<b>Arrester Products</b>			
Low-Voltage (Secondary) Light-Duty Distribution-Class Surge Arresters	VariSTAR Storm Trapper High Energy Arrester, External Mount	235-16	5
	VariSTAR Storm Trapper High Energy Arrester, Under-Oil	235-16	5
Arrester/Flipper Fuse Combinations UltraSIL Polymer-Housed	Evolution Type URT (UltraSIL)	235-25	6
	Normal Duty VariSTAR UNS (UltraSIL)	235-25	6
	Heavy Duty VariSTAR UHS (UltraSIL)	235-25	6
Heavy-Duty Distribution-Class Arresters – UltraSIL Polymer-Housed	VariSTAR Type UHS (UltraSIL)	235-35	7
	Evolution Type URT (UltraSIL)	235-99	7
Light-Duty Under-Oil Arrester	VariSTAR Type CLU	235-95	8
Heavy-Duty Distribution-Class Arrester Under-Oil Mounting	VariSTAR Type AZU	235-64	8
Normal-Duty Distribution-Class Arresters – UltraSIL Polymer-Housed	VariSTAR Type UNS (UltraSIL)	235-35	9
Elbow and Parking Stand Arresters	M.O.V.E. Elbow Arrester	235-65	10
	Metal Oxide Parking Stand	235-68	11
	M.O.V.E. DirectConnect Elbow Arrester	235-101	11
Intermediate-Class Surge Arresters UltraSIL Polymer-Housed	Type UI (UltraSIL)	235-102	12
Station-Class Surge Arresters Porcelain Housings	VariSTAR Type AZES (Metal Top)	235-87	13
	VariSTAR Type AZES (Porcelain Top - Cubicle-Mounted)	235-87	14
Station-Class Surge Arresters UltraSIL Polymer-Housed	Type US (UltraSIL)	235-103	15
	Type UH (UltraSIL)	235-103	16
	Type UX (UltraSIL)	235-103	17
IEC Surge Arresters Porcelain Housings	Type AZG3	1235-83	18
	Type AZG4	1235-84	20

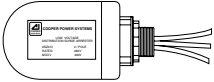

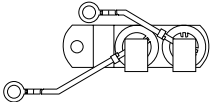

Product Type	Product	Catalog Section	Page Number
IEC Surge Arrester UltraSIL Polymer-Housed	Type U2	I235-92	21
	Type U3	I235-98	23
	Type U4	I235-99	24
Surge Arrester Insulating Bases and Counters	For Type AZES, AZG, UI, US, U2, U3, U4	S235-81-1	25
<b>Fusing Products</b>			
Expulsion Fuses	Oil-Immersed, Current-Sensing Weak-Link Cartridge Fuse	240-31	26
	Oil-Immersed, Dual-Sensing Weak-Link Cartridge Fuse	240-32	26
Interrupter	MagneX Interrupter Two- and Three-Phase	240-33	27
	MagneX Interrupter Single-Phase	240-34	28
Bay-O-Net Holder/Fuses	Sidewall-Mounted Flapper Bay-O-Net Assembly	240-40	29
	Sidewall-Mounted Flapper Bay-O-Net Assembly w/Silver Plating	240-40	29
	Cover-Mounted Bay-O-Net Assembly	240-40	29
	Bay-O-Net Fuse Assembly Drip Guard	240-41	29
	Current-Sensing Bay-O-Net Fuse Link	240-45	29
	Dual-Sensing Bay-O-Net Fuse Link	240-46	30
	Isolation Link	240-47	30
	Dual Element Bay-O-Net Fuse Link	240-48	31
	High Ampere Overload Bay-O-Net Link	240-49	31
Under-Oil Backup Current-Limiting Fuse	ELSP Current-Limiting Backup Fuse	240-98	32
Clip-Mounted Current-Limiting Fuses	ELX Full-Range Current-Limiting Fuse	240-55	33
	X-Limiter Full-Range Current-Limiting Fuse	240-56	35
	Current-Limiting Fuse Mounts	240-59	38
	NX Indoor Full-Range Current-Limiting Fuse	240-60	40
Current-Limiting Fuses	NXC Current-Limiting Capacitor Fuse	240-61	45
	Direct-Connected Capacitor Fuse	240-63	45
	EL Bay-O-Net Assembly	240-70	50
	15 and 25 kV Class Fused Loadbreak Elbow Current-Limiting Fuse	240-97	50
	ELS Full-Range Current-Limiting Fuse	240-72	51
Power Fuses	ELSG Full-Range Current-Limiting Fuse	240-82	52
	X-Limiter Hinge-Mounted Current-Limiting Fuse	240-84	54
	Edison Modular Fuse	240-92	57
	CMU Power Fuse	240-94	58

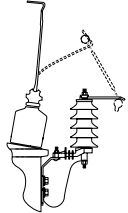

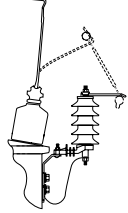

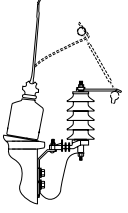

Product Type	Product	Catalog Section	Page Number
<b>Transformer Components</b>			
Low-Voltage (Secondary) Bushings	Molded (HTN) Tri-clamp — 600 - 1400 A	800-14	63
	Internal/External Spade — 910 - 2410 A	800-16	63
	Internal/External Spade — 3000 - 4500 A	800-21	64
High-Voltage (Primary) Bushings	Bushing Well (HTN), (EPOXY) 200 A	800-32, 33, 34	65
	Integral Loadbreak Bushings — 200 A, 35 kV	800-39	66
	Integral Deadbreak Bushings — 600 A 15/25 kV, 35 kV	800-45, 47	66
	Integral PUSH-OP Deadbreak Bushings — 600 A, 15/25 kV, 35 kV	800-46, 48	66
Arrester Disconnect	Under-Oil Arrester Disconnect	800-51	67
Switches	Tap Changer Switch — 100 - 300 A	800-57, 58, 60	67
	Sectionalizing Four-Position (Loadbreak) Switch	800-64	71
	Two-Position Loadbreak Switch	800-65	74
	Series Multiple (Dual-Voltage) Switch — 50 - 300 A	800-70, 71, 72, 75	76
<b>Separable Connectors</b>			
Loadbreak Connectors	Loadbreak Elbows — 200 A, 15 kV, 25 kV, 28 kV & 35 kV	500-10-7, 10-7C, 28-7, 28-7C, 41	84
	POSI-BREAK Loadbreak Elbow, Protective Cap — 200 A, 25 kV, 28 kV	500-29-7, 29-7C, 37, 37C	86
	Loadbreak Bushing Insert — 200 A, 15 kV, 25 kV & 28 kV	500-12, 26, 26C	86
	Rotatable Feedthru Insert — 200 A, 15 kV, 25 kV & 28 kV	500-13, 30, 30C	87
	Loadbreak Portable Feedthru — 200 A, 15 kV, 25 kV, 28 kV & 35 kV	500-14, 31, 31C, 49	87
	Loadbreak Junction — 200 A 15 kV, 25 kV, 28 kV & 35 kV	500-15, 32, 32C, 51	88
	Insulated Bushing Well Plug — 200 A, 15/25 kV, 28 kV	500-20*, 38, 38C	89
	Loadbreak Protective Cap — 200 A, 15 kV, 25 kV, 28 kV	500-21, 39, 39C	89
	Loadbreak Protective Cap — 200 A, 35 kV	500-65	90
	Insulated Standoff Bushing — 200 A, 15 kV, 25 kV, 28 kV & 35 kV	500-22, 40, 40C, 66	90
Fused Loadbreak Elbow Connector — 200 A, 15 and 25 kV	500-110, 111	90	

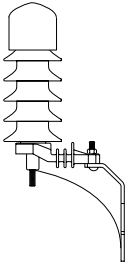

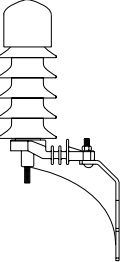

\* See 500-38

Product Type	Product	Catalog Section	Page Number
Deadbreak Connector, 200 A	Elbow Connector	550-10	91
	Straight Connector	550-12	91
Deadbreak Connectors	BOL-T Connector — 600 A, 15/25 kV, 35 kV	600-30, 50	91
	BT-TAP Connector Kit — 600 A, 15 kV, 25 kV & 35 kV	600-15, 35, 55	92
	T-OP II Connector — 600 A, 15, kV, 25 kV, & 35 kV	600-12, 32, 52	98
	PUSH-OP Connector — 600 A, 15 kV, 25 kV, 35 kV	600-13, 33, 53	99
	U-OP Connector — 600 A, 15 kV & 25 kV	600-34	100
	Bushing Adapter with LRTP — 600 A, 15 kV, 25 kV & 35 kV	600-18, 38, 59	100
	PUSH-OP Bushing Adapter — 600 A, 15 kV, 25 kV & 35 kV	600-19, 39, 58	101
	Protective Cap (Standard, T-OP II and U-OP) — 600 A 15/25 kV, 35 kV	600-43, 63	102
	Standoff Bushings — 600 A 15/25 kV, 28 kV	600-44, 44C, 64	103
	Deadbreak Junctions — 600 A 15/25 kV, & 28 kV & 35 kV	600-42, 42C, 62	104
<b>Loadbreak/Deadbreak Connectors</b>			
Loadbreak/Deadbreak Connectors	200 A and 600 A, 15, 25 and 35 kV Junction Bars for Separable Connectors	650-10	106
<b>Fault Indicators</b>			
Fault Indicators	Test Point Reset	320-40	118
	Pathfinder Test Point Reset	320-42	118

<b>LOW-VOLTAGE (SECONDARY) LIGHT-DUTY DISTRIBUTION CLASS SURGE ARRESTERS</b>					
VariSTAR Storm Trapper H.E.  	235-16 S235-16-1	Externally mounted High Energy secondary surge arrester for over-voltage protection of transformer secondary bushings. <b>NOTE:</b> To add mounting bracket, change last digit to "1".	Light-Duty Distribution-Class Surge Arrester for transformer secondary overvoltage protection, external mount.	1 Pole, 175 V (175 V MCOV), without Mounting Bracket	ASZH175C100
				2 Pole, 175 V (175 V MCOV) without Mounting Bracket	ASZH175C200
				3 Pole, 175 V (175 V MCOV) without Mounting Bracket	ASZH175C300
				1 Pole, 240 V (240 V MCOV) without Mounting Bracket	ASZH240C100
				2 Pole, 240 V (240 V MCOV) without Mounting Bracket	ASZH240C200
				3 Pole, 240 V (240 V MCOV) without Mounting Bracket	ASZH240C300
				1 Pole, 480 V (400 MCOV) without Mounting Bracket	ASZH480C100
				2 Pole, 480 V (400 MCOV) without Mounting Bracket	ASZH480C200
				3 Pole, 480 V (480 V MCOV) without Mounting Bracket	ASZH480C300
				1 Pole, 650 V (540 MCOV) without Mounting Bracket	ASZH650C100
				2 Pole, 650 V (540 MCOV) without Mounting Bracket	ASZH650C200
3 Pole, 650 V (540 V MCOV) without Mounting Bracket	ASZH650C300				
VariSTAR Storm Trapper H.E.  	235-16 S235-16-1	Internally mounted High Energy secondary surge arresters for overvoltage protection of transformer secondary bushings.	Light Duty Distribution Class Surge Arrester for transformer secondary overvoltage protection, internal (under-oil) mount.	2 Pole, 480 V (400 V MCOV), 0.391 inch Mounting Hole, 10 inch Leads with Terminal	ASZH480U200
				2 Pole, 480 V (400 V MCOV), 0.531 inch Mounting Hole, 24 inch Leads w/o Terminal	ASZH480U201
				2 Pole, 480 V (400 V MCOV), 0.391 inch Mounting Hole, 24 inch Leads w/o Terminal	ASZH480U202
				2 Pole, 480 V (400 V MCOV), 0.766 inch Mounting Hole, 24 inch Leads w/o Terminal	ASZH480U203

<b>ARRESTER/OPEN LINK CUTOUT COMBINATIONS</b>					
Arrester/Open Link Cutout Combination, Evolution URT Type, UltraSIL Polymer-Housed  	235-25 S235-25-1 S235-25-2	Surge Arrester/Open Link cutout mounted externally to the transformer tank. Used for overvoltage/overcurrent protection of the transformer.	Combination Arrester/Open Link Fuse Cutout combination for primary winding overvoltage/overcurrent protection. Heavy-duty, polymer-housed, MOV arrester with non-decaying (infinite) TOV, transformer mounting bracket, isolator, and ground strap.	9 kV (7.65 kV MCOV), 50A Continuous, 1200 A Interrupting Arrester/Flipper Fuse Combination	URT09050K1C1D1A
				10 kV (8.40 kV MCOV), 50 A Continuous, 1200 A Interrupting Arrester/Flipper Fuse Combination	URT10050K1C1D1A
				18 kV (15.3 kV MCOV), 50 A Continuous, 1200 A Interrupting Arrester/Flipper Fuse Combination	URT18080K1C1D1A
Arrester/Open Link Cutout Combination, Normal-Duty VariSTAR, UltraSIL Polymer-Housed  	235-25 S235-25-1 S235-25-2	Surge Arrester/Open Link cutout mounted externally to the transformer tank. Used for overvoltage/overcurrent protection of the transformer.	Combination Arrester/Open Link Fuse Cutout combination for primary winding overvoltage/overcurrent protection. Normal duty, polymer-housed, non-gapped MOV arrester with transformer mounting bracket, isolator, and ground strap.	9 kV (7.65 kV MCOV), 50 A Continuous, 1200 A Interrupting Arrester/Flipper Fuse Combination	UNS09050K1C1D1A
				10 kV (8.40 kV MCOV), 50 A Continuous, 1200 A Interrupting Arrester/Flipper Fuse Combination	UNS10050K1C1D1A
				18 kV (15.3 kV MCOV), 50 A Continuous, 1200 A Interrupting Arrester/Flipper Fuse Combination	UNS18080K1C1D1A
Arrester/Open Link Cutout Combination, Heavy-Duty VariSTAR, UltraSIL Polymer-Housed  	235-25 S235-25-1 S235-25-2	Surge Arrester/Open Link cutout mounted externally to the transformer tank. Used for overvoltage/overcurrent protection of the transformer.	Combination Arrester/Open Link Fuse Cutout combination for primary winding overvoltage/overcurrent protection. Heavy-duty, polymer-housed, non-gapped MOV arrester with transformer mounting bracket, isolator, and ground strap.	9 kV (7.65 kV MCOV), 50 A Continuous, 1200 A Interrupting Arrester/Flipper Fuse Combination	UHS09050K1C1D1A
				10 kV (8.40 kV MCOV), 50 A Continuous, 1200 A Interrupting Arrester/Flipper Fuse Combination	UHS10050K1C1D1A
				18 kV (15.3 kV MCOV), 50 A Continuous, 1200 A Interrupting Arrester/Flipper Fuse Combination	UHS18080K1C1D1A

<b>HEAVY-DUTY DISTRIBUTION-CLASS ARRESTERS - POLYMER HOUSINGS</b>					
Heavy-Duty Distribution-Class Arrester, VariSTAR, Type UHS, UltraSIL Polymer-Housed  	235-35 S235-35-1	Surge Arrester mounted on the transformer tank to protect the primary winding from damaging overvoltages	Heavy-Duty Distribution-Class MOV arrester, polymer-housed, for primary winding overvoltage protection. With Isolator, Transformer Mounting Bracket, Ground Strap, and Insulated Cap.	3 kV, (2.55 kV MCOV), 2.5" Lug Spacing	UHS03030A1C1C1C
				6 kV, (5.1 kV MCOV), 2.5" Lug Spacing	UHS06040A1C1C1C
				9 kV, (7.65 kV MCOV), 2.5" Lug Spacing	UHS09050A1C1C1C
				10 kV, (8.4 kV MCOV), 2.5" Lug Spacing	UHS10050A1C1C1C
				12 kV, (10.2 kV MCOV), 2.5" Lug Spacing	UHS12060A1C1C1C
				15 kV, (12.7 kV MCOV), 2.5" Lug Spacing	UHS15070A1C1C1C
				18 kV, (15.3 kV MCOV), 2.5" Lug Spacing	UHS18080A1C1C1C
				21 kV, (17.0 kV MCOV), 2.5" Lug Spacing	UHS21090A1C1C1C
				24 kV, (19.5 kV MCOV), 2.5" Lug Spacing	UHS24100A1C1C1C
				27 kV, (22.0 kV MCOV), 9.25" Lug Spacing	UHS27110A1C1C1A
				30 kV, (24.4 kV MCOV), 9.25" Lug Spacing	UHS30120A1C1C1A
				33 kV, (27.0 kV MCOV), 9.25" Lug Spacing	UHS33130A1C1C1A
				36 kV, (29.0 kV MCOV), 9.25" Lug Spacing	UHS36140A1C1C1A
Heavy-Duty Distribution-Class Arrester, Evolution, Type URT, UltraSIL Polymer-Housed  	235-99 S235-35-1	Surge Arrester mounted on the transformer tank to protect the primary winding from damaging overvoltages	Heavy-Duty Distribution-Class MOV arrester, with infinite (non-decaying) TOV (temporary overvoltage), polymer-housed, for primary winding overvoltage protection. With Isolator, Transformer Mounting Bracket, Ground Strap, and Insulated Cap.	3 kV, (2.55 kV MCOV), 2.5" Lug Spacing	URT03040A1C1C1C
				6 kV, (5.1 kV MCOV), 2.5" Lug Spacing	URT06050A1C1C1C

<b>LIGHT-DUTY DISTRIBUTION-CLASS ARRESTERS - UNDER-OIL MOUNTING</b>					
Light-Duty Distribution-Class Arrester, VariSTAR Type CLU, Under-Oil Application.  	235-95 S235-95-1	Mounted under-oil inside the Transformer Tank, connected to the primary winding.	Light-Duty Distribution-Class MOV arrester, for primary winding overvoltage protection. Under-oil application. With Line Lead, Ground Lead, and isolation link (ground side). Arrester Block Assembly shall be composite wrapped.	3 kV, (2.55 kV MCOV)	CLU23A03
				6 kV, (5.1 kV MCOV)	CLU23A06
				9 kV, (7.65 kV MCOV)	CLU23A09
				10 kV, (8.4 kV MCOV)	CLU23A10
				12 kV, (10.2 kV MCOV)	CLU23A12
				15 kV, (12.7 kV MCOV)	CLU23A15
				18 kV, (15.3 kV MCOV)	CLU23A18
				21 kV, (17.0 kV MCOV)	CLU23A21
				24 kV, (19.5 kV MCOV)	CLU23A24
				27 kV, (22.0 kV MCOV)	CLU23A27
				30 kV, (24.4 kV MCOV)	CLU23A30
				33 kV, (27 kV MCOV)	CLU23A33
				36 kV, (29 kV MCOV)	CLU23A36
<b>HEAVY-DUTY DISTRIBUTION-CLASS ARRESTERS - UNDER-OIL MOUNTING</b>					
Heavy-Duty Distribution-Class Arrester, VariSTAR Type AZU, Under-Oil Application.  	235-64 S235-64-1	Mounted under-oil inside the Transformer Tank, connected to the primary winding.	Heavy-Duty Distribution-Class MOV arrester, for primary winding overvoltage protection. Under-oil application. With Line Lead and Ground Lead.	3 kV, (2.55 kV MCOV)	AZU100L003
				6 kV, (5.1 kV MCOV)	AZU100L006
				9 kV, (7.65 kV MCOV)	AZU100L009
				10 kV, (8.4 kV MCOV)	AZU100L010
				12 kV, (10.2 kV MCOV)	AZU100L012
				15 kV, (12.7 kV MCOV)	AZU100L015
				18 kV, (15.3 kV MCOV)	AZU100L018
				21 kV, (17.0 kV MCOV)	AZU100L021
				24 kV, (19.5 kV MCOV)	AZU100L024
				27 kV, (22.0 kV MCOV)	AZU100L027
				30 kV, (24.4 kV MCOV)	AZU100L030
				36 kV, (29.0 kV MCOV)	AZU100L036

<b>INTERRUPTER</b>																																												
MagneX Interrupter Two- and Three-Phase	240-33 S240-33-1	Primary overcurrent protection of pole-mounted and pad-mounted three-phase transformer.	Breaker shall be installed on the primary side of transformer. Breaker shall have the capability to energize and de-energize the three-phase transformer by one hotstick operation.																																									
<p>Example: To order a two- or three- phase MagneX Interrupter without indicator, single-phase trip, with float and E12 sensor, the catalog number would be <b>MX3BN1SYE12</b>. (Refer to Catalog Section 240-33.)</p> <div style="text-align: center;"> <table border="0"> <tr> <td></td> <td colspan="5" style="text-align: center;">← Standard →</td> <td colspan="6" style="text-align: center;">← Options →</td> </tr> <tr> <td>Digits:</td> <td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td><td>11</td> </tr> <tr> <td></td> <td><b>M</b></td><td><b>X</b></td><td><b>3</b></td><td><b>B</b></td><td><b>N</b></td><td><b>1</b></td><td><b>M</b></td><td><b>D</b></td><td><b>E</b></td><td><b>1</b></td><td><b>2</b></td> </tr> </table>   <table border="0" style="width: 100%;"> <tr> <td style="width: 33%; vertical-align: top;"> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>Product</b> MagneX</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>Phases</b> 2-Two 3-Three</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>Indicator</b> B-w/o Indicator</div> <div style="border: 1px solid black; padding: 2px; text-align: center;"><b>Overload</b> N-Non EO</div> </td> <td style="width: 33%; vertical-align: top;"> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>System Connection</b> D-Delta Y-Wye <b>Note:</b> For 2-Phase MagneX must be "D"</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>Trip Type</b> M-Multi-Phase Trip* S-Single-Phase Trip** <b>Note:</b> For 2-Phase MagneX must be "M" * If M, only select D for System Connection (digit 8) ** If S, only select Y for System Connection (digit 8)</div> <div style="border: 1px solid black; padding: 2px; text-align: center;"><b>Float</b> 1-w/Float 2-w/o Float</div> </td> <td style="width: 33%; vertical-align: top;"> <div style="border: 1px solid black; padding: 2px; text-align: center;"><b>Sensor Size</b> E01 E03 E06 E10 E12 E18 E25 E30 E40 E50</div> </td> </tr> </table> <p><b>Notes:</b>  * For a Two-phase MagneX, digit 8 must be a "D".  ** For a Two-phase MagneX, digit 7 must be an "M".</p> </div>							← Standard →					← Options →						Digits:	1	2	3	4	5	6	7	8	9	10	11		<b>M</b>	<b>X</b>	<b>3</b>	<b>B</b>	<b>N</b>	<b>1</b>	<b>M</b>	<b>D</b>	<b>E</b>	<b>1</b>	<b>2</b>	<div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>Product</b> MagneX</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>Phases</b> 2-Two 3-Three</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>Indicator</b> B-w/o Indicator</div> <div style="border: 1px solid black; padding: 2px; text-align: center;"><b>Overload</b> N-Non EO</div>	<div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>System Connection</b> D-Delta Y-Wye <b>Note:</b> For 2-Phase MagneX must be "D"</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 5px; text-align: center;"><b>Trip Type</b> M-Multi-Phase Trip* S-Single-Phase Trip** <b>Note:</b> For 2-Phase MagneX must be "M" * If M, only select D for System Connection (digit 8) ** If S, only select Y for System Connection (digit 8)</div> <div style="border: 1px solid black; padding: 2px; text-align: center;"><b>Float</b> 1-w/Float 2-w/o Float</div>	<div style="border: 1px solid black; padding: 2px; text-align: center;"><b>Sensor Size</b> E01 E03 E06 E10 E12 E18 E25 E30 E40 E50</div>

<b>BAY-O-NET HOLDER/FUSES</b>					
Sidewall-Mounted Flapper Bay-O-Net Assembly 	240-40 S240-40-2 S240-40-3	Holder for Bay-O-Net fuse. Used to protect pad-mounted transformers.	Bay-O-Net Assembly shall include a valve that will shut when the inner holder is removed from the housing and minimize oil from spilling out of the Bay-O-Net Assembly when the stabber is removed.	through 23 kV	4000361C99FV Note: Also available without Flapper Valve 4000361C99MC, with flapper valve and vent hole 4000361C79FV
Sidewall-Mounted Flapper Bay-O-Net Housing with Silver Plated Contacts with Inner Holder Only (No Cartridge) 	240-40 S240-40-2 S240-40-3	Holder for high ampere Bay-O-Net fuse and silver plated fuse cartridge. Used to protect large kVA transformers.	Bay-O-Net Assembly shall have silver plated contacts and include a valve that will shut when the inner holder is removed; thus minimizing oil-spillage from the Bay-O-Net when the stabber is removed.	through 23 kV Housing with silver plated contacts, inner holder only (no cartridge)	4038804B03M
Cover-Mounted Bay-O-Net Assembly 	240-40 S240-40-3	Bay-O-Net holder used for submersible transformers.	Bay-O-Net Assembly shall mount in the cover of submersible transformers.	through 23 kV	4001177B51MC (short) 400177B53MC (long)
Bay-O-Net Fuse Assembly Drip Guard 	240-41	Clamps on sidewall-mounted Bay-O-Net Assembly. Catches oil emitted from tank during removal of Bay-O-Net Fuse Holder.	Drip Guard shall clamp onto the Bay-O-Net Housing and catch oil that may come out of the housing when the stabber is removed.		4004352B02
Current Sensing Bay-O-Net Fuse Link 	240-45 S240-40-3	Field replaceable expulsion fuse used for protecting deadfront pad-mounted transformers.	Bay-O-Net mounted fuse link shall clear overload currents, secondary faults, and primary faults through its maximum interrupting rating.	6 A, Bay-O-Net Fuse	4000353C04B

Isolation Link 	240-47 S240-40-3 (Bay-O-Net Fuse) S240-34-1 (MagneX)	Used in series with Bay-O-Net Fuse or MagneX Interrupter. Melts open during transformer failure so line person can't re-energize failed transformer.	Isolation link shall be coordinated with the Bay-O-Net Fuse or MagneX Interrupter to melt only when a primary transformer failure occurs, preventing a line person from re-energizing a faulted transformer.	Bay-O-Net Fuse	Isolation Link

<b>CLIP-MOUNTED CURRENT-LIMITING FUSES</b>					
ELX Full-Range Current-Limiting Fuse  	240-55	Used for pad-mounted transformer protection. Mounted either in dry-well canister (deadfront) or in clip contacts (livefront).	Fuse shall provide full-range clearing capability and limit current and energy let-through when operating due to high currents. Fuse shall not emit gases when it operates, thus, making it suitable for drywell canister applications.	3 A, 8.3 kV, Code 4, ELX Full-Range Current-Limiting Fuse	3563003M11M

X-Limiter Full-Range Current-Limiting Fuse  	240-56 S240-56-1	Used for pad-mounted transformer protection. Mounted in clip contacts (livefront).	Fuse shall provide full-range current-clearing capability, and limit current and energy let-through to the system when operating due to primary transformer faults. Fuse shall not emit gases when it operates. Optional indicator is required.	10 A, 4.3 kV, Code 4, X-Limiter Clip-Style Fuse without indicator	43F010-I

15 and 25 kV Class Fused Loadbreak Elbow Current-Limiting Fuse	240-97 S240-97-1	For protecting underground distribution systems as part of a fused elbow.	Fuse shall provide full-range current-carrying capability, and limit current and energy let-through to the system when operating due to a primary fault. Must be installed in a Cooper fused elbow assembly.	<b>8.3 kV Fuse Rating/15.5 kV System Class</b>

<b>HIGH VOLTAGE (PRIMARY) BUSHINGS</b>					
Plastic (HTN) Molded TRI-Clamp Bushing Well W/Fixed or Removable Stud	800-32 S800-35-2	Externally mounted & removable well for termination of primary coil winding leads at the frontplate of pad-mounted transformers. A bushing or feedthru insert must be installed for connection of high-voltage (primary) cable to the transformer.	The 200 A Bushing well shall have either a fixed or a removable stud, be externally removable, molded with High Temperature Nylon (HTN) 35 kV, 150 kV BIL Rated with integral clamp, and have a molded-in semi-conductive shield. The removable stud shall have provisions for easy removal of broken parts from both the well & insert.	200 A, 35 kV	BW150F (Fixed Stud) BW150R (Removable Stud)
Plastic (HTN) Molded Bushing Well with Fixed or Removable Stud 	800-33 S800-35-2	Externally mounted & removable well for termination of primary coil winding leads at the frontplate of pad-mounted transformers. A bushing or feedthru insert must be installed for connection of high-voltage (primary) cable to the transformer.	The 200 A Bushing well shall have either a fixed or a removable stud, be externally removable, molded with High Temperature Nylon (HTN) 28 kV rated and have a molded-in semi-conductive shield. The removable stud shall have provisions for easy removal of broken parts from both the well & insert.	200 A, 15, 25, & 28 kV	2638372C01 (Fixed Stud) 2638372C02R (Removable Stud)
Plastic (HTN) Molded Bushing Well with Fixed or Removable Stud	800-33 S800-35-2		The 200 A Bushing well shall have either a fixed or removable stud, be externally removable, molded with High Temperature Nylon (HTN) 35 kV, 150 BIL Rated, and have a molded-in semi-conductive shield. The removable stud shall have provisions for easy removal of broken parts from both the well & insert.	200 A, 35 kV	2638372C01S (Fixed Stud) 2638372C02RS (Removable Stud)

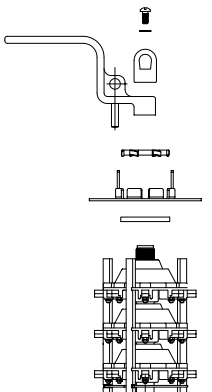

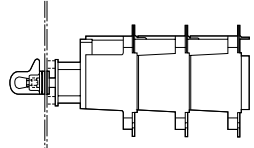

Product	Catalog Section	Typical Application	Recommended Spec Wording	Description	Catalog Numbers
Bushing Well with Fixed or Removable Stud 	800-34 S800-35-2	Externally mounted & removable one-piece primary side loadbreak bushing. Used for connecting high voltage cables outside of the transformer tank to the winding leads inside the tank. Designed for under-oil usage.	The 200A bushing well shall have either a fixed or a removable stud, be externally removable and mateable with all bushing inserts meeting applicable IEEE standards. The removable stud shall have provisions for easy field replacement of the bushing stud.	200 A, 15, 25 & 28 kV	2603973B02T (Fixed Stud) 2603973B02R (Removable Stud)
Three-Phase Integral Loadbreak Bushing 	800-39 S800-35-2	Externally mounted & removable one-piece primary side loadbreak bushing. Used for connecting high voltage cables outside of the transformer tank to the winding leads inside the tank. Designed for under-oil usage.	35 kV, 200 A, Primary Bushing shall be externally removable copper large IEEE Type interface, three-phase rated, integral design.	200 A, 35 kV	2637024C01M
Integral Deadbreak Bushings 	800-45 S800-35-2	Externally mounted & removable one-piece primary side deadbreak bushing. Used for connecting high voltage cables outside of the pad-mounted tank to the winding leads inside the tank. Designed for under-oil usage.	The 600 A Deadbreak Bushing shall be externally removable, copper or aluminum, integral design, with molded-in semi-conductive shield.	600 A, 15 & 25 kV Aluminum Conductor Copper Conductor	2637019B02 2637019B04
Deadbreak Apparatus Bushing 	800-47 S800-35-2	Externally mounted & removable one-piece primary side deadbreak bushing. Used for connecting high-voltage cables outside of the pad-mounted tank to the winding leads inside the tank. Designed for under-oil usage.	The 600 A Deadbreak Bushing shall be externally removable, copper or aluminum, integral design, with molded-in semi-conductive shield.	600 A, 35 kV Aluminum Conductor (635) Copper Conductor (935) 150 kV BIL (B150) 200 kV BIL (B200)	DB635B150 DB935B150 DB635B200 DB935B200
Integral PUSH-OP Deadbreak Bushings 	800-46 S800-46-1	Externally mounted & removable one-piece primary side deadbreak bushing. Used for connecting high-voltage cables outside of the pad-mounted tank to the winding leads inside the tank. Designed for under-oil usage.	The 600 A Deadbreak Bushing shall be externally removable, copper, integral design, compatible with Cooper 600 A PUSH-OP connectors.	600 A, 15 & 25 kV	2637604C01
Deadbreak PUSH-OP Apparatus Bushings 	800-48 S800-46-1	Externally mounted & removable one-piece primary side deadbreak bushing. Used for connecting high voltage cables outside of the pad-mounted tank to the winding leads inside the tank. Designed for under-oil usage.	The 600 A Deadbreak Bushing shall be externally removable, copper, integral design, compatible with Cooper 600 A PUSH-OP connectors.	600A, 35kV	2637939C01

<b>ARRESTER DISCONNECTOR</b>					
Under-oil Arrester Disconnecter	800-51 S800-51-1	Provides the transformer manufacturer or utility with a means of disconnecting and reconnecting the under-oil arrester ground for transformer testing. Designed for under-oil usage.	The under-oil arrester disconnecter shall be installed in an industry std. 1.325" dia., keyed (0.14 radius) hole from the inside of the tank. It shall be internally or externally secured & positively grounded w/metal UL approved electrical grounding conduit lock nut.	35 kV	AD150PA100 (w/std. locking provision), Internally Secured  AD150NA100 (no locking provision), Internally Secured  AD150PA200 (w/std. locking provision), Externally Secured  AD150NA200 (no locking provision), Externally Secured
<b>SWITCHES</b>					
Externally Operated One-, Two- and Three-Phase Tap-Changer Switch 100 A, 150 kV BIL    	800-57 S800-57-1	Externally operated switch used to regulate induced voltage of transformer, allowing changes in primary voltage to maintain constant secondary voltage of pole or pad-mounted transformers.	The Tap-Changer Switch shall be externally operated, snap action switch with a choice of the following operating systems: · Cap wrench · Lever Handle · Hotstick handle (flexible or rigid) Padlocking provisions are available for lever or hotstick operable handles.	<b>Single-Phase, 5 Positions</b>

<p><b>Notes:</b>  P/N Example shown represents a weld-in system, 300 A, 38 kV, vertical (cover-mounted), full deck extension, three-phase, w/o indicator plate, with standard brass handle hardware kit, 6:00/9:00 positions. (Other handle position options available upon request for 9:00/12:00, 12:00/3:00, and 3:00/6:00 positions. Consult your Eaton's Cooper Power Systems sales representative for details.)  * Indicator plate not available for weld-in system, only available for ring mount systems.  ** Cover mounted Weld-In switches have all externally located parts made of stainless steel or brass.</p>

<b>LOADBREAK CONNECTORS</b>					
Loadbreak Elbow Connector  	500-10-7 500-10-7C (Canadian) S500-10-7 S500-10-8	Fully-shielded/insulated, plug-in termination for connecting shielded, insulated, deadfront connection of underground (URG) cable to transformers, switching cabinets and junctions equipped with loadbreak bushings. Provides capability for continuous current rating and load per unit and breaking to 200 A, 15 kV.  <b>NOTE:</b> To add optional Jacket Seal Option, insert a "J" after LE, ie: LEJ215.	The Loadbreak elbow shall conform to IEEE Std 386™ standard Separable Insulated Connectors for Power Distribution Systems Above 600 V. Bimetallic (Coppertop Connectors).	<b>200 A, 15 kV</b>	
				Elbow without Test Point, with CopperTop Connector, Bulk Pack	LE215- - -
				Elbow without Test Point, with CopperTop Connector, Individual Box Kit	LE215- - -X
				Elbow with Test Point, with CopperTop Connector, Bulk Pack	LE215- - -T
				Elbow with Test Point, with CopperTop Connector, Individual Box Kit	LE215- - -TX
				Elbow without Test Point, with CopperTop Connector, Bulk Pack, with 5 kV Cable Adapter	LE215CCA- -
				Elbow without Test Point, with CopperTop Connector, Individual Box Kit, with 5 kV Cable Adapter	LE215CCA- -X
				Elbow with Test Point, with CopperTop Connector, Bulk Pack, with 5 kV Cable Adapter	LE215CCA- -T
				Elbow with Test Point, with CopperTop Connector, Individual Box Kit, with 5 kV Cable Adapter	LE215CCA- -TX
				Elbow without Test Point, with CopperTop Connector, Bulk Pack, with 5 kV Cable Adapter	LE215CCB- -
				Elbow without Test Point, with CopperTop Connector, Individual Box Kit, with 5 kV Cable Adapter	LE215CCB- -X
				Elbow with Test Point, with CopperTop Connector, Bulk Pack, with 5 kV Cable Adapter	LE215CCB- -T
				Elbow with Test Point, with CopperTop Connector, Individual Box Kit, with 5 kV Cable Adapter	LE215CCB- -TX
				Elbow without Test Point, without CopperTop Connector, Bulk Pack	LE215-00
				Elbow without Test Point, without CopperTop Connector, Individual Box Kit	LE215-00X
Elbow with Test Point, without CopperTop Connector, Bulk Pack	LE215-00T				
Elbow with Test Point, without CopperTop Connector, Individual Box Kit	LE215-00TX				

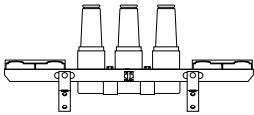

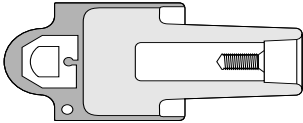

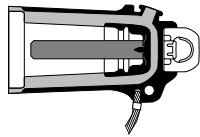

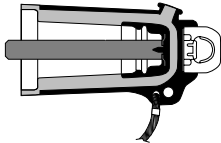

Product	Catalog Section	Typical Application	Recommended Spec Wording	Description	Catalog Numbers
Expanded Range Loadbreak Elbow Connector 	500-28-7 S500-10-1 500-28-7C (28 kV Canadian)	Fully-shielded/insulated plug-in termination for connecting shielded, insulated, deadfront conn of URG cable to transformers, switching cabinets and junctions equipped w/loadbreak bushings. Provides capability for continuous current rating and load per unit and breaking to 200 A, 25 kV.  <b>NOTE:</b> To add optional Jacket Seal Option, insert a "J" after LE, ie: LEJ225.	The Loadbreak elbow shall conform to IEEE Std 386™ standard Separable Insulated Connectors for Power Distribution Systems Above 600 V. Bimetallic (Coppertop Connectors).	<b>200 A, 25 kV</b>	
				Elbow without Test Point, with CopperTop Connector, Bulk Pack	LE225- - -
				Elbow without Test Point, with CopperTop Connector, Individual Box Kit	LE225- - -X
				Elbow with Test Point, with CopperTop Connector, Bulk Pack	LE225- - -T
				Elbow with Test Point, with CopperTop Connector, Individual Box Kit	LE225- - -TX
				Elbow without Test Point, without CopperTop Connector, Bulk Pack	LE225-00
				Elbow without Test Point, without CopperTop Connector, Individual Box Kit	LE225-00X
				Elbow with Test Point, without CopperTop Connector, Bulk Pack	LE225-00T
				Elbow with Test Point, without CopperTop Connector, Individual Box Kit	LE225-00TX
Three-Phase Loadbreak Elbow Connector 	500-41 S500-41-1	Fully-shielded/insulated plug-in termination for three-phase shielded, insulated, deadfront conn. of URG cable to transformers, switching cabinets and junctions equipped w/loadbreak bushings. Provides capability for continuous current rating and load per unit and breaking to 200 A, 35 kV.	The Loadbreak elbow shall conform to IEEE Std 386™ standard Separable Insulated Connectors for Power Distribution Systems Above 600 V. Bimetallic (Coppertop Connectors).	<b>200 A, 35 kV</b>	
				Elbow without Test Point, with CopperTop Connector, Bulk Pack	LE235- - -
				Elbow without Test Point, with CopperTop Connector, Individual Box Kit	LE235- - -X
				Elbow with Test Point, with CopperTop Connector, Bulk Pack	LE235- - -T
				Elbow with Test Point, with CopperTop Connector, Individual Box Kit	LE235- - -TX
				Elbow without Test Point, without CopperTop Connector, Bulk Pack	LE235-00
				Elbow without Test Point, without CopperTop Connector, Individual Box Kit	LE235-00X
				Elbow with Test Point, without CopperTop Connector, Bulk Pack	LE235-00T

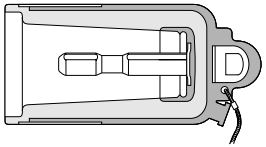

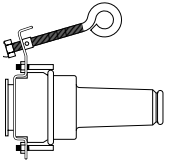

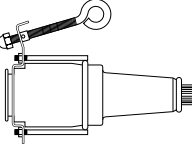

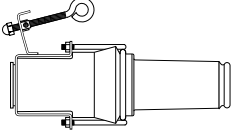

Product	Catalog Section	Typical Application	Recommended Spec Wording	Description	Catalog Numbers
POSI-BREAK Expanded Range Loadbreak Elbow Connector 	500-29-7 S500-10-1 500-29-7CC (28 kV Canadian)	Fully-shielded/insulated plug-in termination for connecting shielded, insulated, deadfront continuous of URG cable to transformers, switching cabinets and junctions equipped w/loadbreak bushings. Provides capability for continuous current rating and load per unit and breaking to 200 A, 25 kV.  <b>NOTE:</b> To add optional Jacket Seal Option, insert a "J" after PLE, ie: PLEJ225.	The loadbreak elbow shall conform to IEEE 386™ standard. The elbow shall provide increased creepage distance via an insulated sleeve around the top of the copper probe and a layer of EPDM rubber over the conductive internal insert of the elbow.	<b>200 A, 25 kV</b>	
				POSI-BREAK Elbow without Test Point, with CopperTop Connector, Bulk Pack	PLE225- - -
				POSI-BREAK Elbow without Test Point, with CopperTop Connector, Individual Box Kit	PLE225- - -X
				POSI-BREAK Elbow with Test Point, with CopperTop Connector, Bulk Pack	PLE225- - -T
				POSI-BREAK Elbow with Test Point, with CopperTop Connector, Individual Box Kit	PLE225- - -TX
				POSI-BREAK Elbow without Test Point, without CopperTop Connector, Bulk Pack	PLE225-00
				POSI-BREAK Elbow without Test Point, without CopperTop Connector, Individual Box Kit	PLE225-00X
				POSI-BREAK Elbow with Test Point, without CopperTop Connector, Bulk Pack	PLE225-00T
POSI-BREAK Elbow with Test Point, without CopperTop Connector, Individual Box Kit	PLE225-00TX				
POSI-BREAK Insulated Protective Cap 	500-37 500-37C (28 kV Canadian) S500-21-1	Designed to electrically insulate and mechanically seal loadbreak bushing interfaces. When mated to a loadbreak product and the drain wire is attached to ground, it provides a fully shielded, submersible insulating cover for energized bushings.	The cap shall provide permanent or temporary installation on bushings, junctions or feedthru devices that meet the requirements of IEEE 386™ standard.	200 A, 25 kV	PLPC225 (Bulk Pack, 30/box) PLPC225X (Individual Box Kit)
Loadbreak Bushing Insert 	500-12 S500-12-1	Designed for installation in transformers, switchgear or other apparatus with 200 A high-voltage bushing wells. The loadbreak interface mates with elbow terminators or other accessories that conform to IEEE Std 386™ standard.	The Loadbreak Bushing Insert shall conform to IEEE Std 386™ standard. Current carrying path shall be all copper. Shall have a hex-broached base to accommodate torque tool for installation assistance. Latched elbow indicator ring shall be standard offering.	200 A, 15 kV	LBI215BP (Bulk Pack, 32/box) (For 250 pc packing (Skid) Change to LBI215ITP) LBI215X (Individual Box Kit) LBITool (Installation Torque Tool)
Loadbreak Bushing Insert 	500-26 500-26C (28 kV Canadian) S500-12-1	Designed for installation in transformers, switchgear or other apparatus with 200 A high-voltage bushing wells. The loadbreak interface mates with elbow terminators or other accessories that conform to IEEE Std 386™ standard.	The Loadbreak Bushing Insert shall conform to IEEE Std 386™ standard. Current carrying path shall be all copper. Shall have a hex-broached base to accommodate torque tool for installation assistance. Latched elbow indicator ring shall be available as an option.	200 A, 25 kV	LBI225 (Standard Length); (Add "X" for Individual Box Kit) (Add "BP" Bulk Pack, 32/box) (For 250 pc. packing (skid) Change to LBI225ITP) LBI225L (Long Version)

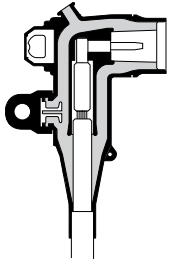

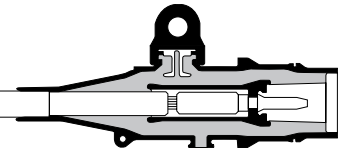

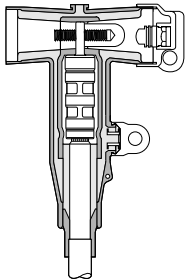

Product	Catalog Section	Typical Application	Recommended Spec Wording	Description	Catalog Numbers
Rotatable Feedthru Insert 	500-13 S500-13-1	Used to provide dual bushings from a single apparatus bushing well. It allows the conversion of a radial feed transformer to feedthru transformer. In addition it provides area for installation of MOVE Arresters for cable protection.	The Rotatable Feedthru must conform to IEEE Std 386™ standard. The current carrying path will be all copper/copper alloy. Shall have a torque limiting feature between 7-14 ft-lbs to eliminate bushing well stud breakage. Must be capable of rotating clockwise continuously without loosening the current interchange.	200 A, 15 kV	LFI215
Rotatable Feedthru Insert 	500-30 500-30C (28 kV Canadian) S500-13-1	Used to provide dual bushings from a single apparatus bushing well. It allows the conversion of a radial feed transformer to feedthru transformer. In addition it provides area for installation of MOVE Arresters for cable protection.	The Rotatable Feedthru must conform to IEEE Std 386™ standard. The current carrying path will be all copper/copper alloy. Shall have a torque limiting feature between 7-14 ft-lbs to eliminate bushing well stud breakage. Must be capable of rotating clockwise continuously without loosening the current interchange.	200 A, 25 kV	LFI225
Loadbreak Portable Feedthru 200 A, 15 kV 	500-14 S500-14-1	Used in pad-mounted equipment, underground vaults, and other apparatus to bypass transformers, to test and ground circuits, and to provide open point deadfront lightning arrester protection.	The Portable Feedthru must be able to be used with 15 kV Class loadbreak elbows and other accessories and meet the requirements of IEEE Std 386™ standard. The Portable Feedthru shall also be fully shielded, submersible, separable connection for loadbreak operation.	Horizontal Feedthru	LPF215H
				Vertical Feedthru	LPF215V
				Universal (Horizontal/Vertical Combination)	LPF215U
Loadbreak Portable Feedthru 200 A, 25 kV 	500-31 500-31C (28 kV Canadian) S500-14-1	Used in pad-mounted equipment, underground vaults, and other apparatus to bypass transformers, to test and ground circuits, and to provide open point deadfront lightning arrester protection.	The Portable Feedthru must be able to be used with 25 kV Class loadbreak elbows and other accessories and meet the requirements of IEEE Std 386™ standard. The Portable Feedthru shall also be fully shielded, submersible, separable connection for loadbreak operation.	Horizontal Feedthru	LPF225H
				Vertical Feedthru	LPF225V
				Universal (Horizontal/Vertical Combination)	LPF225U
Three-Phase Loadbreak Portable Feedthru 200 A, 35 kV 	500-49 S500-14-1	Used in pad-mounted equipment, underground vaults, and other apparatus to bypass transformers, to test and ground circuits, and to provide open point deadfront lightning arrester protection.	The Portable Feedthru must be able to be used with large 35 kV Class loadbreak elbows and other accessories and meet the requirements of IEEE Std 386™ standard. The Portable Feedthru shall also be fully shielded, submersible, separable connection for loadbreak operation.	Horizontal Feedthru	LPF235H
				Vertical Feedthru	LPF235V

Loadbreak Junction 	500-15 S500-15-1	Used in pad-mounted apparatus, underground vaults, and other apparatus to sectionalize, establish loops, taps and splices, and to facilitate apparatus changeouts.	The junction shall provide two, three or four 8.3/14.4 kV loadbreak interfaces that are internally bused together and meet all requirements of IEEE Std 386™ standard - Separable Insulated Connector Systems. The junction shall also have a solid current path of all copper.	<b>200 A 15 kV Class Loadbreak Junction</b>	
				2 Interfaces Junction with Stainless Steel Bracket	LJ215C2B
				3 Interfaces Junction with Stainless Steel Bracket	LJ215C3B

4 Interfaces Junction Only	LJ235C4				
200 A 15/25 kV Class Bushing Well Insulated Plug 	500-38 500-38C (28 kV Canadian)	Provides an insulated, fully shielded, submersible cover for unused 15 and 25 kV Class bushing well in deadfront equipment	The Bushing Well Insulated Plug shall meet the full requirements of IEEE Std 386™ standard - Separable, Insulated Connector Systems. It shall also be molded of high quality EPDM insulation and have a molded semi-conductive EPDM shield. The plug will also have a molded ground tab on the shield to allow attachment of ground wire to ensure deadfront construction.	Insulated Bushing Well Plug	IBWP225
200 A 15 kV CLASS Loadbreak Protective Cap with Insulated Cuff 	500-21 S500-21-1	Designed to electrically insulate and mechanically seal loadbreak bushing interfaces. When mated to a loadbreak product and the drain wire is attached to ground, it provides a fully shielded, submersible insulating cover for energized bushings.	The cap shall provide permanent or temporary installation on bushings, junctions or feedthru devices that meet the requirements of IEEE Std 386™ standard.	Loadbreak Protective Cap with Drain Wire, Bulk Pack	LPC215 LBC215X
				Loadbreak Protective Cap with Drain Wire, Individual Box Kit	LPC215X
200 A 25 kV Class Loadbreak Protective Cap with Insulated Cuff 	500-39 S500-21-1	Designed to electrically insulate and mechanically seal loadbreak bushing interfaces. When mated to a loadbreak product and the drain wire is attached to ground, it provides a fully shielded, submersible insulating cover for energized bushings.	The cap shall provide permanent or temporary installation on bushings, junctions or feedthru devices that meet the requirements of IEEE Std 386™ standard.	Loadbreak Protective Cap, with Drain Wire, with Insulated Cuff, Bulk Pack	LPC225 LPC225X
				Loadbreak Protective Cap, with Drain Wire, with Insulated Cuff, Individual Box Kit	LPC225X

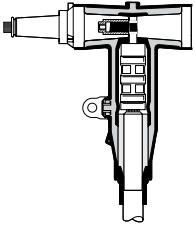

Product	Catalog Section	Typical Application	Recommended Spec Wording	Description	Catalog Numbers
Insulated Protective Cap 	500-65 S500-21-1	Designed to electrically insulate and mechanically seal loadbreak bushing interfaces. When mated to a loadbreak product and the drain wire is attached to ground, it provides a fully shielded, submersible insulating cover for energized bushings.	The cap shall provide permanent or temporary installation on bushings, junctions or feedthru devices that meet the requirements of IEEE Std 386™ standard.	200A, 35kV	LPC235
Insulated Standoff Bushing 200 A, 15 kV Class 	500-22 S500-22-1	Isolates and sectionalizes energized cable in pad-mounted cabinets, underground vaults, and other apparatus	The Insulated Standoff Bushing shall be designed to install in the parking stand mounted on a transformer or other apparatus. It shall meet the requirements of IEEE Std 386™ standard. It shall also provide a single loadbreak interface made of high quality insulating EPDM.	Insulated Bushing with Standard Bracket	ISB215
				Insulated Bushing with Stainless Steel Bracket	ISB215S
Insulated Standoff Bushing 200 A, 25 kV Class 	500-40 500-40C (28 kV Canadian) S500-22-1	Isolates and sectionalizes energized cable in pad-mounted cabinets, underground vaults, and other apparatus	The Insulated Standoff Bushing shall be designed to install in the parking stand mounted on a transformer or other apparatus. It shall meet the requirements of IEEE Std 386™ standard. It shall also provide a single loadbreak interface made of high quality insulating EPDM.	Standoff Bushing with Standard Bracket	ISB225
				Standoff Bushing with Stainless Steel Bracket	ISB225S
Insulated Standoff Bushing 	500-66 S500-22-1	Isolates and sectionalizes energized cable in pad-mounted cabinets, underground vaults, and other apparatus	The insulated Standoff Bushing shall be designed to install in the parking stand mounted on a transformer or other apparatus. It shall meet the requirements of IEEE Std 386™ standard. It shall also provide a single loadbreak interface made of high quality insulating EPDM rubber.	200 A, 35kV (w/standard bracket)	ISB235
15 kV Class Fused Loadbreak Elbow Connector	500-110 S500-110-1	Protects underground distribution systems	Fused elbow assembly shall provide full-range current-carrying capability, and limit current and energy let-through to the system when operating due to a primary fault. Shall be made of high quality insulating EPDM rubber.	200 A, 15 kV	LFEP215TFEC---AT <b>Note:</b> For fuse to go 240-97
25 kV Class Fused Loadbreak Elbow Connector	500-111 S500-110-1	Protects underground distribution systems	Fused elbow assembly shall provide full-range current-carrying capability, and limit current and energy let-through to the system when operating due to a primary fault. Shall be made of high quality insulating EPDM rubber.	200 A, 25 kV	LFEP225TFEC---AT <b>Note:</b> For fuse to go 240-97

Product	Catalog Section	Typical Application	Recommended Spec Wording	Description	Catalog Numbers
<b>DEADBREAK CONNECTOR, 200 A</b>					
Deadbreak Elbow Connector 	550-10 S550-10-1	Deadbreak Elbow Connector is a fully-shielded and insulated plug-in termination for connecting underground cable to transformers, switching cabinets and junctions equipped with deadbreak bushings.	The Deadbreak Elbow Connector shall be fully-shielded and insulated for use in deadbreak applications. The Deadbreak Elbow Connector shall accept a wider range of cable diameter for a given elbow size.	200 A, 15 & 25 kV	DE225 - - T
Deadbreak Straight Connector 	550-12 S550-12-1	Deadbreak Straight Connector is a fully-shielded and insulated plug-in termination for connecting underground cable to transformers, switching cabinets and junctions equipped with deadbreak bushings.	The Deadbreak Straight Connector shall be fully-shielded and insulated for use in deadbreak applications. The Deadbreak Straight Connector shall accept a wider range of cable diameter for a given elbow size. It shall also allow mounting to be vertical, horizontal, or any angle in between.	200 A, 15 & 25 kV	DS225 - - T
<b>DEADBREAK CONNECTORS</b>					
BOL-T Connector 	600-30 S600-10-2	Fully-shielded/insulated separable termination for three-phase shielded, insulated, deadfront connection of URG cable to transformers, switching cabinets and junctions equipped w/ deadbreak bushings.	The Deadbreak connector shall conform to the electrical, mechanical and dimensional requirements of IEEE 386™ standard. The connectors and associated cable components shall be interchangeable with those currently available from other major manufacturers.	<b>600 A 15 &amp; 25 kV Bol-T Deadbreak Connector System Without Test Point</b>	
				Aluminum Bol-T Kit with Stud without Test Point	BT625 - - - A1

BT-TAP Connector System 	600-15 S600-15-3	Used as a retrofit for existing BOL-T (or other bolted systems that use unthreaded compression connectors) systems with a 200 A loadbreak tap for testing, grounding, or overvoltage protection.	The BT-TAP shall be fully shielded, submersible and meet all the requirements of IEEE Std 386™ standard. It shall be capable of providing a 200 A Tap for testing, grounding or overvoltage protection. It can be used for up to 900 A systems when used in conjunction with coppertop compression connectors and copper bushing or junctions.	<b>15 kV BT-TAP Connector System (Aluminum) Without Test Point</b>	
				BT-TAP Kit, 1 5kV Aluminum, w/o stud, w/o Test Point, w/o 200 A cap	BTP615 - - - A

Deadbreak Junction 	600-42 600-42C (28 kV Canadian) S600-22-1	Used in pad-mounted apparatus, underground vaults, and other apparatus to sectionalize, establish loops, taps and splices, and to facilitate apparatus changeouts.	The junction shall provide two, three or four deadbreak interfaces that are internally bused together and meet all requirements of IEEE 386™ standard - Separable Insulated Connector Systems. The junction shall also have a solid current path of all copper or aluminum.	<b>15/25 kV, 600 A</b> Aluminum 2-Way Junction Only Aluminum 2-Way Junction with U-Straps Aluminum 2-Way Junction with Stainless Steel Bracket Aluminum 3-Way Junction Only Aluminum 3-Way Junction with U-Straps Aluminum 3-Way Junction with Stainless Steel Bracket Aluminum 4-Way Junction Only Aluminum 4-Way Junction with U-Straps Aluminum 4-Way Junction with Stainless Steel Bracket Copper 2-Way Junction Only Copper 2-Way Junction with U-Straps Copper 2-Way Junction with Stainless Steel Bracket Copper 3-Way Junction Only Copper 3-Way Junction with U-Straps Copper 3-Way Junction with Stainless Steel Bracket Copper 4-Way Junction Only Copper 4-Way Junction with U-Straps Copper 4-Way Junction with Stainless Steel Bracket	DJ625A2 DJ625A2U DJ625A2B DJ625A3 DJ625A3U DJ625A3B DJ625A4 DJ625A4U DJ625A4B DJ625C2 DJ625C2U DJ625C2B DJ625C3 DJ625C3U DJ625C3B DJ625C4 DJ625C4U DJ625C4B

## Loadbreak/Deadbreak Connectors

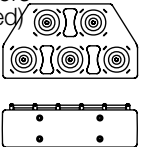

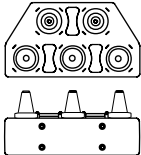

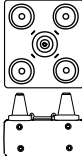

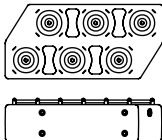

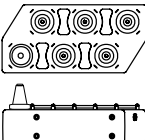

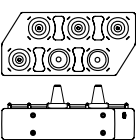

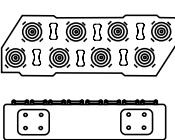

Product	Catalog Section	Typical Application	Recommended Spec Wording	Description	Catalog Numbers
Deadbreak Apparatus Connectors 	650-10	Multi-Tap junction bars for use where 200 A wells and 600/900 A bushings are needed for vault or apparatus applications for looping, tapping and sectionalizing applications.	The junction bars shall provide 15, 25, and 35 kV, 200 A, and 600/900 A connections which meet all requirements of IEEE Std 386™ standard.	<b>15/25 KV CLASS IN-LINE JUNCTION BARS</b>	
				Junction Bar, In-Line, Cu, 15/25 kV, (2) 200 A Wells, Std. Brkt.	JBI25C2W
				Junction Bar, In-Line, Cu, 15/25 kV, (2) 200 A Wells, Parking Stand Brkt.	JBI25C2WPS

# Fault Indicators

Product	Catalog Section	Typical Application	Recommended Spec Wording	Description	Catalog Numbers
	320-40 S320-40-1	To locate faulted sections of underground cable systems by being connected to voltage test point on a 200 A separable connector or 600 A terminator.	Features to include: An inrush restraint to eliminate false tripping and is standard on all units. The faulted circuit indicator must ignore inrush currents caused by reclosing operations of protective devices on the system. A dead time of 200 ms will activate the inrush restraint feature. A low pass filter is required to prevent the faulted circuit indicator from tripping on high frequency transients like those caused by cable capacitive discharges. Temperature compensation circuitry to assure accurate reliable performance over the entire specified temperature range of -40 °C to +85 °C. Allow easy coordination with current-limiting fuses.	S.T.A.R. Test Point Reset, HI Trip	STHI
				S.T.A.R. Test Point Reset, HI Trip w/Aux. Contact	STHIA
				S.T.A.R. Test Point Reset, HI Trip w/Aux. Contact and Remote Fisheye Display	STHIAR
				S.T.A.R. Test Point Reset, HI Trip w/Aux. Contact and Small Remote Display	STHIAS
				S.T.A.R. Test Point Reset, HI Trip, w/ Adapter Kit	STHIK

S.T.A.R. Test Point Reset Adapter Kit	STAK				
	320-42 S320-42-1 S320-42-2	To locate faulted sections of underground cable systems by being connected to voltage test point on a 200 A separable connector or 600 A terminator.	Features to include: Fault indication on minimum 100 A di/dt within 100 ms. Response time of 3 ms or less, for coordination with current-limiting fuses. Current transformer fault sensing design. Inrush restraint to prevent false tripping due to current inrush conditions. Low pass filter specifically tuned to prevent false tripping on high frequency transients, but to allow proper indication on systems using current-limiting fuses. Temperature compensation for accurate and reliable performance over a temperature range of -40 °C to +85 °C. Reset restraint to prevent false reset due to excessive voltage feedback levels up to 80% of nominal system voltage. Installation using single hotstick.	S.T.A.R. Pathfinder Test Point Reset w/ Variable Trip	STVT
				S.T.A.R. Pathfinder Test Point Reset w/ Variable Trip & Aux.	STVTA
				S.T.A.R. Fiber Optic Remote Cable, 6 ft.	SFOC
				S.T.A.R. Fiber Optic Remote Cable, 9 ft.	SFOC09
				S.T.A.R. Fiber Optic Remote Cable, 12 ft.	SFOC12
