Air/gas ratio controls GIK

- To maintain a constant gas/air mixture
- For continuous and staged burner control
- Design with inlet pressure compensation diaphragm ensures high control accuracy
- Wide control range
- EC type-tested and certified
- Certified by Gosstandart pursuant to GOST-TR
Application

Air/gas ratio controls GIK with inlet pressure compensation diaphragm and zero shut-off serve to maintain a constant gas/air ratio and to control the gas pressure upstream of gas burners in systems without preheated combustion air.

For use in gas control lines in all sectors of the iron, steel, glass and ceramics industries, as well as in commercial heat generation, such as the packaging, paper and foodstuffs industries.

Technical data

Gas types: natural gas, town gas, LPG (gaseous) and biologically produced methane (max. 0.02 % by vol. H₂S), GIK..L also for air.

The medium must be dry in all temperature conditions and must not contain condensate.

Air control pressure: 0.5 to 120 mbar.

Outlet pressure: 0.2 to 119 mbar.

Differential pressure between inlet area and outlet pressure: max. 100 mbar.

Transmission ratio: 1:1.

Control range: 1:10.

Internal thread: Rp 1 to ISO 7-1.

Flanged connection: PN 16 to ISO 7005.

Bypass screw: brass.

GIK 15 – 25:
Standard: 1.5 mm, up to 4 mm possible.
GIK 40 – 50:
Standard: 5 mm, up to 9 mm possible.
GIK 15 – 150:
Housing: AlSi.
Diaphragms: NBR.
GIK 15 – 50:
Adjusting range at low fire: -3 to +3 mbar.
Connection for control line: Rp ½.
Ambient temperature: -20 to +60°C.
Storage temperature: -20 to +40°C.
Valve disc: plastic.
Valve disc seal: NBR.
GIK 65 – 150:
Adjusting range at low fire: -2 to +2 mbar.
Connection for control line: Rp ½.
Ambient temperature: -15 to +60°C.
Storage temperature: -15 to +40°C.
Valve disc: aluminium.
Valve disc seal: vulcanized NBR seal.

* If “none”, this letter is omitted.

Flow rate

Maintenance cycles

At least once a year, twice a year in the case of biologically produced methane.
