

Pompe Pumps

In funzione del liquido da pompare sono disponibili elettropompe sommersibili, orizzontali o verticali con girante aperta, a vortice, monocanale e a canali con portate fino a 350 m³/ora e potenze fino a 37 kW. Pompe centrifughe con portate da 1 a 480 m³/ora. Pompe a ingranaggi con portate da 0 a 100 m³/ora. Elettropompe dosatrici con portate da 2,8 a 1566 litri/ora. Pompe a pistoni per olii e grassi. Pompe per alte pressioni. Elettropompe a 24 Volt per fontane artistiche con portata regolabile.

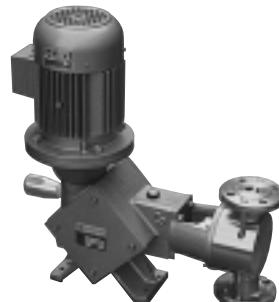

Elettropompe sommersibili - modelli verticali
Electrical submersible pumps - vertical models

Depending on the liquid to be pumped, a whole set of electrical submersible pumps is available in both horizontal or vertical models, equipped with a vortex impeller which could be single, double or multi-channelled with a maximum capacity of 350 m³/hour and maximum power of 37 kW.

Other available pump types also include centrifugal pumps with capacity range of 1 to 480 m³/hour, gear pumps having a 0 to 100 m³/hour capacity range, metering electrical pumps with a capacity range of 2,8 to 1566 litres/hour, piston pumps for oil and grease, high pressure pumps as well as 24 volt electrical pumps with adjustable capacities necessary for use in artistic fountains.

Elettropompe - modelli orizzontali
Electrical pumps - horizontal models

Pompe dosatrici elettriche - Metering electrical pumps

Pompe a pistoni per olio e grasso - Oil and grease piston pumps

Elettropompe per fontane a 24 volt - 24 volt fountain pumps
