorization accompanies the denture teeth.
- 4.The product is returned with shipping costs and insurance pre-paid, at the buyers expense, to: Vident, 3150 E. Birch Street, Brea, CA 92821 (U.S. Customers only)

For any returns received between thirty-one (31) and sixty (60) days after the date of shipment, a restocking charge equal to fifteen percent (15%) of the value of the return, or \$10.00 for returns of less than \$70.00 will be deducted from the exchange, provided that an exchange or refund will only be granted if the conditions specified in 1, 2, 3 and 4 above are met. No returns will be accepted later than sixty (60) days from the shipment date.

Return of Broken Sets and Full Sets Not In Saleable Condition Broken and full sets may be returned for exchange for new teeth of like kind only. The exchange amount for broken sets will be determined by multiplying the number of teeth remaining on each card by the exchange credit of 90% per tooth based on the effective current published price.

The following items are not returnable for exchange:

- Broken sets or full sets of teeth not in resalable condition
 - o Dirty and/or dusty teeth or wax cards
 - o Teeth melted in the wax on the wax cards
 - o Cracked or scratched wax cards
 - o Stickers, non Vita/Vident bar code labels or other markings on the wax cards
- Loose teeth or teeth not on their original card
- Teeth that exhibit grinding marks of any kind
- Teeth returned in an unsanitary manner
- Teeth with permanent markings, i.e. ink pen, pencil, razor edge
- Discontinued moulds or shades

No Return of Certain Products Special order products and custom products (including custom packaging), equipment, products requiring refrigeration, products within 9 months of their expiration date, opened chemical products, shade guides in packaging with broken seals, video tapes, DVDs, CDs and books may not be returned.

Changes Because products and equipment are continually undergoing refinement in design and manufacturing methods, Vident reserves the right to improve, modify or discontinue products or equipment or change pricing at any time without incurring any obligation and without prior notice.

Errors Vident reserves the right to correct clerical or stenographic errors or omissions in its terms, conditions, price lists, or invoices.

LIMITED WARRANTY AND LIMITATION OF REMEDIES: VIDENT WARRANTS ALL PRODUCTS AND EQUIPMENT TO BE FREE FROM DEFECTS IN MATERIAL AND WORKMANSHIP UNDER NORMAL USE AND MAINTENANCE. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED, AND THERE IS NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THE BUYER’S EXCLUSIVE REMEDY AND VIDENT’S SOLE OBLIGATION UNDER THIS WARRANTY IS LIMITED TO ONE OF THE FOLLOWING, AT VIDENT’S SOLE DISCRETION: REPLACEMENT OR REPAIR OF THE PRODUCT OR A REFUND OF THE PURCHASE PRICE. VIDENT SHALL NOT BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL, SPECIAL OR PUNITIVE DAMAGES. THE BUYER’S CAUSE OF ACTION FOR BREACH OF ANY WARRANTY WILL BE BARRED UNLESS VIDENT RECEIVES WRITTEN NOTICE AT THE ADDRESS SET FORTH BELOW WITHIN THE APPLICABLE WARRANTY PERIOD.

To make a warranty claim, written notice of an alleged defect or other breach of warranty should be sent to Vident at 3150 E. Birch Street, Brea, California 92821 within the applicable warranty period.

Vident Education and Training

Course Registration and Cancellation Policy

Course Registration Course tuition fees are due at the time of registration. Payment may be made by credit card or check. Customers with open accounts in good standing at Vident may charge tuition fees to their accounts.

Course Cancellations Vident reserves the right to cancel courses at any time and will provide as much advance notice as is reasonably possible. Vident’s obligation in such instances shall be limited to credit of tuition paid for a future Vident course or refund of paid tuition. Course registrations may be cancelled by the registrant at any time. Paid course tuition will be refunded or credited to a future Vident course based on the following schedule:

Days Prior to Course	% Refund/Credit
14 or more	100%
7 – 13	50%
0 – 6	0%

Attorney’s Fees In the event of a dispute between Vident and the buyer arising out of or relating to an order, Vident shall be entitled to recover from the buyer all reasonable fees, costs and expenses, including, without limitation, reasonable attorneys’ fees and expenses.

Force Majeure Should Vident delay or fail to effect delivery or shipment by reason of causes beyond its control, at Vident’s option the time of shipment may be extended, or a part or all of an order may be canceled without liability. Such causes shall include but not be limited to acts of God, acts of government, wars, revolutions, strikes, floods, droughts, fires, storms, snow, perils of the sea, unavoidable interruption of transportation, and unavailability of essential materials. In such cases Vident shall notify buyer in writing of the occurrence of such contingency as soon as possible.
